Notes and Queries

Building Construction

“ The ” Athenaeum

How Tobacco Smoke Causes
Disease

**This report considers the
biological and behavioral**

Page 65/91

mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in

epidemiologic studies.

Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation.

This report specifically reviews

the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to

understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

These Study Guides have been

**developed exclusively with the
Caribbean Examinations Council
(CXC(r)) to be used as an
additional resource by candidates
who are following the Caribbean
Secondary Education Certificate
(CSEC(r)) programme. They**

provide candidates with extra support to help them maximise their performance in their examinations.

This text has been designed to assist students who are studying building construction and

technology as part of their technical education. It has been specially prepared to match the typical syllabuses found in senior secondary schools and colleges where technical and vocational studies form part of the
