*This book constitutes the proceedings of the 19th China National Conference on Computational Linguistics, CCL 2020, held in Hainan, China, in October/November 2020. The 32 full and 2 short papers presented in this volume were carefully reviewed and selected from 99 submissions. They were organized in topical sections named: fundamental theory and methods of computational linguistics; information retrieval, dialogue and question answering; text generation and summarization; knowledge graph and information extraction; machine translation and multilingual information processing; minority language information processing; language resource and evaluation; social computing and sentiment analysis; and NLP applications. The 2011 ASHRAE Handbook: HVAC Applications comprises over 60 chapters covering a broad range of facilities and topics, and is written to help engineers design and use equipment and systems described in other Handbook volumes. ASHRAE Technical Committees have revised nearly every chapter to cover current requirements, technology, and design practice. An accompanying CD-ROM contains all the volume's chapters in both I-P and SI units. This first book in Castells' groundbreaking trilogy, with a substantial new preface, highlights the economic and social dynamics of the information age and shows how the network society has now fully risen on a global scale. Groundbreaking volume on the impact of the age of information on all aspects of society Includes coverage of the influence of the internet and the net-economy Describes the accelerating pace of innovation and social transformation Based on research in the USA, Asia, Latin America, and Europe In this new and expanded edition of Chossudovskys international best-seller, the author outlines the contours of a New World Order which feeds on human poverty and the destruction of the environment, generates social apartheid, encourages racism and ethnic strife and undermines the rights of women. The result as his detailed examples from all parts of the world show so convincingly, is a globalisation of poverty. This book is a skilful combination of lucid explanation and cogently argued critique of the fundamental directions in which our world is moving financially and economically. In this new enlarged edition -- which includes ten new chapters and a new introduction -- the author reviews the causes and consequences of famine in Sub-Saharan Africa, the dramatic meltdown of financial markets, the demise of State social programs and the devastation resulting from corporate downsizing and trade liberalisation. The book has been published in 11 languages. Over 100,000 copies sold world-wide.*

Deluxe edition with special embellishments on first printing only. From New York Times bestselling author of The Wicked Deep comes a haunting romance perfect for fans of Practical Magic, where dark fairy tales and enchanted folklore collide after a boy, believed to be missing, emerges from the magical woods—and falls in love with the witch determined to unravel his secrets. Be careful of the dark, dark wood... Especially the woods surrounding the town of Fir Haven. Some say these woods are magical. Haunted, even. Rumored to be a witch, only Nora Walker knows the truth. She and the Walker women before her have always shared a special connection with the woods. And it’s this special connection that leads Nora to Oliver Huntsman—the same boy who disappeared from the Camp for Wayward Boys weeks ago—and in the middle of the worst snowstorm in years. He should be dead, but here he is alive, and left in the woods with no memory of the time he’d been missing. But Nora can feel an uneasy shift in the woods at Oliver’s presence. And it’s not too long after that Nora realizes she has no choice but to unearth the truth behind how the boy she has come to care so deeply about survived his time in the forest, and what led him there in the first place. What Nora doesn’t know, though, is that Oliver has secrets of his own—secrets he’ll do anything to keep buried, because as it turns out, he wasn’t the only one to have gone missing on that fateful night all those weeks ago. For as long as there have been fairy tales, we have been warned to fear what lies within the dark, dark woods and in Winterwood, New York Times bestselling author Shea Ernshaw, shows us why.

*S,M,L,XL presents a selection of the remarkable visionary design work produced by the Dutch firm Office for Metropolitan Architecture (O.M.A.) and its acclaimed founder, Rem Koolhaas, in its first twenty years, along with a variety of insightful, often poetic writings. The inventive collaboration between Koolhaas and designer Bruce Mau is a graphic overture that weaves together architectural projects, photos and sketches, diary excerpts, personal travelogues, fairy tales, and fables, as well as critical essays on contemporary architecture and society. The book's title is also its framework: projects and essays are arranged according to scale. While Small and Medium address issues ranging from the domestic to the public, Large focuses on what Koolhaas calls "the architecture of Bigness." Extra-Large features projects at the urban scale, along with the important essay "What Ever Happened to Urbanism?" and other studies of the contemporary city. Running throughout the book is a "dictionary" of an adventurous new Koolhaasian language -- definitions, commentaries, and quotes from hundreds of literary, cultural, artistic, and architectural sources.*

*The People's Covenant and God's Hammer have raged a Cold War that has lasted for over twenty years. A war without armies, where battles are fought in the dark and information is the most dangerous weapon. In this world -which sometimes seems the Middle Ages, sometimes the Renaissance and sometimes the Nineteenth Century- lives Yáxtor Brandan, empirical adept at the service of the Queen of Alboné. A relentless, amoral and unscrupulous character, Yáxtor fights to recover his own past as he tries to prevent a new player in the espionage game to end the world, as he knows it. A fascinating fast-moving and complex plot, full of tension and surprises and excellently paced; a main character for whom it should be impossible to feel the slightest sympathy, and yet somehow we do, even as his cruelty disturbs us more and more -an extremely difficult feat to pull off so successfully; powerful secondary actors, who either leave you with a sense of uneasiness with regard to their motivations and loyalties, or make you want to shout out -as people did in the early days of cinema- "Look out, don't trust him!"; and a pervading atmosphere of tragedy, especially in a final unexpected and shocking, yet on reflection almost inevitable, scene. In short, a totally addictive and highly original novel set in a world that is at once both strangely familiar and disturbingly alien. -Steve Redwood, author of Fisher of Devils.*

*After her nightmarish recovery from a serious car accident, Faye gets horrible news from her doctor, and it hits her hard like a rock: she can't bear children. In extreme shock, she breaks off her engagement, leaves her job and confines herself in her family home. One day, she meets her brother's best friend , and her soul makes a first step to healing.*

*C. Douglas Lummis writes as if he were talking with intelligent friends rather than articulating political theory. He reminds us that democracy literally means a political state in which the people (demos) have the power (kratia). The people referred to are not people of a certain class or gender or color. They are, in fact, the poorest and largest body of citizens. Democracy is and always has been the most radical proposal, and constitutes a critique of every sort of centralized power. Lummis distinguishes true democracy from the inequitable incarnations referred to in contemporary liberal usage. He weaves commentary on classic texts with personal anecdotes and reflections on current events. Writing from Japan and drawing on his own experience in the Philippines at the height of People's Power, Lummis brings a cross-cultural perspective to issues such as economic development and popular mobilization. He warns against the fallacy of associating free markets or the current world economic order with democracy and argues for transborder democratic action. Rejecting the ways in which technology imposes its own needs, Lummis asks what work would look like in a truly democratic society. He urges us to remember that democracy should mean a fundamental stance toward the world and toward one's fellow human beings. So understood, it offers an effective cure for what he terms "the social disease called political cynicism." Feisty and provocative, Radical Democracy is sure to inspire debate.*

*Starting with the publication of their seminal bestseller, Future Shock, Alvin and Heidi Toffler have given millions of readers new ways to think about personal life in today's high-speed world with its constantly changing, seemingly random impacts on our businesses, governments, families and daily lives. Now, writing with the same rare grasp and clarity that made their earlier books classics, the Tofflers turn their attention to the revolution in wealth now sweeping the planet. And once again, they provide a penetrating, coherent way to make sense of the seemingly senseless.Revolutionary Wealth is about how tomorrow's wealth will be created, and who will get it and how. But twenty-first-century wealth, according to the Tofflers, is not just about money, and cannot be understood in terms of industrial-age economics. Thus they write here about everything from education and child rearing to Hollywood and China, from everyday truth and misconceptions to what they call our "third job"—the unnoticed work we do without pay for some of the biggest corporations in our country. They show the hidden connections between extreme sports, chocolate chip cookies, Linux software and the "surplus complexity" in our lives as society wobbles back and forth between depressing decadence and a hopeful post-decadence. In their earlier work, the Tofflers coined the word "prosumer" for people who consume what they themselves produce. In Revolutionary Wealth they expand the concept to reveal how many of our activities—whether parenting or volunteering, blogging, painting our house, improving our diet, organizing a neighborhood council or even "mashing" music—pump "free lunch" from the "hidden" non-money economy into the money economy that economists track. Prosuming, they forecast, is about to explode and compel radical changes in the way we measure, make and manipulate wealth. Blazing with fresh ideas, Revolutionary Wealth provides readers with powerful new tools for thinking about—and preparing for—their future.*

*Born in the Italian city of Naples, Giuseppe Domenico Scarlatti (1685-1757) was one of the few Baroque composers to transition into the Classical period. Scarlatti composed operas, cantatas, symphonias and liturgical pieces, but his 555 keyboard sonatas are most well-known; a vast collection of single movements in binary form. Lily Afshar's arrangement of Sonata K. 11 (a favorite of Segovia) utilizes staccato articulation reminiscent of the harpsichord and other techniques including cross-string trills and minimal slurs. The pair of sonatas work well together, written in E minor and E major. Sylvius Leopold Weiss (1687-1750) was the most accomplished lutenist of theBaroque period and the most prolific composer of lute music, writing over one thousand pieces for the instrument. The four pieces arranged in this book show the beautiful polyphony and fantastical writing of Weiss. Afshar utilizes campanella (cross-*

"Daemon in the Sanctuary"explores the uncanny contradiction between the phenomenological experience of home as a site of nurture and security and the empirical reality that people are far more likely to be hurt and even killed in their own homes by their intimates, rather than at the hands of strangers. Moving from the syrupy tributes of the god of love in Plato's "Symposium"to the subject of domestic violence appears to be a giant leap, but he author shows that embroidered romantic ideas about love prepare the initiate poorly for the reality of intimate connection. Poets and philosophers who lead us to believe that love is heaven sent can leave us craving an extreme experience. We crave an earth-shaking, life-altering intrusion on our tranquility as evidence that love is real. Thus the naive initiate can easily mistake the flutter of the pulse, the quickening of the heart rate, the flush, the confused emotions, and the painful longing as signs of the god's gift. But these are also the signs of fear! Wendy C. Hamblet, a philosopher in the phenomenological lineage, examines the truth value of phenomenological experience, through the lens of the problem of intimate violence. If Husserl is right and phenomenological method provides the ground of all empirical truth, then what is to be made of the fundamental contradiction between the lived experience of home as a site of nurture and security and of intimates as guardians and caretakers, and the empirical fact, evident in every human society, that people are far more likely to be harmed, and even killed, in their homes or in the homes of their intimates and at the hands of those charged with their care? Hamblet carefully choreographs a dance between the two opposing 'truths' to expose how the lived sense of home, colored by ideals, can tint people's expectations about intimate connection and cloud their ability to recognize the signs of intimate abuse. This book illuminates the dangers and pitfalls of unhealthy intimacy and offers a regimen for loosening the grip of a sickened love's pathological hold.
