This must-read for lovers of Stephen King's The Shining will leave readers breathless as Seda and her family find themselves at the mercy of a murderer in an isolated and snowbound hotel. Get ready for what Kirkus calls "A bloody, wonderfully creepy scare ride." When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though

Since 1958 the Maritime Administration has continuously conducted instructions in use of

collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Part green-lifestyle guide, part popular science, How Bad Are Bananas? is the first book to

provide the information we need to make carbon-savvy purchases and informed lifestyle choices and to build carbon considerations into our everyday thinking. The book puts our decisions into perspective with entries for the big things (the World Cup, volcanic eruptions, the Iraq war) as well as the small (email, ironing, a glass of beer). And it covers the range from birth (the carbon footprint of having a child) to death (the carbon impact of cremation). Packed full of surprises — a plastic bag has the smallest footprint of any item listed, while a block of cheese is bad news — the book continuously informs, delights, and engages the reader. Solidly researched and referenced, the easily digestible figures, statistics, charts, and graphs (including a section on the carbon footprint of various foods) will encourage discussion and help people to make up their own minds about their consumer choices.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

The "Dual System" Revisited

The book offers historical and political explanations, a criticism of neoclassical and "common sense" models in comparative vocational education research, and an inspection of structures, institutions and "boosters" of the "dual system's" performance. The question, why German companies and private sector institutions "participate" not only in training but also in training design, targets a very clear behavioural difference between German entrepreneurs and the entrepreneurs of many other countries. It is largely a question concerning the social forces which have a decisive say in design, supervision and implementation of training. Klaus Schaack, economist, born 1947, has been working in the field of technical and vocational education and training (TVET) and international TVET cooperation for several German and foreign organizations since 1980. For ten years he has been TVET adviser to the Laotian Ministry of Education, to the South Korean Ministry of Labour and several Korean training agencies including the HRD Service of Korea, the Korea Foundation of Polytechnic Colleges (KOPO) and the Korea Chamber of Commerce and Industry (KCCI).

The Asian Development Bank, along with the people and institutions of Asia and the Pacific and the rest of the world, believes in the strength of partnerships and collective action. At the core of this belief is a desire to initiate and develop partnerships that will help governments address health care needs of growing populations, particularly women and children.

Public-private partnerships (PPPs) have evolved from this need to relate to one another and work together. Governments recognize that they cannot do the job alone, particularly in the health sector where new disease patterns and the impact of climate change demand innovative solutions, such as PPP in health programs and enterprises. This guidebook offers readers a guide for the development of a PPP in pharmacy services through six simple, customizable steps. It looks at pharmacy services as an important component of a well-rounded health care and hospital systems. Through sustainable PPP in pharmacy services, people will have access to safe, effective, and affordable medicines.

It hasn't taken Web developers long to discover that when it comes to creating dynamic, database-driven Web sites, MySQL and PHP provide a winning open source combination. Add this book to the mix, and

there's no limit to the powerful, interactive Web sites that developers can create. With step-by-step instructions, complete scripts, and expert tips to guide readers, veteran author and database designer Larry Ullman gets right down to business: After grounding readers with separate discussions of first the scripting language (PHP) and then the database program (MySQL), he goes on to cover security, sessions and cookies, and using additional Web tools, with several sections devoted to creating sample applications. This guide is indispensable for intermediate- to advanced level Web designers who want to replace their static sites with something dynamic. In this edition, the bulk of the new material covers the latest versions of both technologies: PHP 6 (due out in 2008) and MySQL 5 (available now). The book's publication date is likely to beat the official release of PHP 6, making it one of the first books available on the subject.

China is certainly doing its best to keep the world mesmerized by its economic achievements. The Chinese economic growth story that begun 30 years ago has in terms of dynamics and duration long since surpassed all those “economic miracles” which have brought Germany, Japan, and the South East Asian Tigers into the top – league of the industrialized world. The rapid expansion of the Chinese economy has gone along with a fledged re-integration of China into the global economic system. In the course of the last 30 years China has become a major player in the global economy and today is on a trajectory towards even greater prominence. In recent years, the Chinese economy seems to have reached an important threshold line of economic development and global integration. In the first quarter century of reform and global opening, Chinese enterprises have been largely confined to a ‘passive’ role in the global division of labor. Foreign enterprises as the proprietors of

greatly superior business models, production technologies, management models as well as very competitively established brands have been integrating Chinese players in their value chains and global operations. Lacking the necessary production technologies, products as well as marketing knowledge to successfully - dress OECD-consumers, Chinese enterprises have been hardly able to - ter the global markets without such guidance. Now, this constellation is changing.

"Drawing on examples from nine countries across five continents, this book offers anyone interested in the future of higher education the opportunity to understand how communities become marginalised and how this impacts on their access to learning

and their ability to thrive as students. Focusing on groups that suffer directly through discriminatory practices or indirectly through distinct forms of sociocultural disadvantage, this book brings to light communities about which little has been written and where research efforts are in their relative infancy. Each chapter documents the experiences of a group and provides insights that have a wider reach and gives voice to those that are often unheard. The book concludes with a new conceptualisation of the social forces that lead to marginalisation in higher education. This cutting-edge book is a must read for higher education researchers, policy makers, and students interested in access to education, sociology of education, development studies, and cultural studies"--

Althusser and Law is the first book specifically dedicated to the place of law in Louis Althusser's philosophy. The growing importance of Althusser's philosophy in contemporary debates on the left has - for practical and political, as well theoretical reasons - made a sustained consideration of his conception of law more necessary than ever. As a form of what Althusser called 'Ideological State Apparatuses', law is at the forefront of political struggles: from the destruction of Labour Law to the exploitation of Patent Law; from the privatisation of Public Law to the ongoing hegemony of

Commercial Law; and from the discourse on Human Rights to the practice of judicial courts. Is Althusser still useful in helping us to understand these struggles? Does he have something to teach us about how law is produced, and how it is used and misused? This collection demonstrates that Althusser's ideas about law are more important, and more contemporary, than ever. Indeed, the contributors to Althusser and Law argue that Althusser offers a new and invaluable perspective on the place of law in contemporary life.
