The language C is often described as a middle-level language that permits programs to be written in much the same style as that of modern high-level languages such as FORTRAN, COBOL, BASIC and PASCAL. In *The Spirit of C* you will know the essentials of this modern language. The book does not expect any programming experience or mathematical expertise from the readers. It provides simple illustrated programs, followed by a list of questions and answers based on text to acquaint the readers with the structure of C language.
