Buckle your seat belts. Sports Illustrated Kids is bringing you along for a wild ride in Wheels 3D. Created by David E. Klutho, the noted photographer who brought you 3D Sports Blast and Zoo 3D, this new book is filled with every kind of vehicle - photographed with the latest eye-popping 3D technology. Get up close to everything on wheels, from Monster Trucks to fun miniature models, roaring motorcycles to muddied BMX bikes. With vehicles accelerating off the page, this is a must-have book for any kid who loves sweet rides.

In a die-cut shaped board book that features rolling plastic wheels, very small children are introduced to a variety of mighty trucks that can be seen everyday in a neighborhood, including a helpful fire truck.

In second grade, Mrs. Poole asks our narrator to show the new girl around school. Imagine the surprise when our narrator first meets Sarah—Sarah uses a wheelchair! For a moment, our narrator feels awkward.

The majestic high-wheel bicycle, with its spider wheels and rubber tires, emerged in the mid-1870s as the standard bicycle. A common misconception is that, bound by Victorian dress and decorum, women were unable to ride it, only taking up cycling in the 1880s with the advent of the chain-driven safety bicycle. On the contrary, women had been riding and even racing some form of the bicycle since the first vélocipèdes appeared in Europe early in the nineteenth century. Challenging the understanding that bicycling was a purely masculine sport, Muscle on Wheels tells the story of women's high-wheel racing in North America in the 1880s and early 1890s, with a focus on a particular cyclist: Louise Armaindo (1857–1900). Among Canada's first women professional athletes and the first woman who was truly successful as a high-wheel racer, Armaindo began her career as a strongwoman and trapeze artist in Chicago in the 1870s before discovering high-wheel bicycle racing. Initially she competed against men, but as more women took up the sport, she raced them too. Although Armaindo is the star of Muscle on Wheels, the book is also about other women cyclists and the many men – racers, managers, trainers, agents, bookmakers, sport administrators, and editors of influential cycling magazines – who controlled the sport, especially in the United States. The story of working-class Victorian women who earned a living through their athletic talent, Muscle on Wheels showcases an exciting moment in women's and athletic history that is often forgotten or misconstrued.

The Car That Put the World on Wheels

Examines the impact of the automobile on American society since the end of World War Two in the areas of mass transit, development of the United Auto Workers, rise of suburbia, auto racing, and the automobile's relationship to the youth culture.

Inspired by Thoreau, Ilgunas set out on a Spartan path to pay off \$32,000 in undergraduate student loans by scrubbing toilets and making beds in Coldfoot, Alaska. Determined to graduate debt-free after enrolling in graduate school, he lived in an Econoline van in a campus parking lot, saving—and learning—much about the cost of education today.

Hector and his best friend Mondo enjoy many exciting adventures when they take a six-day bike trip from their East Los Angeles neighborhood to the Santa Monica beach during summer vacation.

Experience the thrilling world of Japanese cycling and the keirin, which has evolved from post-war oddity to one of Japan's most popular and lucrative sporting events—and a must-see for the upcoming Olympics in Tokyo. The Keirin, which means "war on wheels," is now a high profile Olympic sport and attracts millions of spectators. But its origins are humble, even strange. Like the Tour de France was originally conceived to sell newspapers, the keirin was invented in post-war Japan as a way to raise taxes on gambling. Now, over \$12 billion a year is wagered on it, and its stars are primed to millions. Unlike a traditional race, a pacemaker leads eight riders up to speeds of 70kph on huge concrete velodromes, then they fight to cross the line first, with riders pushing, shoving, and crashing in the final stretch. Long associated with the working class, even the notorious yakuza crime syndicates, riders today live in blacked-out dorms, with no access to technology, to prevent bet-rigging. Their lives are ruled by ritual and competition, from their rookie days at the Mt. Fuji training camp to elite competitions that are the Japanese equivalent of the Grand National. Foreign riders sometimes compete, but rarely prosper in this intense environment, and the Olympic version is a mere child's play to the fierce environs of the velodromes in Tokyo. and Osaka, where a spectre of danger still looms. The War on Wheels explores a side of Japan we rarely see and it's uniquely fascinating sporting culture.*

Learning to ride a bike is easy, but getting back on one if you're over the age of 12 - and have developed a penchant for high heels - can be a daunting task. In Heels on Wheels Katie Dailey offers sage advice to the modern gal who would like to get back in the saddle after a short (or very long) hiatus. Find out how to choose your trusty steed, stay safe on the road, Fix a puncture and select the best lock for your bicycle. As well as this, more pressing issues are covered, including how to combat helmet hair, wearing a skirt without losing your dignity, and all the exciting things you can buy to pimp your ride. So whether you plan on being a weekend cruiser, or a riding-in-all-elements fanatic, Heels on Wheels will make you fall in love with cycling all over again.

An acrobatic act begins with one bear on a unicycle and ends with twenty-one bears and sixteen wheels flying through the air.

Fire Rescue : Book on Wheel

*Michael Holroyd confronts an army of automobiles in this charming book. Weaving together memoir and historical anecdote, he traces his relationship with cars through a lifetime of biography. Learning to drive was no easy matter for Michael: the lessons required military precision when practising how to get in and out of his car correctly. His biographical subjects also had their difficulties: Bernard Shaw drove with reckless gusto when overtaking his eightieth year; Vita Sackville-West's car became a chamber for sudden romantic assignations and getaways; while Augustus John and his family careered through vulnerable villages as the poor vehicle, piled high with bohemian friends, stuttered and jerked along in first gear. Wry, thoughtful and very funny, On Wheels is an elegy to the glamour of the car. Subtle and perceptive, Michael Holroyd finds surprising ways to understand the past and challenge our view of the future.*

*A lively rhyming story--starring Dr. Ruth and her grandchildren--that celebrates the special bond between children and their grandparents. The story of Ford Motor Company's Model T is the story that launched the American automobile industry--and America's love affair with the car. When he introduced the Model T in 1908, even an eternal optimist like Henry Ford could not have predicted the far-reaching changes he was setting in motion. One hundred years later, this illustrated history looks back at the beloved Tin Lizzie. The book follows the Model T from design considerations (its ground clearance, for instance, had to allow for the abysmal state of U.S. roadways at the time) to its lasting legacy, and along the way describes the mechanical, manufacturing, and marketing innovations that the car's production entailed. Author Lindsay Brooke also relates the adventures and misadventures that were part of owning and driving a Model T. He chronicles the changes the car's unprecedented popularity wrought in the auto industry (including Ford's introduction of the "\$5 day"), and he tracks the Model T through popular culture, from its role in early motorsports to its resurgent popularity in the 1950s and 60s as a platform for T-bucket hot*

*Long hours, low wages, and unsafe workplaces characterized sweatshops a hundred years ago. These same conditions plague American trucking today. Sweatshops on Wheels: Winners and Losers in Trucking Deregulation exposes the dark side of government deregulation in America's interstate trucking industry. In the years since deregulation in 1980, median earnings have dropped 30% and most long-haul truckers earn less than half of pre-regulation wages. Work weeks average more than sixty hours. Today, America's long-haul truckers are working harder and earning less than at any time during the last four decades. Written by a former long-haul trucker who now teaches industrial relations at Wayne State University, Sweatshops on Wheels raises crucial questions about the legacy of trucking deregulation in America and casts provocative new light on the issue of government deregulation in general.*

If you can't bring the man to the books, bring the books to the man. Mary Lemist Titcomb (1852-1932) was always looking for ways to improve her library. As librarian at the Washington County Free Library in Maryland, Titcomb was concerned that the library was not reaching all the people it could. She was determined that everyone should have access to the library-not just adults and those who lived in town. Realizing its limitations and inability to reach the county's 25,000 rural residents, including farmers and their families, Titcomb set about to change the library system forever with the introduction of book-deposit stations throughout the country, a children's room in the library, and her most revolutionary idea of all-a horse-drawn Book Wagon. Soon book wagons were appearing in other parts of the country, and by 1922, the book wagon idea had received widespread support. The bookmobile was born!

In 1976 Gelya Frank began writing about the life of Diane DeVries, a woman born with all the physical and mental equipment she would need to live in our society--except arms and legs. Frank was 28 years old, DeVries 26. This remarkable book--by turns moving, funny, and revelatory--records the relationship that developed between the women over the next twenty years. An empathic listener and participant in DeVries's life, and a scholar of the feminist and disability rights movements, Frank argues that Diane DeVries is a perfect example of an American woman coming of age in the second half of the twentieth century. By addressing the dynamics of power in ethnographic representation, Frank--anthropology's leading expert on life history and life story methods--lays the critical groundwork for a new genre, "cultural biography." Challenged to examine the cultural sources of her initial image of DeVries as limited and flawed, Frank discovers that DeVries is gutsy, buoyant, sexy--and definitely not a victim. While she analyzes the portrayal of women with disabilities in popular culture--from limbless circus performers to suicidal heroines on the TV news--Frank's encounters with DeVries lead her to come to terms with her own "invisible disabilities" motivating the study. Drawing on anthropology, philosophy, psychoanalysis, narrative theory, law, and the history of medicine, Venus on Wheels is an intellectual tour de force.

*"Parnassus on Wheels" (1917) was Christopher Morley's first published novel. It tells the story of Roger Mifflin, who sells his travelling book business to 39-year-old Helen McGill. The latter is tired of taking care of her ailing older brother Andrew, a businessman, farmer, and author. The novel is told from the perspective of Mrs McGill and was in part inspired by David Grayson's novel "The Friendly Road." Morley wrote a sequel to this story called "The Haunted Bookshop." Christopher Morley (1890–1957) was an American author, poet and journalist from Pennsylvania. His father was a mathematics professor and his mother a violinist. The family moved to Baltimore, Maryland, in 1900 and he later studied modern history at Oxford. After getting his degree, he moved back to America and married Helen Booth Fairchild, with whom he had four children. Morley was a prolific writer and is remembered for novels such as "Parnassus on Wheels" (1917), "The Haunted Bookshop" (1918), "Thunder on the Left" (1925), and "Kitty Foyle" (1939).*

A few years ago, the closest Mike Magnuson thought he would get to participating in a sporting event was sitting in the local bar, slamming pitchers of beer and watching the NFL playoffs on TV. He was thirty-eight years old, smoked a pack a day, drank a case or two of beer a week, and carried 250 pounds of weight on his five-foot-ten-inch frame. Getting on a bicycle for a peddle around the block could have been dangerous in his condition, let alone trying to keep up with a group of racer-fit riders for forty-five miles at a clip, but that is just what Mike decided to do. He was sick of it all—the booze, the cigarettes, and the heft. He could have been seriously hurt. But he wasn't. In Mike's words, he was merely "handed his proverbial fat ass on a platter" three times a week and kept coming back for more. Heft on Wheels charts in hilarious detail every curve in Mike Magnuson's 180-degree journey from the big guy at the back of the pack to the lean, mean racing machine setting the pace for the group. Along the way we meet his friends, colleagues, and family and learn how even a healthy obsession can have its uphill climbs. For a start there's the starvation diet and the nicotine patches, not to mention the skin-tight XXL cycling outfit and the insanely unrealistic goal of completing the Bridge to Bridge Incredible Cycling Challenge—proudly billed as "100 Miles of Pure Hill"—within the year. Yet, through it all, Mike never loses his sense of humor (though after having a quick conversation with God on one particularly grueling hill, he does believe he has come within spitting distance of losing his mind). Filled with triumph, heartbreak, and hilarity, Heft on Wheels is an unforgettable book about getting from one place to another, in more ways than one.

Overnight settlements, better known as "Hell on Wheels," sprang up as the transcontinental railroad crossed Nebraska and Wyoming. They brought opportunity not only for legitimate business but also for gamblers, land speculators, prostitutes, and thugs. Dick Kreck tells their stories along with the heroic individuals who managed, finally, to create permanent towns in the interior West.
