The Federal Trade Commission receives more complaints about rogue debt collecting than about any activity besides identity theft. Dramatically and entertainingly, Bad Paper reveals why. It tells the story of Aaron Siegel, a former banking executive, and Brandon Wilson, a former armed robber, who become partners and go in quest of "pape pennies on the dollar. As Aaron and Brandon learn, the world of consumer debt collection is an unregulated shadowland where operators often make unwarranted threats and even collect debts that are not theirs. Introducing an unforgettable cast of strivers and rogues, Jake Halpern chronicles their lives as they manage high-pressure call centers in parked cars to sell the social security numbers and account information of unsuspecting consumers. He also tracks a "package" of debt that is stolen by unscrupulous collectors, leading to a dramatic showdown with guns in a Buffalo corner store. Along the way, he reveals the human cost of a system that compounds the troubles of his former customers. The result is a vital exposé that is also a bravura feat of storytelling.

Beating the College Debt Trap presents students with a better way to do college. The radically counter-cultural truth is that students don't have to be totally dependent on Mom, Dad, or Uncle Sam to get the most out of college. Graduation on a solid financial foundation is possible. But it will require intentionality, creativity, hard work, and a willingness to delay gratification. How do you get work and make money during the college years, pay off any loans quickly, spend less, save more, and stay out of debt for good. He also unpacks how to transition from college into career, honor God while achieving financial independence, and use your finances to make a positive, eternally-significant difference in the lives of others. As a young engineer, I know how hard money management, Chediak has become particularly concerned with the financial health of young adults, especially in light of the ever increasing costs of college. In Beating the College Debt Trap he helps do something about this problem. He engages, in a friendly manner, the "real world" financial issues that 17-25 year olds face, with clarity, practical help, lots of examples, and a sense of humor. He conveys conveying a distinctly Christian perspective.

Two of the world's leading experts explain the vital link between health and wealth that could add years to your life and dollars to your retirement savings. All the money in the world doesn't mean a thing if we can't get out of bed. And the healthiest body in the world won't stay that way if we're frazzled about five figures worth of debt. Today Show financial expert Dr. Michael Roizen and wellness officer Dr. Michael Roizen explain the vital connection between health and wealth--giving readers all the tactics, strategies, and know-how to live longer, healthier, more lucrative lives. The same principles that allow us to achieve a better body will allow us to do the same for our investment portfolio. For instance, physical and financial stability comes down to the same thing: we burn more calories than we ingest? Likewise, are we making more money than we spend? The authors detail scientific ways to improve our behavior so that the answers tilt in the readers' favor. They also offer ways to beat the system by automating how we do things and limiting our decisions in the face of too much food or too much debt. Chatzky and Roizen discuss the importance and biological strength with action steps to get you there.

With boundless erudition and in delightfully clear prose, Surowiecki ranges across fields as diverse as popular culture, psychology, ant biology, behavioral economics, artificial intelligence, military history, and politics to show how this simple idea offers important lessons for how we live our lives, select our leaders, run our companies, and think about our world.

It's natural to want your kids to have a secure future. But when it comes to teaching the next generation how to handle money, parents are failing. Still there is hope! From preschool through the teen years, every stage of a child's development is covered, including how to talk to them about money, how to help them start saving money and giving it away, and how to manage money wisely.

Dave Ramsey explains those scriptural guidelines for handling money.

Economic history states that money replaced a bartering system, yet there isn't any evidence to support this axiom. Anthropologist Graeber presents a stunning reversal of this conventional wisdom. For more than 5000 years, humans have used elaborate credit systems to buy and sell goods. Since the beginning of the agrarian empires, humans have been divided into debtors and creditors. Through time, virtual credit money was replaced by gold and the system as a whole went into decline. This fascinating history is told for the first time.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The consumer credit industry wants us to believe that debt is necessary to bridge the gap between our pitiful incomes and the lifestyles we desire. But the problem is not that we don't have enough money. It's that we don't know how to manage the money we already have. And until we learn that, more money will never be enough. In this life-changing book, Mary Hunt shows you how to live a rich, fulfilling life without any consumer debt. By applying her simple principles and specific methods, you will learn how to effectively manage and maximize the money you have. No more guessing, wondering, or worrying. Just peace and a more abundant life. What have you got to lose?

The global economy has experienced four waves of rapid debt accumulation over the past 50 years. The first three debt waves ended with financial crises in many emerging market and developing economies. During the current wave, which started in 2010, the increase in debt in these economies has already been larger, faster, and broader-based than in the previous three waves. Current low interest rates mitigate some of the risks associated with high debt. However, emerging market and developing economies are also confronted by weak growth prospects, mounting vulnerabilities, and elevated global risks. A menu of policy options is available to reduce the likelihood that the current debt wave will end in crisis and, if crises do take place, will alleviate their impact.

Struggling with debt? Get realistic help that's actually useful, from Liz Weston, one of the most popular and respected personal finance experts! Today, people struggling with debt have far fewer options: lenders are stingier, which makes it harder to avert disaster, or to recover from setbacks like foreclosure, short sales, or bankruptcy. (Meanwhile, people with good credit have more options than ever, including some of the lowest interest rates in decades.) You need an up-to-date guide that can help you assess options, find help, discover opportunities, and take action that works. Liz Weston's Deal with Your Debt, Updated and Revised Edition is that guide. Weston reveals why most "conventional wisdom" about debt is just dead wrong. For most people, it's simply impractical to pay off every dime of debt, and live forever debt free. In fact, doing that can leave you a lot poorer in the long run. You're more likely to give up, or pay off the wrong debts. You could leave yourself too little flexibility to survive a financial crisis. You could neglect saving for retirement. You might even wind up in bankruptcy -- just what you're trying to avoid! For most people, it's smarter to control and manage debt effectively. In this extensively updated guide, Weston shows how to do that. You'll learn which debts can actually help build wealth over time, and which are simply toxic. You'll find up-to-date, real-world strategies for assessing and paying off debt, money-saving insights on which debts to tackle first, and crucial information about everything from debt consolidation loans to credit scores and credit counseling. Weston offers practical guidelines for assessing how much debt is safe -- and compassionate, realistic guidance if you've gone beyond the safety zone. If you've ever worried about debt, you'll find the new edition of Deal with Your Debt absolutely indispensable.

Too many women feel like they lack the know-how to take control of their financial lives. And Hunt is here to help women develop a confident, capable attitude toward money so that they can take control of their finances. Using the lessons she's learned from her own hard-fought battle with debt, Hunt empowers women to develop nine essential money habits, including giving, saving, investing, rejecting unsecured debt, preparing for emergencies, getting what you pay for, and more. She also includes a six-week action plan to help women get started right away.
