The origins of learner corpus research go back to the late 1980s when large electronic collections of written or spoken data started to be collected from foreign/second language learners, with a view to advancing our understanding of the mechanisms of second language acquisition and developing tailor-made pedagogical tools. Engaging with the interdisciplinary nature of this fast-growing field, The Cambridge Handbook of Learner Corpus Research explores the

In URIEL'S MACHINE Knight & Lomas offer powerful new evidence that our planet was hit by seven mountain-sized lumps of comet, creating a series of giant waves that ripped across the globe. Putting together the latest findings of leading geologists with their own sensational new archaeological discoveries, they show how a civilisation emerged and was able to build an international network of

powerful, sustainable improvements in business performance. But delivering great designs is not easy. Many companies accomplish it once, or twice; few do it consistently. The secret: building a truly design-driven business, in which design is central to everything you do. *Do You Matter?* shows how to do precisely that. Legendary industrial designer Robert Brunner (who laid the groundwork for Apple's brilliant design language) and Stewart Emery (*Success Built to Last*) begin by

making an incontrovertible case for the power of design in making emotional connections, deepening relationships, and strengthening brands. You'll learn what it really means to be "design-driven" and how that translates into action at Nike, Apple, BMW and IKEA. You'll learn design-driven techniques for managing your entire experience chain; define effective design strategies and languages; and learn how to manage design from the top, encouraging "risky" design innovations that

lead to entirely new markets. The authors show how (and how not) to use research; how to extend design values into marketing, manufacturing, and beyond; and how to keep building on your progress, truly "baking" design into all your processes and culture.

The mission of the United States Air Force is to fly, fight, and win in air, space, and cyberspace. A crucial part of achieving that mission involves obtaining and maintaining superiority in the air

domain. That domain, defined for the first time in this publication, is the area, beginning at the Earth's surface, where the atmosphere has a major effect on the movement, maneuver, and employment of joint forces. Within that domain, forces exercise degrees of control or levels of influence, characterized as parity, superiority, or supremacy. The US has enjoyed at least air superiority in all conflicts since the Korean War. The US will probably retain that superiority in today's ongoing conflicts, but the prospect of near-peer competitors in the not-too-distant future raise the possibility of air parity - a condition in the air battle in which one force

does not have air superiority over others - or even conceding superiority to the adversary if Air Force forces are not properly employed.

The author of The Long Descent examines a solution for the troubles of our modern age: technical regression. To most people paying attention to the collision between industrial society and the hard limits of a finite planet, it's clear

Get Free Dell D630 Manual User Guide

that things are going very, very wrong. We no longer have unlimited time and resources to deal with the crises that define our future, and the options are limited to the tools we have on hand right now. This book is about one very powerful option: deliberate technological regression.

Technological regression isn't about "going back"—it's about using the past as a resource to meet the needs of the present. It starts from the recognition that older technologies generally use fewer resources and cost less than modern equivalents, and it embraces the heresy of technological choice—our ability to choose or refuse the technologies

pushed by corporate interests. People are already ditching smartphones and going back to “dumb phones” and land lines and e-book sales are declining while printed books rebound. Clear signs among many that blind faith in progress is faltering and opening up the possibility that the best way forward may well involve going back. A must-read for anyone willing to think the unthinkable and embrace the possibilities of a retro future. Praise for The Retro Future “Whether or not you accept John Michael Greer’s argument that a deindustrialized future is inevitable, you’ll appreciate his call for the freedom to select the best

From the introduction to the book Centred around the Early Psychosis Declaration (EPD), this book explores the declaration's five themes through contributions from a sizeable number of mental health practitioners, service-users and carers. It is designed to help those working with people experiencing psychosis

This publication, Army Techniques Publication ATP 3-21.8 Infantry Platoon and Squad April 2016, provides the doctrinal framework for all Infantry platoons and squads. It provides techniques for employment of Infantry platoons and squads in conducting decisive actions. The principle audiences for ATP 3-21.8 are commanders, staffs, and

leaders who are responsible for planning, preparing, executing, and assessing operations of the Infantry platoon and squad. It serves as an authoritative reference for personnel developing doctrine materiel and force structure, institutional and unit training, and standard operating procedures (SOPs) for Infantry platoon and squad operations. Army Techniques Publication (ATP) 3-21.8 encompasses techniques for the Infantry platoons and squads of the Infantry, Stryker, and Armored brigade combat teams (I, S, and

ABCTs). It replaces Field Manual (FM) 3-21.8, published in March 2007, Army Tactics Techniques, and Procedures (ATTP) 3-21.71, published in November 2010, and ATTP 3-21.9, published in December 2010. ATP 3-21.8 provides doctrinal guidance; describes relationships within the platoon and squad; defines organizational roles and functions, capabilities, limitations; and lay outs the responsibilities for platoons and squads during unified land operations. The Infantry platoon and squad is an all-

This requires bold, aggressive, resourceful, and adaptive leaders- leaders of character, competence and commitment - who are willing to accept known risks to accomplish the mission. Infantry leaders must use their initiative and make rapid decisions to take advantage of unexpected opportunities. This publication addresses the significant changes in

How Great Design Will Make People Love Your Company

Unstoppable is a word defined as "difficult or impossible to preclude or stop." As a human quality, it is something that we associate with people such as sports superstars, those who do whatever it takes to inspire others and lead teams to the greatest of victories.

Get Free Dell D630 Manual User Guide

Sometimes, an idea or person can become unstoppable.

Unstoppable, like Charles Lindbergh crossing the Atlantic in a solo flight when no one had thought it was possible, or track star Roger Bannister breaking the four-minute mile barrier. Not everyone can be an explorer or a great athlete, but anyone can be unstoppable in their chosen endeavors in life. If you are willing to possess an unwavering determination to succeed and a consistent willingness to learn and evolve, you can become unstoppable and triumph too. This book is about a personal struggle, one in which the author awoke from a coma after a terrible accident and faced a life of permanent paralysis. A long

battle of driven determination resulted in Yanni Raz regaining his health and becoming a self-made millionaire after migrating from his native Israel to the United States. Through careers as a musician, a Starbucks barista, a salesman, a real estate whiz, a professional poker player and a hard money lender, Yanni learned reliable principles and the skills necessary for success.

Unstoppable covers many topics including controlling your life, making the best decisions, creating new opportunities, properly assessing signals, expertly negotiating, and succeeding by storytelling across the media landscape. You'll learn about integrity in business, asset diversification, and many other

The clock is ticking, my friend's life is hanging on a thread and I, Aliyana Capello am the only one who can save him. But at what cost?
