The definitive story of a game so great, even the Cold War couldn't stop it Tetris is perhaps the most instantly recognizable, popular video game ever made. But how did an obscure Soviet programmer, working on frail, antiquated computers, create a product which has now earned nearly 1 billion in sales? How did a makeshift game turn into a worldwide sensation, which has been displayed at the Museum of Modern Art, inspired a big-budget sci-fi movie, and been played in outer space? A quiet but brilliant young man, Alexey Pajitnov had long nurtured a love for the obscure puzzle game pentominos, and became obsessed with turning it into a computer game. Little did he know that the project that he labored on alone, hour after hour, would soon become the most addictive game ever made. In this fast-paced business story, reporter Dan Ackerman reveals how Tetris became one of the world's first viral hits, passed from player to player, eventually breaking through the Iron Curtain into the West. British, American, and Japanese moguls waged a bitter fight over the rights, sending their fixers racing around the globe to secure backroom deals, while a secretive Soviet organization named ELORG chased down the game's growing global profits. The Tetris Effect is an homage to both creator and creation, and a must-read for anyone who's ever played the game—which is to say everyone.

At Any Cost unravels the twisted story of Rod Covlin, whose unrepentant greed drove him to an unspeakable act of murder and betrayal that rocked New York City. Wealthy, beautiful, and brilliant, Shele Danishefsky had fulfillment at her fingertips. Having conquered Wall Street, she was eager to build a family with her much younger husband, promising Ivy League graduate Rod Covlin. But when his hidden vices surfaced, marital harmony gave way to a merciless divorce. Rod had long depended on Shele's income to fund his tastes for high stakes backgammon and infidelity—and she finally vowed to sever him from her will. In late December 2009, Shele made an appointment with her lawyer to block him from her millions. She would never make it to that meeting. Two days later, on New Year's Eve, Shele was found dead in the bathtub of her Upper West Side apartment. Police ruled it an accident, and Shele's deeply Orthodox Jewish family quickly buried her without an autopsy on religious grounds. Rod had a clear path to his ex-wife's fortune, but suspicions about her death lingered. As the two families warred over custody of Shele's children—and their inheritance—Rod concocted a series of increasingly demented schemes, even plotting to kill his own parents, to secure the treasure. And as investigators closed in, Rod committed a final, desperate act to frame his own daughter for her mother's death. Journalists Rebecca Rosenberg and Selim Algar reconstruct the ten years that passed between the day Shele was found dead and the day her killer faced justice in this riveting account of how one man's irrepresible greed developed into obsession, manipulation, and murder.

The two volumes of The Oxford Handbook of Mobile Music Studies consolidate an area of scholarly inquiry that addresses how mechanical, electrical, and digital technologies and their corresponding economies of scale have rendered music and sound increasingly mobile-portable, fungible, and ubiquitous. At once a marketing term, a common mode of everyday-life performance, and an instigator of experimental aesthetics, "mobile music" opens up a space for studying the momentous transformations in the production, distribution, consumption, and experience of music and sound that took place between the late nineteenth and the early twenty-first centuries. Taken together, the two volumes cover a large swath of the world—the US, the UK, Japan, Brazil, Germany, Turkey, Mexico, France, China, Jamaica, Iraq, the Philippines, India, Sweden—and a similarly broad array of the musical and nonmusical sounds suffusing the soundscapes of mobility. Volume 2 investigates the ramifications of mobile music technologies on musical/sonic performance and aesthetics. Two core arguments are that "mobility" is not the same thing as actual "movement" and that artistic production cannot be absolutely sundered from the performances of quotidian life. The volume's chapters investigate the mobilization of frequency range by sirens and miniature speakers; sound vehicles such as boom cars, ice cream trucks, and trains; the gestural choreographies of soundwalk pieces and mundane interactions with digital media; dance music practices in laptop and iPod DJing; the imagery of iPod commercials; production practices in Turkish political music and black popular music; the aesthetics of handheld video games and chiptune music; and the mobile device as a new musical instrument and resource for musical ensembles.

'Reading Engberg feels like reading early Jo Nesbo, getting in on the ground of a major crime-writing career.' —The New York Times Book Review This third novel in the "thrilling, nerve-wracking" (Sheif Awareness) Korner and Werner series follows the two detectives as they search for a missing teenager and uncover the web of lies that has threatened his life—and may prevent him from ever being found. When fifteen-year-old Oscar Dreyer-Hoff disappears in this "masterpiece of Nordic noir" (Booklist, starred review), the police assume he's simply a runaway—a typically overlooked middle child doing what teenagers do all around the world. But his frantic family is certain that something terrible has happened. After all, what runaway would leave behind a note that reads: He looked around at saw the knife that had stabbed Basil Hallward. He had cleaned it many times, till there was no stain left upon it. It was bright and glistened. As it had killed the painter, so it would kill the painter's work, and all that that meant. It would kill the past, and when that was dead, he would be free. It's not much to go on, but it's all that detectives Jeppe Korner and Anette Werner have. And with every hour, as the odds of finding a missing person grow dimmer, it will have to be enough.

"Trenchant and intelligent." --The New York Times As seen/heard on NPR, New Yorker Radio Hour, The New York Book Review Podcast, PBS Newshour, CNBC, and more. A New York Times Book Review Editors' Choice A New York Times Notable Book of 2019 From a rising star at The New Yorker, a deeply immersive chronicle of how the optimistic entrepreneurs of Silicon Valley set out to create a free and democratic internet—and how the cynical propagandists of the alt-right exploited that freedom to propel the extreme into the mainstream. For several years, Andrew Marantz, a New Yorker staff writer, has been embedded in two worlds. The first is the world of social-media entrepreneurs, who, acting out of na i vete and reckless ambition, upended all traditional means of receiving and transmitting information. The second is the world of the people he calls "the gate crashers"—the conspiracists, white supremacists, and nihilist trolls who have become experts at using social media to advance their corrosive agenda. Antisocial ranges broadly—from the first mass-printed books to the trending hashtags of the present, from secret gatherings of neo-Fascists to the White House press briefing room—and traces how the unthinkable becomes thinkable, and then how it becomes reality. Combining the keen narrative detail of Bill Buford's Among the Thugs and the sweep of George Packer's The Unwinding, Antisocial reveals how the boundaries between technology, media, and politics have been erased, resulting in a deeply broken informational landscape—the landscape in which we all now live. Marantz shows how alienated young people are led down the rabbit hole of online radicalization, and how fringe ideas spread—from anonymous corners of social media to cable TV to the President's Twitter feed. Marantz also sits with the creators of social media as they start to reckon with the forces they've unleashed. Will they be able to solve the communication crisis they helped bring about, or are their interventions too little too late?

Tea Plantation Workers of Assam and the Indian National Movement, 1921-1947 studies the various phases of workers' politics in the tea plantations of Assam and deliberates upon the role of nationalist leaders in moulding the fate of these workers. The struggles of the tea plantation workers were a manifestation of the strength of their protests against the varied forms of exploitations of the tea planters. Their struggle occurred at the time of the formation of the indigenous bourgeoisie and continued despite the nationalist leadership not providing sufficient support to them. There remained a deep incongruity between the interests of the workers and the interests of the nationalist leadership which largely determined the fate of the material conditions of the labourers in deeper aspects.

The space between life and death is a moment. But it will remain alive in me for hundreds of thousands of future moments. One phone call. That's all it took to change Stephanie Wittels Wachs' life forever... Her younger brother Harris, a star in the comedy world known for his work on shows like Parks and Recreation, had died of a heroin overdose. How do you make sense of such a tragic end to a life of so much hilarious brilliance? In beautiful, unselfish, and surprisingly funny prose, Stephanie Wittels Wachs alternates between her brother's struggle with addiction, which she learned about three days before her wedding, and the first year after his death, in all its emotional devastation. This compelling portrait of a comedic genius and a profound exploration of the love between siblings is A Year of Magical Thinking for a new generation of readers. A heartbreaking but hopeful memoir of addiction, grief, and family, Everything is Horrible and Wonderful will make you laugh, cry, and wonder if that possum on the fence is really your brother's spirit animal.
