***This book was originally published in 1997. The Bildungsroman - the story of the development or formation of a young man - is the most famous German contribution to the European novel. Most studies of the Bildungsroman have concentrated on its underlying philosophy; Michael Minden addresses it as literature. He offers detailed readings of some of the best-known novels in the German language, from Goethe to Mann, including Wilhelm Meisters Lehrjahre, Agathon, Anton Reiser, Hyperion, Heinrich von Ofterdingen, Der grüne***

**Heinrich, Der Nachsommer, and Der Zauberberg. Looking at the novels from the points of view of gender, subjectivity, and the ideology of the aesthetic, and taking account of the literary theory, Minden uncovers aspects and motifs which subvert traditional ideas of the Bildungsroman and raise questions about the function and status of literature.**

**Umsätze mit grünen Produkten machen und sich ein politisch korrektes Image verschaffen. Dabei wird wenig zimperlich mit Begriffen wie "Ökofaschist", "Atomsekte", "Klimakiller" und vielen Halbwahrheiten um sich geworfen. "Das erste Opfer des Krieges ist die Wahrheit", sagte schon der britische Autor Rudyard Kipling - und das gilt auch für die Umweltschutzdebatten. Effektiver Klimaschutz ist unter diesen Umständen kaum noch möglich. Martin Gerth wirft einen Blick hinter die Kulissen von Politfight und Lobbyismus. Und zeigt, dass die ideologischen Grabenkämpfe dringend beendet werden müssen - für unser aller Zukunft.**

property and competition law. Æ Æ Steven Anderman, University of Essex, UK and University of Stockholm, Sweden Ô Much has been written on the flexibilities available within the intellectual property system to address development and social needs. This book goes a step further: it explores how greater access to essential technologies can be ensured through human rights and competition law. Although the analysis is focused on UK and the European Union, the book provides valuable insights for assessing the situation in other jurisdictions. The author suggests an innovative approach for courts and legislators to overcome, in the light of public

interest considerations, the limits imposed by intellectual property rights. This book is a much welcomed contribution to academic and policy debates on the subject. Õ Æ Carlos M. Correa, University of Buenos Aires, Argentina Õ Intellectual property interacts (or clashes?) with human rights and competition law. The refreshing bit about this book is that a detailed practical approach to the inevitable balancing act is proposed. Abbe Brown explains how a human rights approach is the cornerstone of such a balancing approach and how positive results can be achieved towards unblocking essential technologies. And it can be done in the existing international legal

framework, even if the latter could be improved. Well-researched, challenging and interesting reading! Õ Ð Paul Torremans, University of Nottingham, UK  
Ô Abbe Brown Ôs study starts from the assumption that IP right owners, particularly those of innovative technologies, dispose of a disproportionate strong legal position in relation to that of competitors and customers, which is detrimental to society at large. Brown investigates how the power of the IP right owners can be limited by applying existing human rights law and competition law. To that aim it is suggested to widen the legal landscape and to develop a more tripartite substantive

approach to IP law, human rights law and competition law. Brown's study offers a very welcome new contribution to the literature on the functioning of IP law, by stressing the joint role which competition law and human rights law can play in this respect. Æ F. Willem Grosheide, Utrecht University and Attorney at law, Van Doorne Amsterdam, The Netherlands This detailed book explores the relationship between intellectual property, competition and human rights. It considers the extent to which they can and must be combined by decision makers, and how this approach can foster innovation in key areas for society Æ such as pharmaceutical drugs,

communications software and technology to combat climate change. The author argues that these three legal fields are strongly interrelated and that they can be used to identify essential technologies. She demonstrates that in some cases, combining the fields can deliver new bases for wider access to be provided to technologies. The solutions developed are strongly based on existing laws, with a focus on the UK and the EU and the structures of existing forms of dispute resolution, including the European Court of Human Rights and the dispute settlement bodies of the World Trade Organisation. The final chapters also suggest opportunities

for further engagement at international policy and activist level, new approaches to IP and its treaties, and wider adoption of the proposals. This timely book will appeal to academics and practitioners in IP, competition and human rights, as well as innovation-related industry groups and access to knowledge, health and environment activists.

Max Frisch, with his countryman Friederich Diirrenmatt, shares the place of eminence in contemporary Swiss literature. Indeed, he ranks high among the recent leading writers in the German language. But, although several of his works—novels and plays—have been translated into English, he remains little known in America. In this collection of essays an international group of scholars provides a fresh introduction to this noted author. The three leading essays review Frisch's work in the forms he has used

most extensively—drama, narrative fiction, and the personal diary. The remaining nine essays focus on specific works or topics. Among the works examined are *I'm Not Stiller*, *A Wilderness of Mirrors*, *Wilhelm Tell*, and the recent *Man in the Holocene*. Among the topics are Frisch's use of language and images, his treatment of women, and the element of parody.

Concluding the volume is the most complete bibliography on Frisch to appear in English to date.

represented the shift from tradition to innovation in the Wilhelmine Empire (1870s - 1880s) more compellingly than Max Klinger. Morton makes an interdisciplinary examination of Klinger's early prints and drawings within the context of Wilhelmine transformations, coming to the conclusion that the artist's work revealed the psychological and biological underpinnings of modern rational man whose drives and passions undermined bourgeois constructions of society.

This combination allows maximum flexibility for instructors to design their own programs. The text also features a fully integrated short film (Kurzfilm) in every other chapter. Reading plays an important role in this text, with exercises for listening,
