In the fall of 1989, the Archaeological and Historical Research Institute (AHRI) entered into negotiations with the Bureau of Land Management (BLM) to establish a five-year field school at Fort Craig beginning in June of 1990. The project was designed to serve a number of purposes: (a) to operate an archaeological field school for the training of students and the interested public; (b) to assess the nature and extent of cultural resources at the site and to serve as a guide for any future research that may be undertaken; and (c) to establish a foundation for the BLM's public interpretation program at the site. The five seasons of fieldwork were conducted from 1990 to 1994 during the summer and fall. This report describes the results of the archaeological excavations and historical records search conducted by the AHRI at the Fort Craig National Historic site.
