Studies the architectural development, styles, and forms of Borromini, noting the importance of geometry and the influence of such masters as Bernini and Michelangelo

The main character is Agustin, who in another life was named Francesco. He was a confused and indecisive man who had to die to understand, thanks to the teachings of his spiritual guides, the sense of existence and of happiness. Now, Agustin has found Camila, who he knew when he was in Heaven. It just so happens that due to a wise realization that will take them on very different paths. Each one will find answers to what they have been searching for, and they will discover that the things that they need will come in due time, that we are all part of a grand, divine plan and that our actions affect the lives of others. But Yohana Garcia also utilized as inspiration the thoughts of other authors.

#1 NEW YORK TIMES BESTSELLER • In *Sapiens*, he explored our past. In *Homo Deus*, he looked to our future. Now, one of the most innovative thinkers on the planet turns to the present to make sense of today's most pressing issues. “Fascinating . . . a crucial global conversation about how to take on the problems of the twenty-first century.”—*Bill Gates*, *The New York Times Book Review* **NAMED ONE OF THE BEST BOOKS OF THE YEAR BY FINANCIAL TIMES AND PAMELA PAUL**, *KOED* *How do computers and robots change the meaning of being human? How do we deal with the epidemic of fake news? Are nations and religions still relevant? What should we teach our children? Yuval Noah Harari’s 21 Lessons for the 21st Century is a probing and visionary investigation into today’s most urgent issues as we move into the uncharted territory of the future. As technology advances faster than our understanding of it, hacking becomes a tactic of war, and the world feels more polarized than ever. Harari addresses the challenge of navigating life in the face of constant and disorienting change and raises the important questions we need to ask ourselves in order to survive. In twenty-one accessible chapters that are both provocative and profound, Harari builds on the ideas explored in his previous books, unraveling political, technological, social, and existential issues and offering advice on how to prepare for a very different future from the world we now live in: How can we retain freedom of choice when Big Data is watching us? What will the future workforce look like, and how should we ready ourselves for it? How should we deal with the threat of terrorism? Why is liberal democracy in crisis? Harari’s unique ability to make sense of where we have come from and where we are going has captured the imaginations of millions of readers. Here he invites us to consider values, meaning, and personal engagement in a world full of noise and uncertainty. When we are deluged with irrelevant information, clarity is power. Presenting complex contemporary challenges clearly and accessibly, 21 Lessons for the 21st Century is essential reading. “If there were such a thing as a required instruction manual for politicians and thought leaders, Israeli historian Yuval Noah Harari’s 21 Lessons for the 21st Century would deserve serious consideration. In this collection of provocative essays, Harari . . . tackles a daunting array of issues, endeavoring to answer a persistent question: ‘What is happening in the world today, and what is the deep meaning of these events?’”—BookPage (top pick)*

Throughout his career, Eduardo Galeano has turned our understanding of history and reality on its head. Isabelle Allende said his works “invade the reader’s mind, to persuade him or her to surrender to the charm of his writing and power of his idealism.” Mirrors, Galeano’s most ambitious project since Memory of Fire, is an unofficial history of the world seen through history’s unseen, unheard, and forgotten. As Galeano notes: “Official history has it that Vasco Núñez de Balboa was the first man to see, from a summit in Panama, the two oceans at once. Were the people who lived there blind?” Recalling the lives of artists, writers, gods, and visionaries, from the Garden of Eden to twenty-first-century New York, of the black slaves who built the White House and the women erased by men’s fears, and told in hundreds of kaleidoscopic vignettes, Mirrors is a magic mosaic of our humanity.

Literary Nonfiction. CALIBAN AND THE WITCH is a history of the body in the transition to capitalism. Moving from the peasant revolts of the late Middle Ages to the witch-hunts and the rise of mechanical philosophy, Federici investigates the capitalist rationalization of social reproduction. She shows how the battle against the rebel body and the conflict between body and mind are essential conditions for the development of labor power and self-ownership, two central principles of modern social organization.“It is both a passionate work of memory recovered and a hammer of humanity’s agenda.” Peter Linebaugh, author of The London Hanged”

For the first time, in 33 years, here is a complete analytical and comparative study of the only two English translations of this marvelous work. This effort, which lies within your grasp, is a pains-taking effort to not only compare the wording, but also the footnotes and supply variant references to this stunning work; in particular making references back to our copy of the Spanish text for clarity. More importantly, this effort is coordinated with Teresa of Avila’s works. Thus an additional 400 notes, in combination with comparatives between the variant references are supplied. This work has been translated by the Sisters of Stanbrook.

In his revolutionary book Miracles Happen, Brian Weiss M.D., the New York Times bestselling author of Many Lives, Many Masters, examines the physical, emotional, and spiritual healing that is possible when you freely accept and embrace the reality of reincarnation. Trained as a traditional psychotherapist, Dr. Weiss began to explore how reincarnation and past life regression can lead us to our higher selves after a startling encounter with a patient. Now a leading proponent of past-life therapy, Dr. Weiss shows us that, indeed, Miracles Happen, with seemingly incredible but true stories that demonstrate how, by getting in touch with and understanding our past lives, we can dramatically improve the present.

Francesco: El LlamadoOceano De Mexico

When Life in Peacetime opens, on May 29, 2015, engineer Ivo Brandani is sixty-nine years old. He's disillusioned and angry—but morbidly attached to life. As he makes a day-long trip home from his job in Sharm el Sheik reconstructing the coral reefs of the Red Sea using synthetics, he reflects on both the brief time he sees remaining ahead and on everything that has happened already in his life to which he can never quite resign himself. We see his slow bureaucratic trudge as a civil servant, long summer vacations on a Greek island, his twisted relationship with his first boss, the turmoil and panic attacks he faced during the student uprisings in 1968 that pushed him away from philosophy and into engineering, and his fearful childhood as a postwar evacuee. A close-up portrait of an ordinary existence, Life in Peacetime offers a new look at the postwar era in Italy and the fundamental contradictions of a secure, middle-class life.

Francesco returns to infuse us with breath when life appears to be meaningless. In the fourth installment of the blockbuster franchise that has transformed the lives of thousands of readers, Francesco is back with a renewed vigor: to become the master of love. His mission is to descend to earth and show those suffering how to fix their problems without them being aware of his presence. Throughout this book, Francesco is a part of the tangling and misunderstandings between two souls as they argue about his presence, all the while he stands by their sides.

We have long since lost our faith in the idea that human beings could achieve human happiness in some future ideal state—a state that Thomas More, writing five centuries ago, tied to a topos, a fixed place, a land, an island, a sovereign state under a wise and benevolent ruler. But while we have lost our faith in utopias of all hues, the human aspiration that made this vision so compelling has not died. Instead it is re-emerging today as a vision focused not on the future but on the past, not on a future-to-be-created but on an abandoned and undead past that we could call retrotopia. The emergence of retrotopia is intertwined with the deepening gulf between power and politics that is a defining feature of our contemporary liquid-modern world—the gulf between the ability to get things done and the capability of deciding what things need to be done, a capability once vested with the territorially sovereign state. This deepening gulf has rendered nation-states unable to deliver on their promises, giving rise to a widespread disenchantment with the idea that the future will improve the human condition and a mistrust in the ability of nation-states to make that happen. True to the utopian spirit, retrotopia derives its stimulus from the urge to rectify the failings of the present human condition—though now by resurrecting the failed and forgotten potentials of the past. Imagined aspects of the past, genuine or putative, serve as the main landmarks today in drawing the road-map to a better world. Having lost all faith in the idea of building an alternative society of the future, many turn instead to the grand ideas of the past, buried but not yet dead. Such is retrotopia, the contours of which are examined by Zygmunt Bauman in this sharp dissection of our contemporary romance with the past.

The classic work about meetings and decision-making. Meetings are a crucial part of all our lives, but too often they go nowhere and waste valuable time. In Six Thinking Hats, Edward de Bono shows how meetings can be transformed to produce quick, decisive results every time. The Six Hats method is a devastatingly simple technique based on the brain's different modes of thinking. The intelligence, experience and information of everyone is harnessed to reach the right conclusions quickly. These principles have been adopted by businesses and governments around the world, ending conflict and confusion in favour of harmony and productivity. The Six Hats strategy will fundamentally change the way you work and interact. "An inspiring man with brilliant ideas. De Bono never ceases to amaze with his clarity of thought." Sir Richard Branson

On 8 March 1421, the largest fleet the world had ever seen set sail from China. The ships, some nearly five hundred feet long, were under the command of Emperor Zhu Di's loyal eunuch admirals. Their mission was 'to proceed all the way to the end of the earth to collect tribute from the barbarians beyond the seas' and unite the world in Confucian harmony. Their journey would last for over two years and take them around the globe but by the time they returned home, China was beginning its long, self-imposed isolation from the world it had so recently embraced. And so the great ships were left to rot and the records of their journey were destroyed. And with them, the knowledge that the Chinese had circumnavigated the globe a century before Magellan, reached America seventy years before Columbus, and Australia three hundred and fifty years before Cook... The result of fifteen years research, 1421 is Gavin Menzies' enthralling account of the voyage of the Chinese fleet, the remarkable discoveries he made and the persuasive evidence to support them: ancient maps, precise navigational knowledge, astronomy and the surviving accounts of Chinese explorers and the later European navigators as well as the traces the fleet left behind - from sunken junks to the voice offerings left by the Chinese sailors wherever they landed, giving thanks to Shao Lin, goddess of the sea. Already hailed as a classic, this is the story of an extraordinary journey of discovery that not only radically alters our understanding of world exploration but also rewrites history itself.

How to Stop Worrying About What You Should Do So You Can Finish What You Need to Do and Start Doing What You Want to Do

Fall in love with the addictive, suspenseful love story between a teenage girl and a vampire with the book that sparked a "literary phenomenon" and redefined romance for a generation (New York Times). Isabella Swan's move to Forks, a small, perpetually rainy town in Washington, could have been the most boring move she ever made. But once she meets the mysterious and alluring Edward Cullen, Isabella's life takes a thrilling and terrifying turn. Up until now, Edward has managed to keep his vampire identity a secret in the small community he lives in, but now nobody is safe, especially Isabella, the person Edward holds most dear. The lovers find themselves balanced precariously on the point of a knife -- between desire and danger. Deeply romantic and extraordinarily suspenseful, Twilight captures the struggle between defying our instincts and satisfying our desires. This is a love story with bite. It's here! #1 bestselling author Stephenie Meyer makes a triumphant return to the world of Twilight with the highly anticipated companion, Midnight Sun: the iconic love story of Bella and Edward told from the vampire's point of view. "People do not want to just read Meyer's books; they want to climb inside them and live there." -- Time "A literary phenomenon." -- The New York Times Frost & Sullivan's 2014 Growth, Innovation, and Leadership Book of the Year "EXPONENTIAL ORGANIZATIONS should be required reading for anyone interested in the ways exponential technologies are reinventing best practices in business." --Ray Kurzweil, Director of Engineering at Google In business, performance is key. In performance, how you organize can be the key to growth. In the past five years, the business world has seen the birth of a new breed of company—the Exponential Organization—that has revolutionized how a company can accelerate its growth by using technology. An ExO can eliminate the incremental, linear way traditional companies get bigger, leveraging assets like community, big data, algorithms, and new technology into achieving performance benchmarks ten times better than its peers. Three luminaries of the business world—Salim Issmail, Yuri van Geest, and Mike Malone—have researched this phenomenon and documented ten characteristics of Exponential Organizations. Here, in EXPONENTIAL ORGANIZATIONS, they walk the reader through how any company, from a startup to a multi-national, can become an ExO, streamline its performance, and grow to the next level. "EXPONENTIAL ORGANIZATIONS is the most pivotal book in its class. Salim examines the future of organizations and offers readers his insights on the concept of Exponential Organizations, because he himself embodies the strategy, structure, culture, processes, and systems of this new breed of company." —John Hagel, The Center for the Edge Chosen by Benjamin Netanyahu, Prime Minister of Israel, to be one of Bloomberg's Best Books of 2015 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. To make the journey into the Now we will need to leave our analytical mind and its false created self, the ego, behind. From the very first page of Eckhart Tolle's extraordinary book, we move rapidly into a significantly higher altitude where we breathe a lighter air. We become connected to the indestructible essence of our Being. " The eternal, ever present One Life beyond the myriad forms of life that are subject to birth and death. " Although the journey is challenging, Eckhart Tolle uses simple language and an easy question and answer format to guide us. A word of mouth phenomenon since its first publication, The Power of Now is one of those rare books with the power to create an experience in readers, one that can radically change their lives for the better.

Walkscapes deals with strolling as an architecture of landscape. Walking as an autonomous form of art, a primary act in the symbolic transformation of the territory, an aesthetic instrument of knowledge and a physical transformation of the 'negotiated' space, which is converted into an urban intervention. From primitive nomadism to Dada and Surrealism, from the Lettrist to the Situationist International, and from Minimalism to Land Art, this book narrates the perception of landscape through a history of the traversed city.

The Reenchantment of the World is a perceptive study of our scientific consciousness and a cogent and forceful challenge to its supremacy. Focusing on the rise of the mechanistic idea that we can know the natural world only by distancing ourselves from it, Berman shows how science acquired its controlling position in the consciousness of the West. He analyzes the holistic, animistic tradition--destroyed in the wake of Scientific Revolution of the sixteenth and seventeenth centuries--which viewed man as a participant in the cosmos, not as an isolated observer. Arguing that the holistic world view must be revived in some credible form before we destroy our society and our environment, he explores the possibilities for a consciousness appropriate to the modern era. Ecological rather than animistic, this new world view would be grounded in the real and intimate connection between man and nature.

Which sort of seducer could you be? Siren? Rake? Cold Coquette? Star? Comedian? Charismatic? Or Saint? This book will show you which. Charm, persuasion, the ability to create illusions: these are some of the many dazzling gifts of the Seducer, the compelling figure who is able to manipulate, mislead and give pleasure all at once. When raised to the level of art, seduction, an indirect and subtle form of power, has toppled empires, won elections and enslaved great minds. In this beautiful, sensually designed book, Greene uncovers the two sides of seduction: the characters and the process. Discover who you, or your partner, most resembles. Learn, too, the pitfalls of the anti-Seducer. Immerse yourself in the twenty-four manoeuvres and strategies of the seductive process, the ritual by which a seducer gains mastery over their target. Understand how to 'Choose the Right Victim', 'Appear to Be an Object of Desire' and 'Confuse Desire and Reality'. In addition, Greene provides instruction on how to identify victims by type. Each fascinating character and each cunning tactic demonstrates a fundamental truth about who we are, and the targets we've become - or hope to win over. The Art of Seduction is an indispensable primer on the essence of one of history's greatest weapons and the ultimate power trip. Based on a true story, The Prince is a "complex, informed, and intelligent saga" (Kirkus Reviews) about the web of love, betrayal, and murder that forged the most powerful criminal organization in history—the Mafia. In this remarkable novel, author Vito Bruschini brilliantly evokes the charismatic figure of Prince Ferdinando Licata, a wealthy Sicilian landowner who uses his personal power and charm to placate Sicilian peasants and fight off Mussolini's fascists. As tensions rise in Italy during the 1930s, with increasingly violent consequences, Licata attracts many friends and even more enemies. Eventually implicated in a grisly murder, the prince flees to America, where he ends up navigating a turf war between Irish and Italian gangs of the Lower East Side. Violence explodes in unexpected ways as Licata gains dominance over New York, with the help of a loyal townsman with blood ties to the prince who is forced to abandon his fiancée in Sicily. The two men return to their native land at the height of World War II in an outrageously bold maneuver engineered by Licata and mobster Lucky Luciano. Both the prince and his kinsman assist US naval intelligence during the invasion of Sicily and, once they are back on their native soil, they proceed to settle unfinished business with their enemies and unravel old secrets in a stunning and sinister finale. Through a spellbinding story and unforgettable characters, Bruschini depicts in visceral detail the dark intertwining roots of loyalty and betrayal, poverty and privilege, secrets and revelations that contributed to the rise of the Mafia in Sicily and America.
