Welcome to Look-Alike Land, where the more you look, the more you see! Like its predecessor, Look-Alikes Jr. features 3-D picture puzzles, but this time invites even the youngest child to join in the fun by featuring simpler, easier-to-find look-alikes in childlike settings. There are 11 scenes - house, parlor, kitchen, bedroom, school bus, classroom, construction site, movie lobby, train, farm, and rocket - each with 50+ objects to identify (700+ in total). Look for a cement mixer made out of a mustard bottle, kitchen cabinets made out of cakes of soap, and a bed built with crayons and pasta! Fun for all ages. This best-selling book is back with a brand new series design and a striking new cover.

The present book is a natural sequel to those three works that are read by English readers in England, America and India. It is properly entitled A Message from Arunachala because it was written in a few weeks at his saintly masters hermitage on the lower slopes of that Hill. He has described this hill in the first chapter, wherein he shows what sacred and inspiring associations it possesses.

A new book about parenting from the prolific author of Men Are From Mars, Women Are From Venus John Gray's Men Are From Mars, Women Are From Venus is a history-making bestseller with more than 7 million copies in print in hardcover. This new book on parenting will round out the relationship mega-brand that John has created. Focusing on children ages 1-9, John explains that this is the period

of dependence in a child's life when character and sense of self are shaped. Parents everywhere are sure to breathe a sigh of relief that they now have a John Gray book they can turn to help children reach their fullest potential.

"You are the architect of your own life." --Henry Thomas Hamblin "One knows well enough that Mr. Hamblin speaks the truth when he says: To those who are in earnest, whose whole desire is fixed upon God, who will not falter . . . these are the ones who go forward, nothing can stay them, for there is no power in heaven or hell that can stop a soul aflame with the desire to find the Kingdom and to see God....Mr. Hamblin has through much experience attained to this deeper knowledge of the Infinite Love and a rare insight into the Soul's deepest needs.... As this book clearly shows, and speaks with no uncertain voice, all our past steps, as full of limitation as they were, each was valuable and necessary in its order initiations into wider reaches of Life.... The way Home, as faithfully shown in this little book, may be through experiences which baffle and bewilder, but the Goal is certain. There is no church large enough to contain this Holy Splendour, there is no creed possible to this sublime understanding. Only Love can understand love and only the God-like can attain to this God consciousness filling all space and yet spaceless. We are all children of the Most High, made in His image and likeness." -Alice Mortley, author of Christ In You

1001 Quotations To Inspire You Before You Die is full of smart remarks - not just sassy one-liners (although there are plenty of those), but also more considered, philosophical epigrams that make us pause and reflect on a range of profound topics. Each quotation is accompanied by an insightful account of its meaning and the historical context in which it was first uttered or written. Some famous quotations are straightforward, but many need contextualising - it's often not exactly what was said, but who said it, and in what context, that is more important. Many oft-quoted remarks open up whole new worlds of thought and interpretation. What, for example, did Voltaire mean when he wrote 'If God did not exist, it would be necessary to invent him'? - was he hinting at his own atheism (unlikely, given

the age in which he lived) or making a more subtle point about the difficulty of apprehending the Almighty? This book looks into these and a host of other such questions, and takes the reader from the source material into illuminating discussions of its wider significance. We all love quotations - we use them to make our points, to plead our cases and to justify our opinions, as well as to honour, glorify, motivate, incite, besmirch, bewitch and beguile. 1001 Quotations To Inspire You Before You Die will help you do all that and more.

All the fundamentals. No fluff. Learn more with less! A truly revolutionary American Government textbook, Christine Barbour's AmGov: Long Story Short, responds to the needs of today's students and instructors through brevity and accessibility. The succinct ten chapters are separated by tabs that make it easy to skim, flip, revisit, reorient, and return to content quickly. Reading aids like bullets, annotations and arrows walk students through important facts and break up the material in short, engaging bites of information that highlight not only what is important but why it's important. Though brief, this core book is still robust enough to provide everything that students need to be successful in their American Government course. Whether for the on-the-go student who doesn't have time to read and digest a lengthy chapter, or the instructor who wants a book that will stay out of their way and leave room for plenty of supplementary reading and activities, AmGov provides a perfectly simplified foundation for a successful American Government course.

Given the impact that good nutrition and keeping fit have on health and well-being in later life WHO in collaboration with the Tufts University USDA Human Nutrition Research Center on Aging organized a consultation to review the scientific evidence linking diet and other factors - especially exercise - affecting nutritional status disease prevention and health promotion for older persons. The consultation focused primarily on practical issues including the establishment of explicit recommendations to improve the health and nutritional status of older persons in a wide variety of socioeconomic and cultural settings. During the production of a comprehensive report representing the outcome both of the preparatory work and of the consultation itself it was recognized that new information emerging in several key areas should also be included. The combined results presented here are intended as an authoritative source of information for nutritionists general practitioners gerontologists medical faculties nurses care providers schools of public health and social workers. The specific recommendations concerning nutrient intakes

food-based dietary guidelines and exercise and physical activity should also interest a larger audience including the general reader. The main body discusses the epidemiological and social aspects of ageing health and functional changes experienced with ageing the impact of physical activity assessment of the nutritional status of older persons and nutritional guidelines for healthy ageing. Additional material covers food-based dietary guidelines for older adults - with particular emphasis on healthy ageing and prevention of chronic noncommunicable diseases - and guidelines for promoting physical activity among older persons. ...This report is significant representing an authoritative consensus related to the epidemiological and social aspects of ageing health and functional changes experienced with age and the impact of physical activity. This valuable source of information is relevant to a wide range of health professionals; the clear and specific recommendations concerning food/nutrient consumption and physical activity for older adults should also interest a larger audience. - The Journal of the Royal Society for the Promotion of Health ...The book is a timely publication which provides an exhaustive review of studies... This publication will certainly serve as a reference manual for all those involved in nutrition gerontology and geriatrics. - Indian Journal of Medical Research

The Posterior Analytics (Greek: ?????????? ??????; Latin: Analytica Posteriora) is a text from Aristotle's Organon that deals with demonstration, definition, and scientific knowledge. The demonstration is distinguished as a syllogism productive of scientific knowledge, while the definition marked as the statement of a thing's nature, ... a

statement of the meaning of the name, or of an equivalent nominal formula. Aeterna Press [A] stimulating examination of how the teachings of the world's greatest thinkers and philosophers dovetail (or don't) with Ellis's three core concepts: unconditional acceptance of the self, others and the world...The book, which includes multiple self-acceptance exercises, may be among his best: Every page offers a fresh insight into rational emotive behavior therapy, Ellis's doctrine of modern stoicism.- Psychology TodayAlbert Ellis is a contemporary prophet whose ideas will be remembered along with those of Jesus, Buddha, Lao Tzu and Sartre. In this important book, he shows how to develop self-acceptance as well as to learn how to create healthy relationships. In a world of increasing involvement with machines (i.e., computers, televisions, video games) and decreasing involvement with people, nothing could be more needed.-Jon Carlson, PsyD, EdD, ABPP, Distinguished Professor, Governors State UniversityThis wonderful book, as it helps us move toward greater compassion for ourselves, for others, and for our troubled world, is one more significant contribution by Dr. Ellis - not only toward greater personal happiness, but also toward a better world.-Howard C. Cutler, M.D., coauthor (with the Dalai Lama) of The Art of Happiness, A Handbook for LivingWhat exactly is self-esteem? Most people, as well as many psychologists and educators, believe we need it, that it's good for our emotional well-being, and that it makes us more successful. World-renowned psychologist Albert Ellis says NO, it's all a myth.According to Ellis, self-esteem is probably the greatest emotional disturbance known to humans. Self-esteem results in each of us praising ourselves when what we do is approved by others. But we also damn ourselves when we don't do well enough and others disapprove of us. What we need more than self-esteem, Ellis maintains, is self-acceptance!In The Myth of Self-Esteem, Ellis provides a lively and insightful explanation of self-esteem and self-acceptance, examining the thinking of great religious teachers, philosophers, and psychologists, including Lao Tsu, Jesus, Spinoza, Nietzsche, Kierkegaard, Buber, Heidegger, Sartre, Tillich, D.T. Suzuki, the Dalai Lama, Carl Rogers, and Nathaniel Branden, among others. He then provides exercises for training oneself to change self-defeating habits to the healthy, positive approach of self-acceptance. These include

specific thinking techniques as well as emotive and behavioral exercises. He concludes by stressing that unconditional self-acceptance is the basis for establishing healthy relationships with others, along with unconditional other-acceptance and a total philosophy of life anchored in unconditional life-acceptance.

Reissued with a new foreword by Raymond DiGiuseppe, PhD, ScD, St. John's University "New trainees often get the theory of psychopathology; they struggle to get the case conceptualization and the strategic plan. Then they ask themselves. "What do I do now?" Going from the abstractions to the actions is not always clear. The Practice of Rational Emotive Behavior Therapy represents a compilation of years of theoretical and clinical insights distilled into a specific theory of disturbance and therapy and deductions for specific clinical strategies and techniques....The structure of this books focuses on an explication of the theory, a chapter on basic practice, and a chapter on an in depth case study. A detailed chapter follows on the practice of individual psychotherapy. Although the book is not broken into sections, the next four chapters represent a real treasure. The authors focus on using REBT in couples, family, group, and marathons sessions. Doing REBT with one person is difficult to learn. Once the clinician adds more people to the room with different and sometimes competing agendas things get more complicated. These chapters will not only help the novice clinician but also the experienced REBT therapists work better in these types of sessions. So, consider yourself lucky for having picked up this book. Reading it will help many people get better." - From the Foreword by Raymond DiGiuseppe, PhD, ScD, Director of Professional Education, Albert Ellis Institute; Professor and Chair, Department of Psychology, St. John's University This edition, involving a unique collaboration between Albert Ellis and the world's greatest Ellis scholar, Windy Dryden, modernizes Ellis's pioneering theories. The book begins with an explanation of rational emotive behavior therapy as a general treatment model and then addresses different treatment modalities, including individual, couple, family, and sex therapy. The authors have added material new since the book's original edition on

teaching the principles of unconditional self-acceptance in a structured group setting. With extensive use of actual case examples to illustrate each of the different settings, and a new brand new foreword by Raymond DiGiuseppe that sets the book into its 21st-century context.

Humanity is aging. In the last century, life expectancy has increased by as much as 25 years, the greatest increase in 5'000 years of history. As a consequence the elderly constitute today the fastest growing segment of the world's population. This new situation creates many social problems and challenges to health care which both the developed as well as the developing countries will have to cope with. The present publication shows that scientific progress has reached a level where nutritional interventions may play a decisive part in the prevention of degenerative conditions of age, improvement of quality of life and impact on health care burden and resources. Topics deal with such different aspects as the influence of prenatal and early infant nutrition on the future aged individual and effects of energetic restriction on longevity. Further contributions include studies on mitochondrial alterations, digestive problems, specific metabolic deviations mediated by insulin, bone degradation, structural changes, neuromuscular dysfunctions, mental state of the elderly as well as the response of the immune system to nutrient intake. Finally the book offers a review of requirements appropriate to meet the age-related public health challenges of the 21st century.

These 16 sermons contain in concentrated form some of Tillich's most lambent themes. Although they were first published in the early 1960s, the pieces in question take up preoccupations which continue to haunt us at the beginning of the 21st century. Tillich discusses, among other topics, wisdom; salvation; loneliness and solitude; creation in relation to the creator;

inequality; and spiritual presence. He has a desire to make sense of the fundamental mystery of Christian theology: the paradox of the moment which is now wherein comes the mystery which is eternity.

Networks of Outrage and Hope is an exploration of the new forms of social movements and protests that are erupting in the world today, from the Arab uprisings to the indignadas movement in Spain, from the Occupy Wall Street movement to the social protests in Turkey, Brazil and elsewhere. While these and similar social movements differ in many important ways, there is one thing they share in common: they are all interwoven inextricably with the creation of autonomous communication networks supported by the Internet and wireless communication. In this new edition of his timely and important book, Manuel Castells examines the social, cultural and political roots of these new social movements, studies their innovative forms of self-organization, assesses the precise role of technology in the dynamics of the movements, suggests the reasons for the support they have found in large segments of society, and probes their capacity to induce political change by influencing people's minds. Two new chapters bring the analysis up-to-date and draw out the implications of these social movements and protests for understanding the new forms of social change and political democracy in the global network society.

Organizing and clarifying research and theory from diverse sources, including philosophy and cognitive psychology, this book provides a framework intended to help educational practitioners (principals, supervisors, curriculum directors, and teachers) plan programs for incorporating the teaching of thinking throughout the regular curriculum. Chapter 1 discusses the need for a framework for teaching thinking and presents a historical perspective on the study of thinking. Chapters 2 through 6 discuss five dimensions of thinking: (1) metacognition; (2) critical and creative thinking; (3) thinking processes--such as concept formation, problem solving, and research; (4) core thinking skills--the "building blocks" of thinking--including focusing, information-gathering, organizing and generating skills; and (5) the relationship of content-area knowledge to thinking. The final chapter presents guidelines for using the framework. (A glossary of key terms and an outline of the book are appended, and thirteen pages of references are attached.) (ARH)
