

## Desert Wildlife

Discusses desert animals around the world and the ways in which they adapt to the desert ecosystem. Introduces endangered species and conservation efforts and suggests ways for readers to contribute. Includes maps, diagrams, and reading quiz. This title provides a valuable resource for STEM programs while supporting the Common Core State Standards.

As the sun beats down on the sand, sand cats make their way into burrows where they wait out the hot desert day. At night, they pounce on nearby rodents! This leveled reader highlights the sand cat's adaptations for their desert home. A range map, adaptation feature, diet graphic, and more reinforce the fascinating facts found throughout the text.

Despite the continuing popularity of egalitarian values and rhetoric, the brute facts of poverty and massive inequality remain everywhere with us. Although extreme poverty and deprivation are often associated with developing societies, recent years have witnessed rising inequality in many industrialized countries as well. If inequality persists in modern societies, however, its patterns and structures are evolving in complex ways that defy generalizations from historical experience.

Imagine being lost and stranded in the desert. Would you know what to do to survive? This useful nonfiction title explains the important skills needed to survive in the desert. With helpful diagrams and images, definitions, tips and instructions, informational

text, a bibliography, and a list of other helpful websites, readers can be assured that they will learn about the dangers of heat exhaustion, desert plants that could aid in survival, and other helpful tips in order to survive in an emergency.

An Illustrated Checklist

Danger in the Desert

Describes the problems of the desert environment and the various kinds of wildlife found there as hunters, grazers, scavengers, underground dwellers or migrants.

Did you know that the Sahara Desert is home to many types of wildlife, including wolves? These creatures are excellent predators and live in packs. They attack medium-sized animals and are very fast. They have sharp teeth and strong jaws, which make them very effective predators. However, you should be careful when approaching an ostrich, as they are quite aggressive. In fact, wolves are considered the most dangerous desert animals.

Is there life in the desert? There sure is! This educational book will teach your child about the animals and plants that survive the harsh desert environment. It's a great book to have because it's not all texts; rather, there's even more pictures. And pictures are universal forms of learning that make education fun and memorable. Make sure to buy a copy now!
