

Destination India 2017 Pwc

Family businesses are vital to the health of a nation’s economy, but distresses such as economic downturns and the Covid-19 pandemic can put them at grave existential risk. Drawing from her dynamic experience working with her family-owned company MPII Steel Structures Ltd, Priyanka Gupta Zielinski presents a unique manual to help family businesses thrive, even in times of crisis. Central to it is a survival toolkit – featuring a metaphorical multipurpose hat, a flashlight, a superhero cape, a Swiss Army knife and a parachute – which prepares business owners to face any challenge head on. The book also reveals how the improvisational style of family enterprises can be leveraged better for sustainability, while identifying in their close-knit structure and community-driven approach avenues for meaningful social change. Replete with anecdotes and effective strategies – with an occasional Haryanvi idiom thrown into the mix – *The Ultimate Family Business Survival Guide* is a must-read for family business and MSME owners everywhere.

Theories within tourism can be difficult, even confusing areas to understand. Developed from the successful Portuguese textbook *Teoria do Turismo*, *Tourism Theory* provides clear and thorough coverage of all aspects of tourism theory for students and researchers of tourism. Consisting of five sections and over fifty entries, this book covers nine of the most important models in tourism study. The first three sections examine general concepts in tourism; disciplines and topics; and the tourist, which includes areas such as demand, gaze, psychology and typologies. A fourth section covers intermediation, distribution and travel, reviewing aspects such as travel agencies, tourist flows and multi-destination travel patterns. The final section encapsulates the tourism destination itself, covering organizations, the destination image, supply, seasonality and more. Encyclopedic cross-referencing between entries makes navigation easy, while in-depth analysis, exercises and further reading suggestions for each of the selected areas provide the context and detail needed for understanding. Entries can be used individually as a reference, or as part of the whole for a complete introduction to tourism theory.

India started its economic reforms in 1991 and has seen huge incremental benefits – greater openness, higher growth and substantial poverty reduction. India is now the world’s sixth largest economy and has seen major transformation in many parts of the economy and the country. But with new opportunities have come new challenges which are now being tackled. Seminal reforms such as GST and IBC are transforming the economic landscape of the country. India’s infrastructure deficit is being addressed at a faster pace and the ease of doing business is being tackled on a war footing with India’s global rankings showing huge improvements. But yet more needs to be done as the aspirations of India’s young population are huge. India is also in the midst of a huge demographic transformation which if taken advantage of can propel India to even higher levels of growth. The benefits of India’s demographic dividend and a huge domestic market puts it in an advantageous position to become a \$9 - 10 trillion economy by 2030. However, our economic growth is contingent on improving competitiveness, attracting more investment, creating enough employment opportunities to absorb the growing population and overcoming the challenges of exclusion and inequitable access due to multiple deprivations of class, caste and gender — all of which require disruptive approaches to find solutions. Unfortunately, there is no single silver bullet, no one action that will fix all the problems that we face currently. Rather, we need to act on several fronts. The Modi’s Vision 2030” was initiated with a view to chart out an agenda of reforms and programmes in 10 inter-connected areas that will help drive India to its goals of shared prosperity by 2030 and a more competitive economy rising to become the third largest in the world. This report, encompassing ten underpinning chapters, identifies the challenges of tomorrow, points to key choices ahead, and recommends not just “what” needs to be reformed, but “how” to undertake the reforms. Policy consistency and coordination is essential if we are to achieve inclusive growth and significantly reduce unemployment. Productivity and investment-led transformation can inject new dynamism into the economy and ensure future growth, employment, and prosperity. This would enable the economy to gain the momentum it needs to become the global economic centre and become a magnet for investments. In the last 91 years, FICCI has played an active role in the progress and development of the Indian economy, representing not just the voice of industry but also being an active partner in the development agenda of the government. By 2030, India should transcend a new era of transformation and FICCI will continue to contribute to the building of a “New India”. We are confident that you will find this report insightful and engaging and look forward to your feedback and suggestions.

This book examines prominent issues in the Emerging Markets (EM) from a variety of disciplines in order to make useful societal contributions through knowledge exchange. EMs offer enormous opportunities, but realizing them is both challenging and risky due to inherent uncertainties of such markets. EM’s also have unique characteristics that makes them different from developed countries. This causes implications for both theory and practice. These markets necessitate substantial adaptations of developed theories and approaches employed in the Western world. This book investigates problems specific to emerging markets, and identifies new theoretical constructs, hypotheses (re)development, and emphasizes institutional contexts. The chapters in this book establish new conceptual and theoretical paradigms from multidisciplinary perspectives concentrated in the areas of information systems, electronic government, and digital and social media matters. The book focuses on topics in these areas such as digital enterprises, sustainability, telemedicine, and Information Communication Technology (ICT) and surveys the potential challenges and opportunities that may arise. These concepts and topics covered in this book are vital for making the global economy more equitable and sustainable.

True well-being isn’t hard to find. You just have to know where to look. In this insightful, full-color tour of Jamaica, Norway, Hawai’i, Japan, India, and Brazil, wellness and travel journalist Annie Daly shares a diverse array of philosophies, lifestyles, and practices for better living. Fed up with the commercialization of the wellness industry after working in it for years, Annie embarked on an inspiring adventure through some of the world’s happiest and healthiest cities and villages to find out what we can learn from them. Whether she’s hiking along gorgeous fjords in Norway to see why Norwegians are so dedicated to getting outside, soothing her spirit with Hawaiian salt water cleanses, or learning about the importance Brazilians place on community, Annie combines on-the-ground reporting with heartfelt personal narrative to share the global lessons, philosophies, and customs that prove that wellness is not about the products—it’s about the way you live your life. With candid photography, lesser-known history sidebars, and guidance on how to incorporate these often ancient and always timeless practices into your own lifestyle, this culturally-immersive read invites you to view the world through a different lens and decide what being well means to you. Destination Wellness is the perfect book for:

- Anyone who has embraced hygge and is looking for new lifestyle inspiration
- Armchair travelers and staycationers
- Happiness and inspiration seekers
- Wellness and travel enthusiasts
- History lovers

This open access book explores supply chains strategies to help companies face challenges such as societal emergency, digitalization, climate changes and scarcity of resources. The book identifies industrial scenarios for the next decade based on the analysis of trends at social, economic, environmental technological and political level, and examines how they may impact on supply chain processes and how to design next generation supply chains to answer these challenges. By mapping enabling technologies for supply chain innovation, the book proposes a roadmap for the full implementation of the supply chain strategies based on the integration of production and logistics processes. Case studies from process industry, discrete manufacturing, distribution and logistics, as well as ICT providers are provided, and policy recommendations are put forward to support companies in this transformative process.

This book focuses on the nature and significance of China’s state enterprises which have undergone substantial changes since China’s economic liberalization in 1978. It argues that much of the criticism is based on mistaken premises, where even the term ‘state-owned enterprises’ is a misnomer given that the emphasis is much less on ownership than on control. Using numerous case studies, this book highlights the extent to which these enterprises have evolved in response to reforms, and provides an in-depth analysis of their role in China’s outward investment strategy in the “Belt and Road” initiative. This role speaks to their growing influence as China expands her global footprint.

Advanced Perspectives on Global Industry Transitions and Business Opportunities

Accidentally Wes Anderson

Impact of New Media in Tourism

Times are changing and the labor markets are under immense burden from the collective effects of various megatrends. Technological growth and grander incorporation of economies along with global supply chains have been an advantage for several workers armed with high skills and in growing occupations. However, it is a challenge for workers with low or obsolete skills in diminishing zones of employment. Business models that are digitalized hire workers as self-employed instead of standard employees. People seem to be working and living longer, but they experience many job changes and the peril of skills desuetude. Inequalities in both quality of job and earnings have increased in several countries. The depth and pace of digital transformation will probably be shocking. Industrial robots have already stepped in and artificial intelligence is making its advance too. Globalization and technological change predict the great potential for additional developments in labor market performance. But people should be ready for change. A progression of creative annihilation is probably under way, where some chores are either offshored or given to robots. A better world of for jobs cannot be warranted – a lot will be contingent on devising the right policies and institutes in place.

The Global Innovation Index provides detailed metrics about the innovation performance of 127 countries and economies around the world. Its 81 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. This year ’ s report reviews the state of innovation in agriculture and food systems across sectors and geographies. Chapters of the report provide more details on this year ’ s theme from academic, business, and particular country perspectives from leading experts and decision makers.

The International VAT/GST Guidelines present a set of internationally agreed standards and recommended approaches for the consistent application of VAT to international trade, with a particular focus on trade in services and intangibles.

How to close the gap between strategy and execution Two-thirds of executives say their organizations don ’ t have the capabilities to support their strategy. In *Strategy That Works*, Paul Leinwand and Cesare Mainardi explain why. They identify conventional business practices that unintentionally create a gap between strategy and execution. And they show how some of the best companies in the world consistently leap ahead of their competitors. Based on new research, the authors reveal five practices for connecting strategy and execution used by highly successful enterprises such as IKEA, Natura, Danaher, Haier, and Lego. These companies:

- Commit to what they do best instead of chasing multiple opportunities
- Build their own unique winning capabilities instead of copying others
- Put their culture to work instead of struggling to change it
- Invest where it matters instead of going lean across the board
- Shape the future instead of reacting to it

Packed with tools you can use for building these five practices into your organization and supported by in-depth profiles of companies that are known for making their strategy work, this is your guide for reconnecting strategy to execution.

Thanks to tremendous renewable energy and energy efficiency potential and a stable, dynamic economy, Indonesia has become a coveted destination for investors in the clean energy sector. Clean energy investment, however, remains far below the level needed to realise Indonesia’s ambitious clean energy and sustainable finance goals.

A revised and updated edition of the leading introductory text on the geography of economic life, from the local to the global *Economic Geography* is an engaging and accessible introduction to the different ways modern economic geographers understand, analyze, and interpret economic processes. This comprehensive text addresses significant questions relevant to contemporary economic life, from the activities of transnational corporations to issues surrounding workplaces and consumption. It encourages readers to explore how spatial patterns, places, networks, and territories shape large-scale economic processes. Accessible, highly-illustrated material presents fresh insights from the field—complemented by relatable, real-world examples that help students understand the social, cultural, and political contexts underpinning global economic processes. Now in its third edition, this extensively revised and updated textbook retains the features and thematic structure that have proved popular with students and instructors alike, while adding exciting new content. New chapters explore how the global economy and global development are institutionalized and governed, the economic geographies of global climate change, economic practices outside the capitalist mainstream, the role of migrants in labour markets, global production networks, and more. Introduces economic geography with a thematic approach including major concepts, current debates, and case studies Revised and updated to enhance international coverage, including three entirely new chapters on international development, alternative economies, and global climate change Substantial new content on labour migration, global production networks, and recent intellectual trends such as evolutionary economic geography Highly illustrated with diagrams and photographs closely integrated into the text Pedagogical aids including key case studies, learning objectives, text boxes, chapter essay questions, summaries, and further reading Core geographical concepts – such as place, networks and territory – are closely integrated into all chapters. *Economic Geography: A Contemporary Introduction* is an invaluable source of up-to-date knowledge for students new to the field, for those requiring a solid foundation, as well as for a broader academic and public readership with interest in this area of study.

The 2020 edition analyses tourism performance and policy trends across 51 OECD countries and partner economies. It highlights the need for coherent and comprehensive approaches to tourism policy making, and the significance of the tourism economy, with data covering domestic, inbound and outbound tourism, enterprises and employment, and internal tourism consumption.

Industrial revolutions have impacted both, manufacturing and service. From the steam engine to digital automated production, the industrial revolutions have conducted significant changes in operations and supply chain management (SCM) processes. Swift changes in manufacturing and service systems have led to phenomenal improvements in productivity. The fast-paced environment brings new challenges and opportunities for the companies that are associated with the adaptation to the new concepts such as Internet of Things (IoT) and Cyber Physical Systems, artificial intelligence (AI), robotics, cyber security, data analytics, block chain and cloud technology. These emerging technologies facilitated and expedited the birth of Logistics 4.0. Industrial Revolution 4.0 initiatives in SCM has attracted stakeholders’ attentions due to it is ability to empower using a set of technologies together that helps to execute more efficient production and distribution systems. This initiative has been called Logistics 4.0 of the fourth Industrial Revolution in SCM due to its high potential. Connecting entities, machines, physical items and enterprise resources to each other by using sensors, devices and the internet along the supply chains are the main attributes of Logistics 4.0. IoT enables customers to make more suitable and valuable decisions due to the data-driven structure of the Industry 4.0 paradigm. Besides that, the system’s ability of gathering and analyzing information about the environment at any given time and adapting itself to the rapid changes add significant value to the SCM processes. In this peer-reviewed book, experts from all over the world, in the field present a conceptual framework for Logistics 4.0 and provide examples for usage of Industry 4.0 tools in SCM. This book is a work that will be beneficial for both practitioners and students and academicians, as it covers the theoretical framework, on the one hand, and includes examples of practice and real world.

Global Groundwater

The Laws of Globalization and Business Applications

Next Generation Supply Chains

The Report: Dubai 2016

Global Groundwater: Source, Scarcity, Sustainability, Security, and Solutions presents a compilation of compelling insights into groundwater scenarios within all groundwater-stressed regions across the world. Thematic sub-sections include groundwater studies on sources, scarcity, sustainability, security, and solutions. The chapters in these sub-sections provide unique knowledge on groundwater for scientists, planners, and policymakers, and are written by leading global experts and researchers. Global Groundwater: Source, Scarcity, Sustainability, Security, and Solutions provides a unique, unparalleled opportunity to integrate the knowledge on groundwater, ranging from availability to pollution, nation-level groundwater management to transboundary aquifer governance, and global-scale review to local-scale case-studies. Provides interdisciplinary content that bridges the knowledge from groundwater sources to solutions and sustainability, from science to policy, from technology to clean water and food Includes global and regional reviews and case studies, building a bridge between broad reviews of groundwater-related issues by domain experts as well as detailed case studies by researchers Identifies pathways for transforming knowledge to policy and governance of groundwater security and sustainability Financial services in particular is one non-oil area where the emirate is starting to pull ahead, with recent growth in the Islamic financial services segment fuelling the emirate’s ambition of becoming the knowledge-based capital of the Islamic economy in the future. Meanwhile, Dubai’s real estate and construction sectors, which were badly affected by the 2008 financial meltdown, are once again thriving as the legacies of the global crisis recede, and the debts incurred from that time are repaid and restructured. Indeed Dubai is now firmly focused on the future, with preparations for Dubai Expo 2020 in particular helping nourish its economic recovery, development and growth in recent years. The event is expected to attract 25m visitors over a six-month period and the build-up is driving development across several sectors. The preparations, This report examines the links between inequality and other major global trends (or megatrends), with a focus on technological change, climate change, urbanization and international migration. The analysis pays particular attention to poverty and labour market trends, as they mediate the distributional impacts of the major trends selected. It also provides policy recommendations to manage these megatrends in an equitable manner and considers the policy implications, so as to reduce inequalities and support their implementation.

Kerala, perched on the Southern tip of Indian sub continent is an ever green tourist delight. Chosen by God as His own country, Kerala has everything that a tourist looks forward to. Virgin beaches, romantic backwaters, invigorating hill stations, enthralling waterfalls and great historical monuments craft Kerala one of the ten paradises in the world. With moderate climate and civilized people the state is immensely blessed by Mother Nature. If marriages are made in Heaven, what better place to have the ceremony than in God’s Own Country? Yes, Kerala is becoming one of the important Wedding Destinations in the world. As a wedding destination Kerala offers you many options as a beach wedding, a house boat wedding or a wedding by the hills. Along with, this historical land is fast becoming a popular MICE destination. Thanks to the numerous facilities available for Meetings, Incentives, Conventions and Exhibitions. With the most sought after professionals and excellent network of hospitals India is becoming the very hot medical tourism destination in the world. It is the land of everlasting festivals and vibrant art forms. The multicultural land with peoples from diverse religions, communities and sects is an abode of prosperous legacy. The year-round festivals proffer golden opportunities to explore the tradition and cultural heritage of this great historical soil. The uniqueness of Ayurveda brings the person to a new sphere of rejuvenation. The system is the consequence of vigorous contemplation and researches of great scholars. And, we are equipped for you with a prelude of God’s own country. We offer indispensable insights about wedding tourism, MICE tourism, medical tourism, pilgrimage tourism, monsoon tourism, plantation tourism, festivals, art forms, Ayurveda and accommodation facilities along with the fascinating destinations under the fourteen districts.

Commodity by country of destination

De wereld internationaliseert en communiceert in een ongekend tempo, niet in het minst door de grenzeloze mogelijkheden van het automatiseren. Nu wil het feit dat er meer gecommuniceerd kan worden, nog niet zeggen dat er per definitie ook beter gecommuniceerd wordt. In ‘Outsourcen van IT’ belichten een zeventiental praktijkauteurs de culturele consequenties en (on)mogelijkheden van werk elders uitbesteden, stapsgewijs voor de landen: Estland, China, India, Indonesië, Litouwen, Maleisië, Polen, Roemenië en Rusland.

In contemporary society, it is vital for countries to consistently seek new ways to provide stable growth for their increasing populations. As such, it is important to stay on top of the most current strategies and trends that promote strong industrial and

economic development. Transcontinental Strategies for Industrial Development and Economic Growth provides a comprehensive examination of the latest strategies and techniques for growing and maintaining an economically-sound community. Highlighting innovative research on relevant topics such as budget preparation processes, management philosophies, and global competitiveness, this publication is an ideal resource for all professionals, practitioners, business owners, and researchers who are seeking advanced academic perspectives on strategies for industrial development and economic growth.

This book examines key contemporary marketing concepts, issues and challenges that affect destinations within a multidisciplinary global perspective. Uniquely combining both the theoretical and practical approaches, this handbook discusses cutting edge marketing questions such as innovation in destinations, sustainability, social media, peer-to-peer applications and web 3.0. Drawing from the knowledge and expertise of 70 prominent scholars from over 20 countries around the world, The Routledge Handbook of Destination Marketing aims to create an international platform for balanced academic research with practical applications, in order to foster synergetic interaction between academia and industry. For these reasons, it will be a valuable resource for both researchers and practitioners in the field of destination marketing.

As more companies shift their operations between countries to take advantage of lower costs and greater profit, the global market continues to change rapidly, resulting in global hypercompetition that can be detrimental to a business. Firms must remain updated with the latest research as they navigate cultural differences, communication challenges, and inconsistent standards in order to thrive. Advanced Perspectives on Global Industry Transitions and Business Opportunities is an essential, comprehensive reference book that explores the current global business environment and the challenges that have arisen due to contemporary globalization and the resulting global hypercompetition. With a broad scope, the book covers the implications of industry transitions from small and medium-sized companies to multinational businesses and large enterprises and discusses opportunities for both born global and born-again global firms. Featuring topics that deal with innovation, digitalization, disruptive technologies, and international collaboration, this is an ideal source for executives, managers, entrepreneurs, global businesses and businesses looking to transition to the global market, academicians, researchers, and students.

Training for Reform

This book explains not only why the world isn't flat but also the patterns that govern cross-border interactions.

Sixteenth in a series of annual reports comparing business regulation in 190 economies, Doing Business 2019 measures aspects of regulation affecting areas of everyday business activity.

This textbook is designed to help students understand the key issues of global business by connecting theory with reality. Divided into three parts, it covers critical issues of international business, introducing readers to topics they will connect with, and discussing core concepts. With a user-friendly pedagogy and a host of helpful visuals, the authors offer a practitioner's perspective on global business knowledge, examining familiar theory on trade, direct investment, and political environment alongside fresh topics, like geopolitical conflicts, emerging markets, and sustainability. Over sixty case studies are included to illustrate the magnitude and complexity of global business involving different stakeholders. Undergraduate students looking for an introduction to international business and graduate students looking to apply their knowledge will find Global Business stimulating, since it demonstrates how theories and concepts work in real-world business settings.

This book discusses population growth and the resultant problems, and highlights the need for immediate action to develop a set of planned satellite towns around Indian megacities to reduce their population densities and activity concentrations. It addresses problems like unplanned spatial expansion, over-concentration of populations, unmanageable situations in industrial growth, and poor traffic management, concluding that only megacities and their satellites, when planned properly, can together mitigate the urgent problem of urban concentration in and around the megacities. Identifying the general problems, the book develops a quantitative and spatially fitting regional allocation model of population and economic activities. It also offers a policy-based planned program of development for the selected megacities in India along with their satellites and fringe areas to ensure a healthy, balanced and prospective urban scenario for India in the coming decades.

Opportunity, Resilience, and Growth in the Accelerated Future of Work

United States Exports of Domestic and Foreign Merchandise

Concepts, Models and Systems

Now in its 40th year, Emerging Trends in Real Estate is one of the most highly regarded and widely read forecast reports in the real estate industry. This updated edition provides an outlook on real estate investment and development trends, real estate finance and capital markets, trends by property sector and metropolitan area, and other real estate issues around the globe. Comprehensive and invaluable, the book is based on interviews with leading industry experts and also covers what's happening in multifamily, retail, office, industrial, and hotel development.

If you only read one book on the future of work, Work Disrupted: Opportunity, Resilience, and Growth in the Accelerated Future of Work should be that book. The future of work swept in sooner than expected, accelerated by Covid-19, creating an urgent need for new maps, new mindsets, new strategies-- and most importantly, a trusted guide to take us on this journey. That guide is Jeff Schwartz. A founding partner of Deloitte Consulting's Future of Work practice, Schwartz brings clarity, humor, wisdom, and practical advice to the future of work, a topic surrounded by misinformation, fear, and confusion. With a fundamental belief in the power of human innovation and creativity, Schwartz presents the key issues, critical choices, and potential pitfalls that must be on everyone's radar. If you're anxious about robots taking away your job in the future, you will take comfort in the realistic perspective, fact-based insights, and practical steps Schwartz offers. If you're not sure where to even begin to prepare, follow his level-headed advice and easy-to-follow action plans. If you're a business leader caught between keeping up, while also being thoughtful about the next moves, you will appreciate the playbook directed at you. If you're wondering how Covid-19 will change how and where you will work, Work Disrupted has you covered. Written in a conversational style by Schwartz, with Suzanne Riss, an award-winning journalist and book author, Work Disrupted offers a welcome alternative to books on the topic that lack a broad perspective or dwell on the problems rather than offer solutions. Timely and insightful, the book includes the impact of Covid-19 on our present and future work. Interviews with leading thinkers on the future of work offer additional perspectives and guidance. Cartoons created for the book by leading business illustrator Tom Fishburne bring to life the reader's journey and the complex issues surrounding the topic. Told from the perspective of an economist, management advisor, and social commentator, Work Disrupted offers hope--and practical advice--exploring such topics as: How we frame what lies ahead is a critical navigational tool. Discover the signposts that can serve as practical guides for individuals who have families to support, mortgages to pay, and want to stay gainfully employed no matter what the future holds. The importance of recognizing the rapidly evolving opportunities in front of us. Learn how to build resilience--in careers, organizations, and leaders--for what lies ahead. Why exploring new mental models helps us discover the steps we need to take to thrive. Individuals can decide how to protect their livelihood while businesses and public institutions can consider how they can lead and support workforces to thrive in twenty-first-century careers and work. "Jeff's marvelous book is a roadmap for the new world of work with clear signposts. His insights will help readers discover opportunities, take action, and find hope in uncertain times. The ideas are fresh, beautifully crafted, and immediately applicable. This is not only a book to be read, but savored and used." —Dave Ulrich, Rensis Likert Professor, Ross School of Business, University of Michigan; Partner, the RBL Group; Co-author Reinventing the Organization

Satellite Towns in Neo-metropolitan Development in India Lessons from Selected Cities Springer Nature

This book examines the global influence and scope of medical tourism with an emphasis on the city of Kolkata in Eastern India as an emerging destination at the regional scale. Through a geographical research perspective, the book discusses the importance of the phenomenon of medical tourism including recent trends, policies, and scale studies to develop sustainable strategies for medical tourism at particular micro destinations. In nine chapters, readers will become familiar with the multi-billion dollar industry of medical tourism and the problems currently associated with medical tourism at multiple scales. The trends of medical tourism in and around the city of Kolkata are used to demonstrate the roles of infrastructure and stakeholders in implementing feasible and sustainable medical tourism in an emerging destination. The first two chapters of the book provide an introduction to medical tourism and the methodologies of this study. Then chapters three through nine focus on medical tourism in the case of Kolkata to discuss the regional applications and developments of medical tourism. Topics addressed include medical tourism facilities, stakeholders and tourists, guest-host relationships, an assessment of development versus risk, and an evaluation of strategies to manage rising medical tourism in Kolkata. The concluding chapter discusses future strategies that could be used to implement the potentialities of a metropolitan city as a medical tourism destination, based on studies done in Kolkata. Readers who will find this work of interest include students, practitioners, geographers, and researchers and policymakers engaged in the medical tourism industry.

Who Will Finance Innovation?

Tourism consumers are increasingly demanding and seek to base their travel decision-making process on relevant and credible tourism information. In recent years, user-generated content on social media, the opinion of travel bloggers, and entertainment programs in the media have influenced the public's travel purchasing behavior and acted as a driving force for the development of tourism products, such as film tourism. It also has played a role in the evolution and development of marketing, giving rise to new applications, as in the case of digital and influence marketing. On the other hand, tourism organizations and destination management organizations face major challenges in communicating the attributes of a tourism product, since this cannot be experienced before consumption. Thus, they need to know how and in which means or platforms of communication they can inform potential consumers. Impact of New Media in Tourism provides theoretical and practical contributions in tourism and communication including current research on the influence of new media and the active role of consumers in tourism. With a focus on decision making and increasing the visibility of products and destinations, the book provides support for tourism agencies and organizations around the world. Covering themes that include digital marketing, social media, and online branding, this book is essential for professionals, academicians, researchers, and students working or studying in the field of tourism and hospitality management, marketing, advertising, and media and communications.

The Global Innovation Index 2020 provides detailed metrics about the innovation performance of 131 countries and economies around the world. Its 80 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. The 2020 edition sheds light on the state of innovation financing by investigating the evolution of financing mechanisms for entrepreneurs and other innovators, and by pointing to progress and remaining challenges – including in the context of the economic slowdown induced by the coronavirus disease (COVID-19) crisis.
