works made for the Menil Collection by Allora & Calzadilla The Puerto Rico-based collaborative duo Allora & Calzadilla created Specters of Noon as a group of seven large-scale works specifically for the Menil Collection. The ensemble is orchestrated around the idea of solar noon, a notion derived from Surrealist texts by Caillois, Césaire, and others that probe the transcultural mythology of noon--a time when shadows vanish and delirious visions momentarily reign. The works include light projections, guano, ship engines, live vocal performance, and coal. Using the Menil's Surrealist holdings as a point of departure, Specters of Noon is infused throughout with a Caribbean perspective that addresses the instability of environmental and colonial politics; one work is a power transformer damaged in Hurricane Maria that is half-sheathed in bronze. Filled with

stunning installation photography and insightful texts both commissioned and reprinted, this volume captures the spirit of Jennifer Allora (b. 1974) and Guillermo Calzadilla's (b. 1971) deeply researched and multifaceted work.

Roy Underhill is America's best-known master of traditional woodcraft. Creator of the popular PBS series *The Woodwright's Shop*, Roy has inspired millions--from professional craftsman to armchair woodworker--with his talent, knowledge, and enthusiasm. Roy returns here with his third book. *The Woodwright's Workbook* features step-by-step instructions for a selection of projects from his television series. All projects are illustrated with photographs and measured drawings. Included here are plans for tool chests, workbenches, lathes, and historical reproductions of items for the home: a six-board chest, rustic chairs with cattail seats,

a churn for the kitchen, and the Rittenhouse hygrometer. Roy also explores building barns, forges, boats, and even colonial fortresses. A wonderful feature of this book is Roy's own translation of the humorous fifteenth-century poem *The Debate of the Carpenter's Tools*. He also provides a fascinating and useful 'field guide' to American tool marks that shows how to identify the specific tool used by the marks it left. Whether Roy is an old friend or a new acquaintance, let him be your guide to the world of traditional woodworking.

large American V8 engines, predominantly Chevrolets and Fords. The T70 was prolific throughout the mid- to late-1960s, and over 100 examples were built in three versions – both open-topped and coupé models. The first successes for the T70 were in the US, and in 1966, the T70 dominated the Can-Am championship, winning five of the six races in the series – with John Surtees becoming champion in a Chevrolet-powered example. In 1968, T70s finished 1 - 2 in the Daytona 24 Hours, and the T70 was highly successful in the
