Justice Performed: Courtroom TV Shows and the Theaters of Popular Law is the first study of the reality TV genre to trace its theatrical legacy, connecting the phenomenon of the daytime TV shows to a long history of theatrical trials staged to educate audiences in pedagogies of citizenship. It examines how judge TV fulfills part of law's performative function: that of providing a participatory spectacle the public can recognize as justice. Since it debuted in 1981 with The People's Court, which made famous its star jurist, Judge Joseph A. Wapner, dozens of judges have made the move to television. Unlike the demographics in actual courts, most TV judges are non-white men and women hailing from diverse cultural and racial backgrounds. These judges charge their decisions with personal preferences and cultural innuendos, painting a very different picture of what justice looks like. Drawing on interviews with TV judges, producers and production staff, as well as the author's experience as a studio audience member, the book scrutinizes the performativity of the genre, the needs it meets and the inherent ideological biases about race, gender and civic instruction.

"Today's hearing, as the title indicates, will examine the 2010 Census Integrated Communications Campaign in hard-to-count areas. The hearing will assess and examine ethnic print and broadcast media's role in preventing an undercount. We will further examine the Census Bureau in its efforts to reach those who are more likely to be undercounted--children, minorities, and renters."--P. 1.

Robust methods to identify new growth opportunities YOUR SHAREHOLDERS DEMAND growth; your company needs growth; and your career can suffer or soar because of how you drive growth—or don't. While executives often talk about their great growth plans, very few of these plans actually deliver real gains in growth and profitability. How do some companies manage to beat the odds and bust through the obstacles that make explosive growth so elusive? In this hands-on guide, Rita Gunther McGrath and Ian C. MacMillan identify powerful strategic moves they call “MarketBusters”—approaches that dramatically reconfigure profit streams in an industry, upend conventional competition, and ultimately deliver blockbuster growth. Based on insights from an extensive three-year study, McGrath and MacMillan describe forty proven marketbusting moves and outline five overall strategies companies have used to drive new growth: • Change the customer's total experience: Make it simpler, faster, or more beneficial for customers to buy from you • Reconfigure your products and services: Transform your offerings to make them clearly superior to competitors' • Redefine your business and associated key metrics: Change how you do business or how your customers do business in ways that dramatically boost performance • Anticipate or exploit industry shifts: Capitalize on changes before competitors do • Create a new market space: Trigger the emergence of a new market Every marketbusting move is illustrated in practice through vivid company examples—including cautionary tales that alert you to potential pitfalls you may encounter. Action-oriented tools and checklists provide concrete guidance in finding opportunities across your own business platform, executing your chosen move successfully, and exploiting new opportunities to maximize their bottomline impact. The book also provides guidelines for avoiding common implementation challenges and for developing the organizational alignment needed to smooth execution. New opportunities for explosive growth are waiting to be unleashed. MarketBusters is the field guide you need to develop a reliable, robust approach to fueling continuous, profitable growth.

This book examines corporate entrepreneurship start-ups in the media industries and provides a timely solution to fill in the gap of academic as well as practical knowledge in this regard. It brings together new media venturing practices in the west and east and covers new media opportunities in various emerging forms, including gaming, Internet, mobile and webcasting business. The book presents case studies from major transnational media companies, highlights the industry specific characteristics of corporate entrepreneurship, and thus contributes to understanding the links between new business venturing and certain particular industries, so as to further explore the industry specific characteristics of entrepreneurship. This book also suggests a new approach to integrate economic and management theories for the study of media corporate entrepreneurship; while the two sets of theories are conflicting with each other, the book proposes a contingent model to reconcile different theories. This is an innovative approach and will be a valuable starting point to construct an interdisciplinary theoretical framework for new media business studies.
