This paper describes E-fundi as a learning management system developed for the now more than 65,000 students of by the North-West University in South Africa. In this paper, it will be proposed that e-mentoring as a recent development of traditional mentoring, may be pursued by way of E-fundi to the enrichment and growth of students wherever they are. The advantages and disadvantages of e-mentoring will also be discussed. The paper will end by recommending ways the use of E-fundi for e-mentoring purposes may be implemented. [For the full proceedings, see ED562093.].

In the first book of its kind, art information expert Lois Swan Jones discusses how to locate visual and textual information on the Internet and how to evaluate and supplement that information with material from other formats--print sources, CD-ROMS, documentary videos, and

microfiche sets--to produce excellent research results. The book is divided into three sections: Basic Information Formats; Types of Websites and How to Find Them; and How to Use Web Information. Jones discusses the strengths and limitations of Websites; scholarly and basic information resources are noted; and search strategies for finding pertinent Websites are included. Art Information and the Internet also discusses research methodology for studying art-historical styles, artists working in various media, individual works of art, and non-Western cultures--as well as art education, writing about art, problems of copyright, and issues concerning the buying and selling of art. This title will be periodically updated.

E-Recruitment Vs. Traditional Recruitment

Growing by Degrees

Beginner'S Guide To E-Commerce

Seminar paper from the year 2012 in the subject Business economics - Personnel and Organisation, grade: A, University of Cambridge, language: English, abstract: The application of traditional recruitment techniques do not suffice anymore and are also not well-timed in order to bring in satisfactory pool of competent candidates. Through early-1990s, with the progression associated with online technologies, many have experienced the particular shift for the traditional recruitment techniques to e-recruitment. The web-based recruitment blends software programs as well as infrastructure, in addition to resume repositories which assist the particular clients in their recruitment operations. Internet lookups are actually very popular among the people looking for work. Resumes delivered via the web as well as through e-mail could be scanned to get key phrases, determining essential information, abilities, proficiency, as well as working experience, hence lowering hands-on procession and probable mistakes. This elevates the effectiveness around choosing competent as well as a

trustworthy workforce, lowers long term turnover, and recruits completing online documents presumptively use much less resources compared to that that post papers application packages. Companies can access job hunters spanning the planet and usually get far more applications. The process is cheaper for companies and also more expedited. Even though career boards have the ability to deal with extremely high quantities of both people looking for work as well as employers, they tend to not achieve high quality. The systems are not simple and also harmless enough to be made use of by comparatively unskilled end users; they lack a 'personal feel', raise confidentiality, security, authentication, and cheating issues. The systems additionally discriminate against some applicants due to badly developed hiring platforms. Integration of e-recruiting with convectional recruiting may also be challenging and globalization further complicates assessment for applicants across borders.

This proceedings book presents outcomes of the Innovative Economic Symposium - 2020 organized by the Institute of Technology and Business in České Budějovice (VŠTE) in Russia in collaboration with two universities: Financial University under the Government of the Russian Federation (Moscow) and Samara State University of Economics (Samara). The symposium aims to bring together experts and young scientists in economy, management, international relations, finance, marketing, and professional education from Asian and European countries, to share knowledge and experience and discuss issues related to stable economic development, international business, entrepreneurship, Industry 4.0, cooperation

between educational and business structures, strategic decision-making, and processes of economic globalization and fragmentation. The book consists of two parts corresponding to the thematic symposium areas. The book content covers two sections: stable development in unstable world and globalization and fragmentation forces of the current world economy. The main topics included in the book are as follows: - Where is the world moving to and where is the economy in it? - Institutionalization of innovations. - Network architecture of economic relations. - Competences for the future. - Smart change management. - Monetary and fiscal policy development as a factor of economic modernization. - Role of international trade in the economy globalization. - Impact of globalization and economic fragmentation on the enterprise's internal environment. - Financial conditions for entrepreneurship under the economic modernization. - Impact of scientific and technological progress on globalization and fragmentation of the economy.

Essay from the year 2004 in the subject Business economics - Personnel and Organisation, grade: 1,7, University of Ulster, course: Introduction to Human Resource Management, 9 entries in the bibliography, language: English, abstract: We are living in the 21st century and organizations are more and more dependent on the external and internal environment to be profitable. System gives the organization security, plans protect for accidents and a firm is in the long term only successful when management and workers are willing to bring their optimal accomplishment. A company is a team and an image ascertains all people in it:

good workers promote the image and disinterested and disaffected workers reduce prestige. Organizations rely on human beings. Therefore is it very important to have a well-functioning human resource department in every organization, which also has an impact on the organizational performance. There are many factors involved in the recruitment process. Recruitment is primarily concerned with “the process of generating a pool of capable people to apply for employment to an organization” (Bratton and Gold, 2003: p. 221). It is closely connected with the selection process which “is the process by which managers and others use specific instruments to choose from a pool of applicants a person or persons most likely to succeed in the job (s), given management goals and legal requirements” (Bratton and Gold, 2003: p. 221). According to Foot and Hook every recruitment action should be designed to meet the strategic objectives. (Foot and Hook, 2002: p.58) The Human resource management department is responsible for choosing the right person with the right skills and ability at the right time and for the right place and who is physically and emotionally able to carry out his/her responsibilities. The process of recruitment is necessary to ensure that recruitment practices are systematic, consistent and responsive to internal needs (Cole, 2002: p.173). Clear procedures are also cost effective. There are external and internal influences on organizations. For example legislation is an external factor which has a big impact. Every process should be fair, systematic, transparent and flexible, and should not contravene legislation, for example the Sex Discrimination Act (1975), Race Relations (1976),

the Equal Pay Act (1970) or the Human Rights Act (1998). Another external factor is the diversity of the employment market. In times of changing demographic structures and many different cultural and religious backgrounds it is important to know how to manage diversity (Cornelius, 2001: p.29). Internal influences on the Recruitment process include the key persons.

make a free selection and comparison between the prices of goods at the electronic department stores throughout the Internet. All such facilities are given to the consumers in a very short time without causing them to leave their office or home. In addition, the Electronic Marketing has exterminated the monopoly of goods and materials, all such acts of course are for the consumer's benefit. However, in addition to such advantages there are many disadvantages of such type of marketing; the Electronic Marketing has deleted the privacy of the consumer, because all of his movements through the Internet have been divulged and under control, in addition to lack of exclusive security through the Internet. Accordingly many losses equally occurred to the customer and the merchant due to such actions hackers who reveal the information and credit cards details. In addition, the Electronic Marketing caused many merchants, agents and monopolists to be vanquished because it gave the chance for direct communications between the producer and the consumer without passing through them; as such, many of such merchants have been yielded away from the way of this new technology. The Electronic Marketing was able to cause an upset down in many concepts and standards of economic science that have existed for so many years. Doors are so open for every new in this assumption and endless world as there are no limits can stop such human ambition.

Academic Paper from the year 2021 in the subject Didactics - E-Learning, grade: 2.2, Canterbury Christ Church University, course: Study Business

with Foundation BA(HONS), language: English, abstract: This essay discusses the advantages and disadvantages of E-learning in the digital age. Since ancient times, education has been a key factor in the evolution and progress of human society. From the great philosophers of antiquity who shared their knowledge with their disciples in the vast outdoors classrooms through oratorical speeches, from the writings on the clay tablets and writings on the parchments, then in the Middle Ages when the printing houses appeared and learning began from books, is reached as the current time in the age of computers to E-learning.

Inhaltsangabe:Abstract: This report analyses whether the German market is ripe for online grocery shopping or whether German food retailers should continue fighting for their right to extend the opening hours. The research question of this project is: Opportunities and drawbacks of extended opening hours versus online shopping in the German food trade on the basis of a consumer behaviour analysis Both secondary and primary data have been collected. Secondary data has been essential in providing background information for this project. The literature mainly gives information about research methods, concepts of market analysis and consumer behaviour, the German market and e-business. Primary quantitative data has been collected implementing the concept of judgement sampling to give

indications of trends and attitudes in the German population. 152 German supermarket customers have been interviewed face to face. In addition primary qualitative research has been undertaken with the help of four in-depth interviews with experts from the supermarket industry.

Seminar paper from the year 2008 in the subject Sociology - Work, Profession, Education, Organisation, grade: 1,5, University of Copenhagen (Sociology), course: Human Resources Management, 13 entries in the bibliography, language: English, abstract: In this paper the methods of recruitment through the Internet are going to be analyzed in regard to the traditional methods of recruitment. On the one hand there are the traditional recruitment methods, such as newspaper advertising, career fairs or personal contacts. On the other hand there is the sector of e-recruitment which lately has become immensely popular especially among larger companies. First, the problem is going to be sketched out as it is related to the temporary context. Before analyzing and discussing the problem in detail the methodological issues will be be outlined briefly. Finally, the results will be presented and evaluated in conclusion together with further perspectives.

This paper provides a discussion on international standards, the ISO series of quality standards and the advantages and disadvantages of using the ISO 9000 standards for engineering and construction (E/C). The information presented was obtained from a study that investigated international standards and the ISO 9000 series of quality standards. The first part of this paper provides information on involvement in international standards development, the effects of international standards on competitiveness, and the advantages and disadvantages of using the ISO 9000 series of quality international standards. The second part contains the results of an extensive survey on international standards of members of the engineering and construction industry.

Academic Paper from the year 2018 in the subject Pedagogy - Common Didactics, Educational Objectives, Methods, , language: English, abstract: This work focuses on Future Education and its characteristics. Thereby it will have a closer look at the advantages and disadvantages of Online Education. Over the past several decades the rapid technological advancement has had an impact on every aspect of human life and education has been one of the most important beneficiaries of this phenomenon. However as technology continues to take a central role in today's society, educational experts and professionals have raised concerns on the possible impacts that this will have not just on the system but also on the students and the society as whole. Some critics arguing that technology would in the future replace human intelligence. This, they argue would be as a result of the assumption of control by technologies over a considerable measure of undertakings and capacities that educators have been educating their students in the conventional education system. It is the position of this paper that despite the rise of technology and the central role it is now playing in the society, Education faces no threat, rather with the changing world; technology will only be driving force behind the restructuring of the education model as it aligns itself to the global changes.

A tremendous amount of money is being steered toward personalized learning (PL) initiatives at the federal, state, and local levels, and it is important to understand the return on the investment in students' futures. It is only through rigorous discussions that educators and policymakers will be able to determine if PL is a passing fad or if it possesses the staying power necessary to show a positive impact on student achievement. *Evaluation of Principles and Best Practices in Personalized Learning* is a critical scholarly publication that explores the modern push for schools to implement PL environments and the continuing research to understand the best strategies and implementation methods for personalizing education. It seeks to begin creating a standardized language and standardized approach to the PL initiative and to investigate the implications it has on the educational system. Additionally, this book adds to the professional discussion of PL by looking at both the advantages and disadvantages of PL, the teacher's role in PL, creating a PL program to scale, the role of technology and PL, the special education population and PL, emerging research on PL, and case studies involving PL. Featuring research on a wide range of topics such as blended learning, preservice teachers, and special education, this book is ideal for teachers, administrators, academicians, policymakers, researchers, and students.

E-Fundi as a Viable Way to Do E-Mentoring

Reshaping Traditional Libraries into Next Generation Libraries

"... remarkable account of the impact of postmodern philosophy on the question of ethics and politics... commendable also for its balanced view of Heidegger's relationship to politics and ethics.... an excellent account of Heidegger's philosophical understanding of technology..." --

Choice This book takes as its point of departure the question of ethics: that values and their pursuit in the West often perpetuate their own worst enemies. At issue are the dangers in the structures and movements of images, values, and ways of knowing that are most intimately a part of our lives. Document from the year 2016 in the subject Computer Science - Internet, New Technologies, , language: English, abstract: In the present paper, various ways of virtual communication will be illustrated. In this connection, first, common possibilities of communicating virtually such as e-mail, instant messaging and VoIP will be presented before two major and popular instant messaging tools available on the Internet, Slack and Skype, are going to be examined in greater detail by pointing out their strength, weaknesses, opportunities and threats with the help of a SWOT-analysis. This is supposed to figure out the most effective, efficient, useful and safe communication instant messaging tool. Further, it aims at figuring out which tool(s) will prevail in the future and therefore stand(s) the test of time. In today's world, the possibilities for communication

via Internet have become very common both in private and business matters. Messages can be sent from one corner of the world to the other in the blink of an eye, be it via e-mail, as the technological advanced version of letters, instant messaging with the frequent extra opportunity of a video talk and Internet telephony (VoIP) as a much more inexpensive way of phoning via Internet. In a rapidly increasing globalized world now more than ever, time is money when it comes to entrepreneurial actions and at the same time of essence for private purposes as we have got used to rapid communication. As an inevitable consequence, people's attention span as well as patience related to communication or demanding access to information has been reducing drastically. Expectations regarding a safe and extremely fast way of communicating are very high and continue to rise.

Oxford Revision Guides are highly effective for both individual revision and classroom summary work. The diagrammatic approach makes the key concepts and processes, and the links between them, easier to memorize. Comprehensive coverage Key topics are graphically presented on page spreads, making the books extremely easy to use. Additionally, this book features specification matching grids so that you can feel confident that your specification is covered. Saves revision time Your students will save valuable revision time by using these notes instead of condensing their own. In fact many students are choosing to buy their own copies so that they can colour code or highlight them as they might do with their own revision notes. Education Sense
