The World Religions Paradigm has been the subject of critique and controversy in Religious Studies for many years. After World Religions provides a rationale for overhauling the World Religions curriculum, as well as a roadmap for doing so. The volume offers concise and practical introductions to cutting-edge Religious

Studies method and theory, introducing a wide range of pedagogical situations and innovative solutions. An international team of scholars addresses the challenges presented in their different departmental, institutional, and geographical contexts. Instructors developing syllabi will find supplementary reading lists and specific suggestions to help guide their teaching. Students at all levels will find the

book an invaluable entry point into an area of ongoing scholarly debate. This book codifies, describes, and contextualizes group rituals and individual practices from world religious traditions. At the interface of religious studies, psychology, and medicine, it elucidates the cultural richness of practices and rituals from numerous world religions. The book begins by discussing the role that religious rituals and practices may play in the

well-being of humans and the multi-dimensional cultural and psychological complexity of religious rituals and practices. It then discusses rituals and practices within a number of religions, including Christian, Islamic, Jewish, Buddhist, Taoist, Sikh, Hindu, Confucian, and other traditions. There is a need for a more inclusive collection of religious rituals and practices, as some practices are making headlines in

contemporary society. Mindfulness is one of the fastest-growing psychological interventions in healthcare and Yoga is now practiced by tens of millions of people in the U.S.A. These practices have been examined in thousands of academic publications spanning neuroscience, psychology, medicine, sociology, and religious studies. While Mindfulness and Yoga have recently received widespread scientific and cultural attention, many

rituals and practices from world religious traditions have remained underexplored in scholarly, scientific, and clinical contexts. This book brings more diverse rituals and practices into this academic discourse while providing a reference guide for clinicians and students of the topic.

World Religions A Voyage of Discovery
Saint Mary's Press

The Religion Student Writer's Manual and Reader's Guide, is a set of

instructions and exercises that sequentially develop citizenship, academic, and professional skills while providing students with knowledge about a wide range of religious concepts, phenomena, and information sources. Part 1 begins by teaching students about reading and writing in introductory religion. It focuses on the crafts of writing and scholarship by providing the basics of grammar, style, formats and source citation, and then introduces students

to a variety of rich information resources including the religious journals and the Library of Congress. Part 2 prepares students to research, read, write, review, and critique religious scholarship. Finally, Part 3 provides for the practice of religious scholarship in advanced courses such as the history of religion and contemporary approaches to the study of religion. Religious Studies: The Key Concepts is an accessible, A-Z resource,

defining and explaining key terms and ideas central to the study of religion. Exploring broad and recurring themes which are applicable in both eastern and western religions, cross-cultural examples are provided for each term to give a comprehensive overview of the subject. Subjects covered include: afterlife comparative religion festivals ethics gender monotheism world religions modernity pilgrimage theism secularization With cross

referencing and further reading provided throughout, this book provides an inclusive map of the discipline, and is an essential reference for all students, academics and researchers.

The relevance of contextual perspectives in religious education has been growing for the last decade. It has been central to the European Network for Religious Education through Contextual Approaches (ENRECA) – the research network that has produced the present book. Several members of the network have contributed to the theoretical and empirical development of contextual approaches in different publications, but for the first time this has been the focus of an entire collectively produced volume. The history of the book dates back to research seminars in 2009 and 2010

and is based on the discussions in the seminar. The chapters have been developed through a process of critical examination. Through this process we believe to have produced a coherent and also comprehensively rich book, dealing with the issue of context as a challenge, and also a stimulus to religious education research and practice. The chapters are presenting both empirical research and scholarly investigation into methodological and theoretical dimensions. Taken together we hope that this book will contribute to the further development of

contextual thinking in religious education research. Or aim has not been to answer all questions, but rather to pose questions and to complicate things in order to enrich the academic field of religion in education.

For billions of people, having a religious belief system provides purpose in life. For some, religion serves as a guide for moral behavior.

Today's world is one in which our understanding of world religions is both understatedly important, as well as increasingly complex. After many years exploring the foundations of various world religions, Jason Boyett has written this comprehensive, easy-to-understand exploration

of the twelve major world religions through a meticulous, yet unbiased lens. 12 Major World Religions offers an impartial look at where each of these belief systems intersects, how they differ, and why some have been—or are currently—misunderstood.

This text gives students a framework for their comparative study of religion that includes full, in-depth descriptions of each "way of being religious."

Examining the constitutional and legal foundations of the place of religion in India, Articles of Faith studies the relationship between religion and state. It closely analyses the decisions of the Supreme Court from the 1950s on Articles 25–30 of the Indian Constitution, as well as other relevant laws and constitutional provisions. The book discusses the

Supreme Court's interpretation of the constitutional right to freedom of religion and its influence on the discourse of secularism and nationalism. While examining the role of the Court in defining and demarcating religion as well as religious freedom, practices, and organizations, this volume also highlights important issues such as interpretative traditions and legal doctrines developed by the judiciary over the years. This new edition has an expanded and revised introduction, which looks at the new literature on secularism and religious jurisprudence, both in India and other secular democracies. It also includes an afterword, which examines recent

An intelligent tutoring system (ITS) is a computer program that is aimed at providing knowledgeable, individualized instruction in a one-on-one interaction with a learner. In order to individualize this interaction, the ITS must keep track of many aspects of the learner: how much and what he or she has learned to date; what learning styles seem to be successful for the student and what seem to be less successful; what deeper mental models the student may have; motivational and affective

issues, and implications of discovering life beyond Earth. What do the concepts of life and intelligence, culture and civilization, technology and communication mean in a cosmic context? What are the theological and philosophical implications if we find life - and if we do not? Steven J. Dick argues that given recent scientific findings, the discovery of life in some form beyond Earth is likely and so we need to study the possible impacts of such a discovery and formulate policies to deal

developments in religions worldwide. Every chapter opens with a substantial overview which orients the new student and then flows into a carefully chosen set of texts - a regular textbook is now combined with a Reader. New content examines areas such as the Rastafarian tradition, while revised chapters cover secular humanism and indigenous and emerging religious traditions. The methodology of the book focuses on an empathetic approach - representing each tradition from the perspective of a conventional adherent - enabling students to develop understanding of each tradition and appreciate similarities and differences in their most typical forms. Invites
