It is a stirring call for us all to complete the daunting transition from victims to victors, from helplessness to hope. *Come On, People* will encourage you to set aside excuses and make a better life today—for you, for your children, for your community, and for your future.

An unprecedented and comprehensive account of the unique role of today's lawyer litigating in the court of public opinion. Coffey's examination of the highest profile cases in recent years teaches all of us—whether experienced lawyer or average citizen—sobering and fascinating lessons about the contemporary, multidimensional life of the law. This book is a rare...combination of autobiography, gripping journalism, legal analysis, and a how-to-manual that will fascinate both those who live to litigate such cases, as well as the many who simply cannot look away when courtroom drama spills into popular consciousness. --Nathaniel Persily, Charles Keller Beekman Professor of Law and Political Science, Columbia Law School; Coeditor of *Public Opinion and Constitutional Controversy* Kendall Coffey has walked the walk, so when he starts to talk the talk in his new book, it is well worth reading. His profound insights into some of the key cases of our time, together with tidbits from cases of the past, make this the perfect book to read. *Spinning the Law* provides more than just an account of key, recent trials; it serves as a handbook on the lessons of the 'Trials of the Centuries.' --Laurie L. Levenson, Professor of Law, David W. Burcham Chair of Ethical Advocacy, Loyola Law School Foreword by Alan Dershowitz - professor of law, Harvard Law School and author of *Trials of Zion* High-profile courtroom dramas fascinate our nation, especially when they concern the rich and famous. And while the American public has come to realize that the spin factor is a prime ingredient in political tactics and marketing campaigns, many are unaware of the strategies for shaping public opinion when it comes to major courtroom battles. This behind-the-scenes analysis of media strategies presents an intriguing, often entertaining curriculum that they do not teach in law school or journalism classes. As the lead counsel in some of the country's most notable cases and a savvy legal commentator with hundreds of television appearances, author Kendall Coffey brings a distinctive combination of depth as a legal practitioner and experience as a media analyst to this insightful, provocative, and practical book. He begins with an historic election fraud trial, relying on his personal experience with the basics of law spin. He guides the reader through an engrossing tour of spinning cases through the ages—including Socrates and Joan of Arc, as well as the Charles Lindbergh kidnapping. Modern cases include the O. J. Simpson trial, the author's own experiences in the Elian Gonzalez controversy—and his thoughts on the possible overwhelming effect that case had on Florida in the controversial 2000 presidential election. Coffey also examines some of the most famous cases of recent times, including those of Michael Jackson, Kobe Bryant, Martha Stewart, Scott Peterson, Gordon Scooter Libby, and impeached former Governor Rod Blagojevich. Along the way, the author exposes many of the myths associated with the law, debunking assumptions about legal concepts ranging from circumstantial evidence and cooperating witnesses to so-called prosecutors' vendettas. Coffey's many entertaining examples and explanations make this book ideal reading for everyone fascinated by celebrity legal problems but must reading for lawyers, public relations professionals, journalists, and media students. Kendall Coffey (Miami, FL), a former U.S. Attorney who headed up the largest federal prosecutors' office in America, is the founding member of and a partner at Coffey Burlington, PL. Following his service as a U.S. Attorney, he was closely involved with the Elian Gonzalez case and the 2000 presidential election recount. A leading media commentator on high-profile cases, he has appeared on the Today show, Larry King Live, Good Morning America, Anderson Cooper 360, HLN, and numerous other nationally televised programs.

In this prize-winning book Nathan O. Hatch offers a provocative reassessment of religion and culture in the early days of the American republic, arguing that during this period American Christianity was democratized and common people became powerful actors on the religious scene. Hatch examines five distinct traditions or mass movements that emerged early in the nineteenth century—the Christian movement, Methodism, the Baptist movement, the black churches, and the Mormons—showing how all offered compelling visions of individual potential and collective aspiration to the unschooled and unsophisticated. "Rarely do works of scholarship deserve as much attention as this one. The so-called Second Great Awakening was the shaping epoch of American Protestantism, and this book is the most important study of it ever published."—James Turner, *Journal of Interdisciplinary History* "The most powerful, informed, and complex suggestion yet made about the religious, political, and psychic 'opening' of American life from Jefferson to Jackson. . . . Hatch's reconstruction of his five religious mass movements will add popular religious culture to denominationalism, church and state, and theology as primary dimensions of American religious history."—Robert M. Calhoon, *William and Mary Quarterly* "Hatch's revisionist work asks us to put the religion of the early republic in a radically new perspective. . . . He has written one of the finest books on American religious history to appear in many years."—James H. Moorhead, *Theology Today* The manuscript version of this book was awarded the 1988 Albert C. Outler Prize in Ecumenical Church History from the American Society of Church History Awarded the 1989 book prize of the Society for Historians of the Early American Republic for the best book in the history of the early republic (1789-1850) Co-winner of the 1990 John Hope Franklin Publication Prize given by the American Studies Association for the best book in American Studies Nathan O. Hatch is professor of history and vice president for Graduate Studies and Research at the University of Notre Dame.

The eagerly anticipated inspirational memoir from Michelle Obama's brother, celebrating the extraordinary family members and mentors who have shaped his life When he stepped into history's spotlight at the National Democratic Convention, Craig Robinson recalls that nothing could have been more gratifying than introducing his sister, Michelle

Obama, to millions of Americans. Within minutes, he won the hearts of the nation by sharing highlights of growing up in the modest Robinson household, where the two were raised by devoted parents who taught them the values of education, hard work, and the importance of reaching far beyond what even seemed possible. Those lessons of character were fundamentals in shaping Craig Robinson's own remarkable journey: from his days playing street basketball on Chicago's Southside, while excelling academically, to admission at Princeton University, where he was later named Ivy League Player of the Year, twice. After playing professionally in Europe, Robinson made an about-face, entering the competitive field of finance. With his MBA from the University of Chicago, his meteoric rise landed him a partnership in a promising new venture. But another dream beckoned and Craig made the unusual decision to forego the trappings of money and status in the business world in order to become a basketball coach. He soon helped transform three struggling teams - as an assistant coach at Northwestern, then as head coach at Brown and now at Oregon State University. In his first season at OSU, he navigated what was declared to be one of the nation's best single season turnarounds. In *A Game of Character*, Robinson takes readers behind the scenes to meet his most important influences in his understanding of the winning traits that are part of his playbook for success. Central to his story are his parents, Marian and Fraser, two indefatigable individuals who showed their children how to believe in themselves and live their lives with conviction through love, discipline and respect. With insights into this exemplary family, we relive memories of how Marian sacrificed a career to be a full-time mom, how Fraser got up and went to work every day while confronting the challenges of multiple sclerosis, how Craig and Michelle strengthened their bond as they journeyed out of the Southside to Princeton University and eventually, the national stage. Heartwarming, inspiring, and even transformational, *A Game of Character* comes just at the right time in an era of change, reminding readers of our opportunity to work together and embrace the character of our nation, to make a difference in the lives of others and to pave the way for the next generation. For over a century, Black Greek fraternities have been at the forefront of leadership, achievement, and ground-breaking results. While the fraternities have graduate or alumni chapters through which some members are initiated through, the majority of the most-achieved members entered their respective fraternities through a chapter on a college campus. Many of those college campuses were Historically Black Colleges and Universities (HBCUs). *Tussle at the Top: The Over One Hundred Year Competition Between the Omegas and the Alphas* examines two of the prominent fraternities of that group - Omega Psi Phi and Alpha Phi Alpha. Not only does the book review historical events relative to Black Greeks - the Omegas and Alphas particularly - it also sets both their competition and collaborations within the context of the Civil Rights Movement.

In *Limbo*, award-winning journalist Alfred Lubrano identifies and describes an overlooked cultural phenomenon: the internal conflict within individuals raised in blue-collar homes, now living white-collar lives. These people often find that the values of the working class are not sufficient guidance to navigate the white-collar world, where unspoken rules reflect primarily upper-class values. Torn between the world they were raised in and the life they aspire too, they hover between worlds, not quite accepted in either. Himself the son of a Brooklyn bricklayer, Lubrano informs his account with personal experience and interviews with other professionals living in limbo. For millions of Americans, these stories will serve as familiar reminders of the struggles of achieving the American Dream.

"What does it mean to be Black in a white, middle-class community? Is it the ultimate symbol of success? Or will one pay in isolation, alienation, rootlessness? What price must one pay for paradise? Is the price too high? Beverly Daniel Tatum, a renowned authority on the psychology of racism, interviewed Black families in depth to identify the sacrifices and achievements necessary to survive and prosper in a white community. For the Black citizens of 'Sun Beach, ' dual-income households, religious affiliation, and extended families help maintain stability. But with assimilation comes an insidious 'hidden racism, ' subtly communicated when Black children aren't called on in class and revealed more fully in incidents of racial name-calling. By listening to the individual voices of these children and their parents, Dr. Tatum skillfully probes the complex questions of identity that arise for a visible people rendered invisible by their surroundings"--Publisher description.

America is disintegrating. The "one Nation under God, indivisible" of the Pledge of Allegiance is passing away. In a few decades, that America will be gone forever. In its place will arise a country unrecognizable to our parents. This is the thrust of Pat Buchanan's Suicide of a Superpower, his most controversial and thought-provoking book to date. Buchanan traces the disintegration to three historic changes: America's loss of her cradle faith, Christianity; the moral, social, and cultural collapse that have followed from that loss; and the slow death of the people who created and ruled the nation. And as our nation disintegrates, our government is failing in its fundamental duties, unable to defend our borders, balance our budgets, or win our wars. How Americans are killing the country they profess to love, and the fate that awaits us if we do not turn around, is what Suicide of a Superpower is all about.

Looks at racism in America, describes examples of its everyday occurrence, and discusses its implications for the practice and teaching of law

Timeless classic on the depths of God's love. Must read for every black to grasp their history and potential and every white seeking sensitivity toward their African-American brothers and sisters. With The Rage of a Privileged Class, Ellis Cose, a venerated and bestselling voice on American life, offered an eye-opening look at the simmering anger of the black middle class. Some sixteen years later, Cose has discovered this group is much less angry and even optimistic about its future, despite a flagging economy and a deeply divided body politic. With The End of Anger, Cose examines these new attitudes as well as the decline of white guilt and the intergenerational shifts in how blacks and whites view and interact with each other. Weaving material from interviews and two large and ambitious surveys, Cose—an esteemed journalist—offers an invaluable portrait of contemporary America, one that attempts to make sense of what a people do when the American dream, for some, is finally within reach, as one historical era ends and another begins. The End of Anger is an indispensable exploration of how mores change from one generation to the next and may well be the most important book dealing with race and class to be published in recent decades.

An exciting e-format containing 27 video clips taken directly from the CBS news archive of a brilliant, best-selling account of the Nixon era by one of America's most talented young historians. Between 1965 and 1972 America experienced a second civil war. Out of its ashes, the political world we know today was born. Nixonland begins in the blood and fire of the Watts riots-one week after President Johnson signed the Voting Rights Act, and nine months after his historic landslide victory over Barry Goldwater seemed to have heralded a permanent liberal consensus. The next year scores of liberals were thrown out of Congress, America was more divided than ever-and a disgraced politician was on his way to a shocking comeback: Richard Nixon. Six years later, President Nixon, harvesting the bitterness and resentment borne of that blood and fire, was reelected in a landslide even bigger than Johnson's, and the outlines of today's politics of red-and-blue division became already distinct. Cataclysms tell the story of Nixonland: • Angry blacks burning down their neighborhoods, while suburbanites defend home and hearth with shotguns. • The civil war over Vietnam, the assassinations, the riot at the Democratic National Convention. • Richard Nixon acceding to the presidency pledging a new dawn of national unity--and governing more divisively than any before him. • The rise of twin cultures of left- and right-wing vigilantes, Americans literally bombing and cutting each other down in the streets over political differences. • And, finally, Watergate, the fruit of a president who rose by matching his own anxieties and dreads with those of an increasingly frightened electorate--but whose anxieties and dreads produced a criminal conspiracy in the Oval Office.

Zeigler made a name for himself in South Carolina politics through his campaign for the U.S. Senate in 1972 against Strom Thurmond and a subsequent candidacy in the states 1974 Democratic gubernatorial primary. Unsuccessful in both, Zeigler nonetheless distinguished himself as a man of passionate convictions in the value of public service. His memoir recounts these and other defining moments from a life spent pursuing the public good, often against insurmountable opposition. A native of Florence, South Carolina, Zeigler represents a vanishing breed of public servantthe classically educated progressive rising from modest small-town roots and driven by a genuine sense of responsibility to better his community, state, and country. Throughout his career, Zeigler has faced the frustration of being on the verge of high office or important reform, yet ending up on the losing side or having played just a minor role in victory. Undaunted by these near misses, he takes satisfaction in the effort over the results.

"Paul Krugman is a hero of mine. Read his book."—Al Franken No one has more authority to call the shots the way they really are than award-winning economist Paul Krugman, whose provocative New York Times columns are keenly followed by millions. One of the world's most respected economists, Krugman has been named America's most important columnist by the Washington Monthly and columnist of the year by Editor and Publisher magazine. A major bestseller, this influential and wide-ranging book has been praised by BusinessWeek as Krugman's "most provocative and compelling effort yet," the New York Review of Books as "refreshing," and Library Journal as "thought-provoking...even funny." The American Prospect put it in vivid terms: "In a time when too few tell it like it is...[Krugman] has taken on the battle of our time." Built from Paul Krugman's influential Op-Ed columns for the New York Times, this book galvanized the reading public. With wit, passion, and a unique ability to explain complex issues in plain English, Krugman describes how the nation has been misled by a dishonest administration. In this long-awaited work containing Krugman's most influential columns along with new commentary, he chronicles how the boom economy unraveled: how exuberance gave way to pessimism, how the age of corporate heroes gave way to corporate scandals, how fiscal responsibility collapsed. From his account of the secret history of the California energy crisis to his devastating dissections of dishonesty in the Bush administration, from the war in Iraq to the looting of California to the false pretenses used to sell an economic policy that benefits only a small elite, Krugman tells the uncomfortable truth like no one else. And he gives us the road map we will need to follow if we are to get the country back on track. The paperback edition features a new introduction as well as new writings.

UP FROM SLAVERY The autobiography of Booker T Washington is a startling portrait of one of the great Americans of the late nineteenth and early twentieth century. The illegitimate son of a white man and a Negro slave, Washington, a man who struggled for his education, would go on to struggle for the dignity of all his people in a hostile and alien society. THE SOULS OF BLACK FOLK W.E.B. DuBois's classic is a major sociological document and one of the momentous books in the mosaic of American literature. No other work has had greater influence on black thinking, and nowhere is the African-American's unique heritage and his kinship with all men so passionately described. THE AUTOBIOGRAPHY OF AN EX-COLORED MAN Originally published anonymously, James Weldon Johnson's penetrating work is a remarkable human account of the life of black Americans in the early twentieth century and a profound interpretation of his feelings towards the white man and towards members of his own race. No other book touches with such understanding and objectivity on the phenomenon once called "passing" in a white society. These three narratives, gathered together in Three Negro Classics chronicle the remarkable evolution of African-American consciousness on both a personal and social level. Profound, intelligent, and insightful, they are as relevant today as they have ever been. The Autobiography of Booker T. The Democratization of American Christianity

In power for forty-four years and counting, Fidel Castro has done everything possible to define Cuba to the world and to itself -- yet not even he has been able to control the thoughts and dreams of his people. Those thoughts and dreams are the basis for what may become a post-Castro Cuba. To more fully understand the future of America's near neighbor, veteran reporter Eugene Robinson knew exactly where to look --

or rather, to listen. In this provocative work, Robinson takes us on a sweaty, pulsating, and lyrical tour of a country on the verge of revolution, using its musicians as a window into its present and future. Music is the mother's milk of Cuban culture. Cubans express their fondest hopes, their frustrations, even their political dissent, through music. Most Americans think only of salsa and the Buena Vista Social Club when they think of the music of Cuba, yet those styles are but a piece of a broad musical spectrum. Just as the West learned more about China after the Cultural Revolution by watching *From Mao to Mozart*, so will readers discover the real Cuba -- the living, breathing, dying, yet striving Cuba. Cuban music is both wildly exuberant and achingly melancholy. A thick stew of African and European elements, it is astoundingly rich and influential to have come from such a tiny island. From rap stars who defy the government in their lyrics to violinists and pianists who attend the world's last Soviet-style conservatory to international pop stars who could make millions abroad yet choose to stay and work for peanuts, Robinson introduces us to unforgettable characters who happily bring him into their homes and backstage discussions. Despite Castro's attempts to shut down nightclubs, obstruct artists, and subsidize only what he wants, the musicians and dancers of Cuba cannot stop, much less behave. Cubans move through their complicated lives the way they move on the dance floor, dashing and darting and spinning on a dime, seducing joy and fulfillment and next week's supply of food out of a broken system. Then at night they take to the real dance floors and invent fantastic new steps. *Last Dance in Havana* is heartwrenching, yet ultimately as joyous and hopeful as a rocking club late on a Saturday night.

Describes the life of the landscape architect responsible for New York's Central Park and Boston's Emerald Necklace including his lesser-known time spent as an influential journalist, early voice for the environment and abolitionist, all overshadowed by a tragic personal life. The African American population in the United States has always been seen as a single entity: a "Black America" with unified interests and needs. In his groundbreaking book, *Disintegration*, Pulitzer-Prize winning columnist Eugene Robinson argues that over decades of desegregation, affirmative action, and immigration, the concept of Black America has shattered. Instead of one black America, now there are four: • a Mainstream middle-class majority with a full ownership stake in American society; • a large, Abandoned minority with less hope of escaping poverty and dysfunction than at any time since Reconstruction's crushing end; • a small Transcendent elite with such enormous wealth, power, and influence that even white folks have to genuflect; • and two newly Emergent groups--individuals of mixed-race heritage and communities of recent black immigrants--that make us wonder what "black" is even supposed to mean.

Win Anyway is for anyone with the desire to reach for their own personal best. *Win Anyway* is *The Coach And Player's Guide To Success*. " I give *Win Anyway* a big thumbs up ! In my life, perseverance and passion have trumped what talent alone has ever had to offer. If you're never willing to give in, eventually everything will go your way." Jon Sanders, former pro basketball player and founder of 50allstars.com "Success may not happen exactly when you want it to, but those who never quit will "Win Anyway". I do highly recommend this book." Marissa Holbert, founder of passthaball.com

Instead of one black America, today there are four. "There was a time when there were agreed-upon 'black leaders,' when there was a clear 'black agenda,' when we could talk confidently about 'the state of black America'--but not anymore." --from *Disintegration* The African American population in the United States has always been seen as a single entity: a "Black America" with unified interests and needs. In his groundbreaking book, *Disintegration*, Pulitzer-Prize winning columnist Eugene Robinson argues that over decades of desegregation, affirmative action, and immigration, the concept of Black America has shattered. Robinson shows that the four black Americas are increasingly distinct, separated by demography, geography, and psychology. They have different profiles, different mindsets, different hopes, fears, and dreams. What's more, these groups have become so distinct that they view each other with mistrust and apprehension. And yet all are reluctant to acknowledge division. *Disintegration* offers a new paradigm for understanding race in America, with implications both hopeful and dispiriting. It shines necessary light on debates about affirmative action, racial identity, and the ultimate question of whether the black community will endure.

It's amateur hour at the White House. So says New York Times bestselling author Edward Klein in his new political exposé *The Amateur*. Tapping into the public's growing sentiment that President Obama is in over his head, *The Amateur* argues that Obama's toxic combination of incompetence and arrogance have run our nation and his presidency off the rails. "Obama was both completely inexperienced and ideologically far to the left of Americans when he entered the White House," says Klein. "And he was so arrogant that he didn't even know what he didn't know." Klein, who is known for getting the inside scoop on everyone from the Kennedys to the Clintons, reveals never-before-published details about the Obama administration's political inner workings and about Barack and Michelle's personal lives, including: The inordinate influence Michelle wields over Barack and her feud with a high-profile celebrity The real reason Rahm Emmanuel left the White House (it wasn't for family reasons) Why Valerie Jarrett's role is closer to that of Rasputin than impartial senior advisor Obama's problems with American Jews How Obama has purposefully forgotten and ignored those that put him in power, including the Kennedys, and the Jewish and African American communities in Chicago From Obama's conceited and detached demeanor, to his detrimental reliance on Michelle Obama and Valerie Jarrett's advice, to the Obamas' extravagant and out-of-touch lifestyle, *The Amateur* reveals a president whose blatant ignorance and incompetence is sabotaging himself, his presidency, and America.

The Malian native describes his life, from his time in Paris during the 1960s as a student to his immigration to the United States in 1974, where he became a professor of literature and film in New York.

A remarkable history of First Lady Michelle Obama's mixed ancestry, *American Tapestry* by Rachel L. Swarns is nothing less than a breathtaking and expansive portrait of America itself. In this extraordinary feat of genealogical research—in the tradition of *The Hemmingses of Monticello* and *Slaves in the Family*—author Swarns, a respected Washington-based reporter for the New York Times, tells the fascinating and hitherto untold story of Ms. Obama's black, white, and multiracial ancestors; a history that the First Lady herself did not know. At once epic, provocative, and inspiring, *American Tapestry* is more than a true family saga; it is an illuminating mirror in which we may all see ourselves.

A community of Black faith healers witness an event that will change their lives forever in this "hard-nosed, wise, funny" novel (*Los Angeles Times*). Set in a fictional city in the American South, the novel also "inhabits the nonlinear, sacred space and sacred time of traditional African religion" (*The New York Times Book Review*). Though they all united in their search for the healing properties of salt, some of them are centered, some are off-balance; some are frightened, and some are daring. From the men who live off welfare women to the mud mothers who carry their children in their hides, the novel brilliantly explores the narcissistic aspect of despair and the tremendous responsibility that comes with physical, spiritual, and mental well-being.

The Emperor Has No Clothes: Teaching About Race and Racism to People Who Don't Want to Know offers theoretical grounding and practical approaches for leaders and teachers interested in effectively addressing racism and other oppressive constructs. The book draws both on the author's extensive experience teaching about race and racism in classroom and community settings and from the theory and practice of a wide range of educators, activists, and researchers committed to social justice. The first chapter looks at the toxic consequences of our western cultural insistence on profit, binary thinking, and individualism to establish the theoretical framework for teaching about race and racism. Chapter two investigates privileged resistance, offering a psycho/social history of denial, particularly as a product of racist culture. Chapter three reviews the research on the construction and reconstruction of dominant culture both historically and now in order to establish sound strategic approaches that educators, teachers, facilitators, and activists can take as we work together to move from a culture of profit and fear to one of shared hope and love. Chapter four lays out the stages of a process that supports teaching about racist, white supremacy culture, explaining how students can be taken through an iterative process of relationshipbuilding, analysis, planning, action, and reflection. The final chapter borrows from the brilliant, brave, and incisive writer Dorothy Allison to discuss the things the author knows for sure about how to teach people to see that which we have been conditioned to fear knowing. The chapter concludes with how to encourage and support collective and collaborative action as a critical goal of the process.
