These new studies of Wittgenstein's "Tractatus" represent a significant step beyond recent polemical debate. They cover a wide range of themes, and show that close investigation into the composition of the work, and into the various influences on it, has much to yield in revealing the complexity and fertility of Wittgenstein's early thought.

Winner of Japan's Grand Prix for Crime Fiction • Edgar Award Finalist • Nothing in Japanese literature prepares us for the stark, tension-filled, plot-driven realism of Natsuo Kirino's award-winning literary mystery Out. This mesmerizing novel tells the story of a brutal murder in the staid Tokyo suburbs, as a young mother who works the night shift making boxed lunches strangles her abusive husband and then seeks the help of her coworkers to dispose of the body and cover up her crime. The coolly intelligent Masako emerges as the plot's ringleader, but quickly discovers that this killing is merely the beginning, as it leads to a terrifying foray into the violent underbelly of Japanese society. At once a masterpiece of literary suspense and pitch-black comedy of gender warfare, Out is also a moving evocation of the pressures and prejudices that drive women to extreme deeds, and the friendships that bolster them in the aftermath.

inglese-italiano - italiano-inglese

Francesco Koslovic—even his name straddles two cultures. And during the spring of 1955, in the village of Materada on the Istrian Peninsula, his two worlds are coming apart. Materada, the first volume of Fulvio Tomizza's celebrated Istrian Trilogy, depicts the Istrian exodus of the hundreds of thousands who had once thrived in a rich ethnic mixture of Italians and Slavs. Complicating Koslovic's own departure is his attempt to keep the land that he and his brother have worked all their lives. A picture of a disappearing way of life, a tale of feud and displacement, and imbued with the tastes, tales, and songs of his native Istria, Koslovic's story is a testament to the intertwined ethnic roots of Balkan history.

The purpose of this book is to describe a method, based on a set of technical and economic criteria, to estimate the profitability of a route for public passenger transportation by helicopters. We believe that the more intuitive method is to estimate initially the break-even point of economic activity that a transport operator undertakes. In order to make the discussion as light as possible some simplifications were introduced. These simplifications were based on the level of precision required by the calculation needs. On a few occasions we referred to empirical data because of the inherent difficulty to collect definitive data. Data as such sale price of helicopters are never willingly "disclosed" by manufacturers. Nonetheless for each figure it has reported the source or the calculation mechanism in order to make it simple to apply in different cases. We believe that nowadays the aviation expertise should always be accompanied by an economic vision in order to avoid unsustainable business or worse a loss of money. The report is a valuable aid for students of aerospace engineering, or for planner of helicopter routes, to estimate the economic capacity of a transport operator vs a business plan. We recommend some previous knowledges to use this book, particularly in reading the diagrams depicted into a helicopter flight manual; the analysis of the breakeven point of a business; and finally the knowledge of the use of electronic spreadsheets: such as: LibreOffice Calc, OpenOffice Calc, MS Excel, or similars. Chapter 2 provides some details about the "ground effect" which is often used from the helicopters to take off and to fly in particular situations. Chapter 3 describes the operative performances of the two helicopters used as reference for this book: the Eurocopter AS 365 N2 and the Agusta AW139. Chapter 4 deals with the economic sustainability of helicopters providing services for public transport with the analysis of the expenses that a helicopter operator has to go to. Chapter 5 provides information about how to set up a helicopter network. Chapter 6 describes how to analyse the profitability items of a specific route within the network. Chapter 7 is devoted to the simulation of the Route Scenarios. Chapter 8 contains a list of concluding topics. Chapter 9 contains the final considerations and some concluding reminds. Annex A describing the technical requirements to design ground level helipads. Annex B containing the IR OPS Class 1 Cat A helicopters requirements. Annex C describing takeoffs and landings for helicopter Class 1 Cat A.

CLIL (Content and Language Integrated Learning) has emerged since the millennium as a major trend in education. Written by Do Coyle, Philip Hood and David Marsh and drawing on their experience of CLIL in secondary schools, primary schools and English language schools across Europe, this book gives a comprehensive overview of CLIL. It summarises the theory which underpins the teaching of a content subject through another language and discusses its practical application, outlining the key directions for the development of research and practice. This book acknowledges the uncertainty many teachers feel about CLIL, because of the requirement for both language and subject knowledge, while providing theoretical and practical routes towards successful practice for all.

This landmark collection of essays by one of the world's greatest living authors makes Durs Grünbein's wide-ranging and multifaceted prose available in English for the first time, and is a welcome complement to Ashes for Breakfast, his first book-length collection of poetry in English. Covering two decades, The Bars of Atlantis unfolds the entire breadth and depth of Grünbein's essayistic genius. Memoiristic and autobiographical pieces that introduce Grünbein, the man and the author, and tell the story of the making of a poet and thinker toward the end of a century marked by global political strife, unprecedented human suffering, long decades of totalitarian rule, and, in its final quarter, the dawn of a new, post–Cold War world order; essays that focus on Grünbein's major philosophical and aesthetic concerns, such as the intersection of art and science, literature and biology, extended reflections on the existential, cultural, political, and ethical import of the poet's craft in the contemporary world; and, finally, explorations of the meaning of classical antiquity for the present—all contribute to making.

Arranged in alphabetical form, the entries in this thesaurus are suited to home, office and student use and are designed to provide the word being sought quickly. It contains over 150,000 entries with cross-referencing and both British and American English.

Ideologies of an Italian Self-made Painter

Fundamentals of Modern Aviation

In 1906 when the Creek Indian Chitto Harjo was protesting the United States government's liquidation of his tribe's lands, he began his argument with an account of Indian history from the time of Columbus. "For, of course, a thing has to have a root before it can grow." Yet even today most intelligent non-Indian Americans have little knowledge of Indian history and affairs those lessons have not taken root. This book is an in-depth historical survey of the Indians of the United States, including the Eskimos and Aleuts of Alaska, which isolates and analyzes the problems which have beset these people since their first contacts with Europeans. Only in the light of this knowledge, the author points out, can an intelligent Indian policy be formulated. In the book are described the first meetings of Indians with explorers, the dispossession of the Indians by colonial expansion, their involvement in imperial rivalries, their beginning relations with the new American republic, and the ensuing century of war and encroachment. The most recent aspects of government Indian policy are also detailed the good and bad administrative practices and measures to which the Indians have been subjected and their present situation. Miss Debo's style is objective, and throughout the book the distinct social environment of the Indians is emphasized—an environment that is foreign to the experience of most white men. Through ignorance of that culture and life style the results of non-Indian policy toward Indians have been centuries of blundering and tragedy. In response to Indian history, an enlightened policy must be formulated: protection of Indian land, vocational and educational training, voluntary relocation, encouragement of tribal organization, recognition of Indians' social groupings, and reliance on Indians' abilities to direct their own lives. The result of this new policy would be a chance for Indians to live now, whether on their own land or as adjusted members of white society. Indian history is usually highly specialized and is never recorded in books of general history. This book unifies the many specialized volumes which have been written about their history and culture. It has been written not only for persons who work with Indians or for students of Indian culture, but for all Americans of good will.

Italy's best crime writers present nine gripping, often darkly humorous short stories with setting ranging from Milan to Palermo by way of Rome and even Guadeloupe. The mafia is not just Sicilian but also Albanian, Croatian, and Chinese.

Special subject dictionaries with emphasis on science and technology

Born in Italy, the first avant-garde of the twentieth century - before Cubism, Dadaism and Surrealism - Futurism is a major landmark in the history of art and of modern thought. Rather than a school of painting or literature, it was a revolutionary movement whose aim was to create a new awareness and a new approach to the world in general and to art in particular. It embodied the determination to perpetually regenerate man confronted with the progress of technology (electricity, mechanization, telecommunication ...). The Futurists' challenge was to combine all the aspects of modernism within aesthetic creation, re-considering them both in a single dynamic sweep. Ranging from plastic arts to culinary arts, they gave birth to amazing works that would become references for the following avant-gardes, and today, a legacy claimed by many artists. In this reference summing-up, the author reviews the different aesthetic stages of the movement, from "plastic dynamism" in the 1910s to aeropainting in the 1930s, and examines the relationship, long the object of controversy, between the movement and the Italian Fascist government.

Filled with material that came to light after the publication of the firstdition in 1994, this updated edition includes interviews, new material fromfects supervisor Doug Turnbull and additional illustrations.
