Paul Downes combines literary criticism and political history in order to explore responses to the rejection of monarchism in the American revolutionary era. Downes' analysis considers the Declaration of Independence, Franklin's autobiography, Crèvecoeur's Letters from an American Farmer and the works of America's first significant literary figures including Charles Brockden Brown, Washington Irving and James Fenimore Cooper. He claims that the post-revolutionary American state and the new democratic citizen inherited some of the complex features of absolute monarchy, even as they were strenuously trying to assert their difference from it. In chapters that consider the revolution's mock execution of George III, the Elizabethan notion of the 'king's two bodies' and the political significance of the secret ballot, Downes points to the traces of monarchical political structures within the practices and discourses of early American democracy. This is an ambitious study of an important theme in early American culture and society.

Breaking 170 years of secrecy, this intriguing exposé takes a behind-the-scenes look at Yale's mysterious society, the Order of the Skull and Bones, and its prominent members, numbering among them Tafts, Rockefellers, Pillsburys, and Bushes. Explored is how Skull and Bones initiates have become senators, judges, cabinet secretaries, spies, titans of finance and industry, and even U.S. presidents, including George W. Bush. This book reveals that far from being a campus fraternity, the society is more concerned with the success of its members in the postcollegiate world. Included are a verified membership list, rare reprints of original Order materials revealing the interlocking power centers dominated by Bonesmen, and a peek inside the Tomb, their 140-year-old private clubhouse.

Ten Years of Change in Social Housing Neighbourhoods

This third edition has been written to thoroughly update the coverage of injection molding in the World of Plastics. There have been changes, including extensive additions, to over 50% of the content of the second edition. Many examples are provided of processing different plastics and relating the results to critical factors, which range from product design to meeting performance requirements to reducing costs to zero-defect targets. Changes have not been made that concern what is basic to injection molding. However, more basic information has been added concerning present and future developments, resulting in the book being more useful for a long time to come. Detailed explanations and interpretation of individual subjects (more than 1500) are provided, using a total of 914 figures and 209 tables. Throughout the book there is extensive information on problems and solutions as well as extensive cross referencing on its many different subjects. This book represents the ENCYCLOPEDIA on IM, as is evident from its extensive and detailed text that follows from its lengthy Table of CONTENTS and INDEX with over 5200 entries. The worldwide industry encompasses many hundreds of useful plastic-related computer programs. This book lists these programs (ranging from operational training to product design to molding to marketing) and explains them briefly, but no program or series of programs can provide the details obtained and the extent of information contained in this single sourcebook.

12 Beloved Disney Classic Little Golden Books (Disney Classic)

In a groundbreaking longitudinal study, researches studied seven similar social housing neighbourhoods in Ireland to determine what factors affected their liveability. In this collection of essays, the same researchers return to these neighbourhoods ten years later to see what's changed. Are these neighbourhoods now more liveable or leaveable? Social Housing, Disadvantage and Neighbourhood Liveability examines the major national and local developments that externally affected these neighbourhoods: the Celtic tiger boom, area-based interventions, and reforms in social housing management. Additionally, the book examines changes in the culture of social housing through studies of crime within social housing, changes in public service delivery, and media reporting on social housing. Social Housing, Disadvantage and Neighbourhood Liveability offers a new body of data valuable to researchers in Ireland and abroad on how to create more equitable and liveable social housing.
