book is excellent for the total beginner looking to start their journey to mastery, or the seasoned player needing some sight reading material. A collection of studies and compositions written to provide a creative approach to a common problem. Most guitar students have not worked through a methodical approach to reading music notation, which limits their personal progress and sometimes their career development. The author has approached the studies from two directions: horizontal, or up the fingerboard on individual strings, and positional. The first two parts of the book are extensively fingered and designed to

make intervals and melodic patterns more visually apparent by repetition of similar ideas in different locations on the neck. The third part contains five extended compositions, which draw from the author's jazz background. The first four include chord changes for duo practice, as well as challenging melodic lines in a variety of meters that may be used for the study of improvisation. The fifth piece is written in the Indian Raga style. Basic music theory and rhythmic studies are included in the appendices.

Forget the 10,000 hour rule— what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare?

Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much

easier to watch TV or surf the web . . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition— how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to

windsurf. Here are a few of the simple techniques he teaches:

Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better.

Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first.

Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice.

Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve.

First and foremost: THIS IS NOT A METHOD BOOK. It is precisely what it says it is: 300 Progressive Sight Reading Exercises! Volume One is comprised of 300 progressive eight-bar exercises that cover the keys of C Major, F Major, G Major, A Minor, D Minor and E Minor. Time signatures include 4/4 (Common Time), 3/4, 2/4, 6/8, and 2/2 (Cut Time). The remaining key signatures, additional time signatures, tempo markings and dynamics markings will be

covered in future volumes. All of the exercises are eight measures long. If one has done any study of formal analysis, they will find that eight measures is a typical 'period' of music and usually contains two, four-bar phrases (also typical in length). For example, many sonatinas, jazz standards, and pop songs use "32 Bar Form" (A A B A), "Binary Form" (A B), and "Ternary Form" (A B A), with each section often being eight bars. Thus, eight measures (one period of music) makes the perfect length for sight-reading studies in my opinion. How to use this book: Start where the exercises begin and work across the book - from exercise 1, 5, 9, 13

and so on until you get to a point where the music challenges you and then mark your ending point. The next practice, play exercises 2, 6, 10, 14, and so on... The next: 3, 7, 11, 15 and so on, and finally 4, 8, 12, 16, and so on. If you want to work at your "break point" (the point in the book where you can no longer play musically), work DOWN the page instead of across the pages. Note: This book is also available in a LARGE PRINT version that for printing purposes had to be divided into two books. If you have poor vision or want this book to be easy to SEE on an electronic device, you might prefer the Large Print Version. "These

books differ from conventional 'methods' in that technical and theoretical instructions have been omitted, in the belief that these are more appropriately left for the teacher to explain to the student." - Bela Bartok, Mikrokosmos. I whole-heartedly agree with Bartok's sentiment and if music teachers would ask their students what they like least (or hate the most) about typical lessons, it is the method books that win this contest EVERY TIME. I have completely eliminated method books from my own teaching practice and have much happier and more productive students than ever. While this book is intended to train sight-reading skills, it may

also be used by beginners or those new to reading to acquire basic reading skills, but it assumes one either has a teacher or can at least find C on their instrument. It starts at a very basic level (only three notes) and adds a new note, rhythm, or concept every four exercises and thoroughly reinforces them throughout the rest of the book. Next, the music's composition is a slave to its function: The purpose of the books is to train reading skill, and the exercises keep challenging the range that has been established by previous exercises as well as less-than-convenient intervallic skips. They are composed from a

'music-first' perspective, as opposed to an 'instrument-first' perspective, and are purposely composed to be difficult to memorize. For example, the first exercises begin on C because they are in the key of C, and then go on to sometimes start and end on different scale degrees of the same key. Those familiar with the Fundamental Modes will likely recognize what they are hearing, but those unfamiliar with these modes will likely be hearing something that sounds a bit different, or odd, until their ears acclimate to these sounds. I see many students go through this process with altered dominants and augmented

triads as well. Additionally, a 20th-century composition technique (Bartok, Stravinsky) - Serial Composition - has also been used on several of the pieces, so if your ears are unfamiliar with this type of music, you might at first be uncomfortable with what you are hearing.

Ever feel like you really don't know the guitar? You've learned to read some of the notes in open position, but the rest of the neck is just a landscape of lucky guesses. Many guitar method books simply give you the basics, but very rarely do they give you everything you need in order to feel confident in your reading and playing. The Missing Method can do just that! This method book is designed for anyone who has successfully completed any guitar method book and can read notation in open position. It explores the middle region of the neck, allowing you to practice reading and learning the notes beyond the open position. It also gives you the opportunity to practice reading notes in all 12 keys. This book is broken down into two sections. The first section teaches you

how to read the notes in the middle region of the neck. The second section explores the second region of the neck by allowing you to practice it in all 12 keys.

Sight Reading for Classical Guitar (Level IV-V) is designed for grade school or university level in either private tutoring or classroom instruction and is intended to be used by guitar students on a consistent basis. This volume, containing Levels Four and Five, continues the study of sight reading, providing material suitable for more advanced students. Both books can be used to establish a reading level for students entering a new environment of guitar instruction, whether it be private tuition or class lessons.
