Upside-Down Fish lives in a big tank at a pet store filled with lots of other fish. The other fish in the tank swim the right way up though, and they don' t understand why Upside-Down Fish is so different. This makes him very lonely. One day, a child comes into the store and chooses Upside-Down Fish as a pet. He is anxious that he won' t be accepted in his new tank, but much to his surprise, the new fish are friendly! They love that he is different and want to know what it' s like to have the sky below and the ground above. Upside-Down Fish realizes that it' s okay to be different—it' s what makes him so special. Kate Louise and Laura Matine' s The Upside-Down Fish is about being yourself and finding happiness with people who accept you for who you are. Inspired by the author' s own upside-down fish, this is a book for any child who feels a little different and needs that extra boost of confidence. Sky Pony Press, with our Good Books, Racehorse and Arcade imprints, is proud to publish a broad range of books for young readers—picture books for small children, chapter books, books for middle grade readers, and novels for young adults. Our list includes bestsellers for children who love to play Minecraft; stories told with LEGO bricks; books that teach lessons about tolerance, patience, and the environment, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

Explore an informative, playfully illustrated story about one of the world's most dangerous animals: the crocodile. You probably know a little about crocodiles already. They're reptiles, they have an awful lot of teeth, and they're pretty scary -- at least, the big ones are! They're not very fussy about what they eat, and when it comes to hunting down dinner, crocodiles are very determined . . . and very cunning. But there's more to crocodiles than just their appetites. They love to nap on warm sandbanks and cool off in calm waters, and crocodile mothers are very gentle with their babies. This fascinating look at one of Earth's most infamous creatures is full of information for amateur scientists, with back matter that includes an Index, notes on species, and suggestions for further reading.

Seven superb short stories from the bestselling author of Charlie and the Chocolate Factory and The BFG! Meet the boy who can talk to animals and the man who can see with his eyes closed. And find out about the treasure buried deep underground. A cleaver mix of fact and fiction, this collection also includes how master storyteller Roald Dahl became a writer. With Roald Dahl, you can never be sure where reality ends and fantasy begins. "All the tales are entrancing inventions." —Publishers Weekly

The State of the World's Biodiversity for Food and Agriculture presents the first global assessment of biodiversity for food and agriculture worldwide. Biodiversity for food and agriculture is the diversity of plants, animals and micro-organisms at genetic, species and ecosystem levels, present in and around crop, livestock, forest and aquatic production systems. It is essential to the structure, functions and processes of these systems, to livelihoods and food security, and to the supply of a wide range of ecosystem services. It has been managed or influenced by farmers, livestock keepers, forest dwellers, fish farmers and fisherfolk for hundreds of generations. Prepared through a participatory, country-driven process, the report draws on information from 91 country reports to provide a description of the roles and importance of biodiversity for food and agriculture, the drivers of change affecting it and its current status and trends. It describes the state of efforts to promote the sustainable use and conservation of biodiversity for food and agriculture, including through the development of supporting policies, legal frameworks, institutions and capacities. It concludes with a discussion of needs and challenges in the future management of biodiversity for food and agriculture. The report complements other global assessments prepared under the auspices of the Commission on Genetic Resources for Food and Agriculture, which have focused on the state of genetic resources within particular sectors of food and agriculture.

This text looks at disability mainly from the perspective of the disabled child, their families and their helpers. It should also be relevant to the able-bodied child, helping to give them a platform to better understand and learn to support the disabled children around them. The overall tone of the book is a positive one, yet it still acknowledges that it can be very frustrating for a disabled child in a world built for able-bodied people. It covers the full range of emotions which a disabled child may feel, as well as the sometimes complex feelings of the people around them.
