9/10 Stock Orchard Street, colloquially known as the Straw House, is a house and an office designed by two architects for their own use. Completed in 2000, the buildings were

experimental in design, execution and inhabitation, and have resisted categorization, challenged received wisdom and provoked debate, especially among

Architecture depends—on what? On people, time, politics, ethics, mess: the real world.

Architecture, Jeremy Till argues

Read Online Dp Architects On Orchard Road Evolution Of A Retail Streetscape

with conviction in this engaging, sometimes pugnacious book, cannot help itself; it is dependent for its very existence on things outside itself. Despite the claims of autonomy, purity, and control that architects like to make about

Read Online Dp Architects On Orchard Road Evolution Of A Retail Streetscape

their practice, architecture is buffeted by uncertainty and contingency. Circumstances invariably intervene to upset the architect's best-laid plans—at every stage in the process, from design through construction to

occupancy. Architects, however, tend to deny this, fearing contingency and preferring to pursue perfection. With *Architecture Depends*, architect and critic Jeremy Till offers a proposal for rescuing architects

from themselves: a way to bridge the gap between what architecture actually is and what architects want it to be. Mixing anecdote, design, social theory, and personal experience, Till's writing is always accessible,
