New York Times Bestseller An exciting—and encouraging—exploration of creativity from the author of *When: The Scientific Secrets of Perfect Timing*
The future belongs to a different kind of person with a different kind of mind: artists, inventors, storytellers—creative and holistic “right-brain” thinkers whose abilities mark the fault line between who gets ahead and who doesn’t. Drawing on research from around the world, Pink unlocks the surprising truth about motivating others) outlines the six fundamentally human abilities that are absolute essentials for professional success and personal fulfillment—and reveals how to master them. A Whole New Mind takes readers to a daring new place, and a provocative new way of thinking about a future that’s already here. *Golding’s* iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

The Goal

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual’s health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of When: The Scientific Secrets of Perfect Timing
Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That’s a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneraton. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

NATIONAL BESTSELLER • WINNER OF THE PULITZER PRIZE • A searing, post-apocalyptic novel about a father and son's fight to survive, this "tale of survival and the miracle of goodness only adds to McCarthy's stature as a living master. It's gripping, frightening and, ultimately, beautiful" (*San Francisco Chronicle*). A father and his son walk alone through burned America. Nothing moves in the ravaged landscape save the ash on the wind. It is cold enough to crack stones, and when the snow falls it is gray. The sky is dark. Their destination is the coast, although they don't know what, if anything, awaits them there. They have nothing; just a pistol to defend themselves against the lawless bands that stalk the road, the clothes they are wearing, a cart of scavenged food—and each other. The Road is the profoundly moving story of a journey. It boldly imagines a future in which no hope remains, but in which the father and his son, "each the other's world entire," are sustained by love. Awesome in the totality of its vision, it is an unflinching meditation on the worst and the best that we are capable of: ultimate destructiveness, desperate tenacity, and the tenderness that keeps two people alive in the face of total devastation.

Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In Ditch That Textbook, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. Ditch That Textbook is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

Couples spend an enormous amount of time and energy planning for the perfect wedding. But what about planning for the perfect marriage? In these times of rampant divorce and "relationship" crises, it makes sense to think seriously about the many challenges of married life that loom so large today. The Book of Marriage offers a treasury of marital wisdom from across the ages. Intellectually engaging, morally rich, and ideologically balanced, this anthology gathers some of the deepest, wittiest, and most edifying perspectives on the big questions of married life: Why get married at all? Can love last a lifetime? How do we handle money? Who's the boss? What about children? Conflict? Growing old? Illness and death? There is even a chapter on divorce – one calculated to save a few marriages. To date there has been no single comprehensive book of source readings on marriage and family life. Assembled with the aid of noted scholars from various fields, this volume treats marriage as more than just a relationship -- as an institution, a vocation, and a source of great spiritual and emotional rewards. Each chapter introduces a different quandary of marriage and then culls the best from ancient and modern writings on the theme. The compendium of cultural wisdom on marriage ranges from the Bible and Eastern wisdom to Aristotle, St. Augustine, Maimonides, and Judith Wallerstein; from Homer, Shakespeare, Milton, and Jane Austen to Edward Albee, Gabriel Garcia Marquez, and Bill Cosby. An important resource for young adults, college students, engaged and married couples, educators, marriage counselors, therapists, pastors, and other family professionals, The Book of Marriage celebrates the diversity and essential humanity of the marital experience in a way that is accessible, entertaining, and eminently useful.
