***Using a truly accessible and reader-friendly approach, Introduction to Statistics: Fundamental Concepts and Procedures of Data Analysis, by Howard M. Reid, redefines the way statistics can be taught and learned. Unlike other books that merely focus on procedures, Reid's approach balances development of critical thinking skills with application of those skills to contemporary statistical analysis. He goes beyond simply presenting techniques by focusing on the key concepts readers need to master in order to ensure their long-term success. Indeed, this exciting new book offers the perfect foundation upon which readers can build as their studies and careers progress to more advanced forms of statistics. Keeping computational challenges to a minimum, Reid shows readers not only how to conduct a variety of commonly used statistical procedures, but also when each procedure should be utilized and how they are related. Following a review of descriptive statistics, he begins his discussion of inferential statistics with a two-chapter examination of the Chi Square test to introduce students to hypothesis testing, the importance of determining effect size, and the need for post hoc tests. When more complex procedures related to interval/ratio data are covered, students already have a solid understanding of the foundational concepts involved. Exploring challenging topics in an engaging and easy-to-follow manner, Reid builds concepts logically and supports learning through robust pedagogical tools, the use of SPSS, numerous examples, historical quotations, insightful questions, and helpful progress checks.***

IF YOU DRIVE A VEHICLE, YOU NEED THIS BOOK! Here's the deal. We have a huge problem and it must be corrected immediately! From 2000 to 2018, we have had 768,828 people killed in United States in auto accidents (from National Safety Council's Accident Facts)! The past three years (2016""2018), we have had over 40,000 fatalities each year! These are the most in the past nine years, which tells me our training system is not working! This is UNACCEPTABLE! If you drive a vehicle, you need to go through this training! It will be one of the most important books you will ever read! How many of these people would have said they were good drivers? Yes, almost all of them! Fact: 25 percent of all fatal auto accidents are DUI accidents. The other 75 percent of the fatal accidents I classify as sober-related accidents! A problem this book will address in simple detail. Fact: The only way you would attend a driver safety course is by receiving a citation; you attend the class and say, "This was a great refresher. I'm glad I took it." This is not a refresher but a survival course! The solution to preventing these staggering statistics is retraining the 210 million drivers on the road with a fundamental, focus-concept training with accident situations. This training is intended to make you a proactive driver versus a reactive driver! Being reactive, most of the time, is too late! I have done much research and developed simple analogies, concepts, and accident-possibility situations that will change your mindset and driving behavior every time you get behind the wheel. Driving Institute of America (DIA) wants to make you a DIA-Certified Teen Driver versus just a teen driver! There is a huge difference! Your life is worth a whole lot more than the cost of this book! You will understand that every time you get behind the wheel, YOU ARE ENTERING THE MOST DANGEROUS PLACE IN THE WORLD!"THE PUBLIC HIGHWAYS! Never forget this! 100 PERCENT FOCUS AND SAFE DRIVING! "You saved my life three different ways!" ""Dee D., Austin, TX "I've been a driver for over thirty years and this training taught me some life-saving skills!" ""Matt T., Leander, TX "I definitely think everyone who drives a vehicle absolutely needs this training!" ""Tom J., Cedar Park, TX "It definitely made our teen more responsible by completing all the certifications. It was an eye opener!" ""Shorouk N., Austin, TX "Thank you, this information has helped me so much and it made me more attentive to my own driving habits." ""Deni H., Austin, TX "Yes, I believe everyone who completes this training will be a much more knowledgeable and safer driver." ""Karen E., Spokane, WA
