

East Grinstead West Sussex Robert Leech

This book outlines the importance of political institutions in achieving good governance within a democratic polity and sets forth an argument to explore what sorts of institutions do the job best. By focusing on 'centripetal institutions', which maximize both representation and authority by bringing political energy and actors toward the centre of a polity, the authors set forth a relatively novel theory of democratic governance, applicable to all political settings in which multi-party competition obtains. Basing their theory on national-level political institutions, the authors argue that there are three types of political institutions that are fundamental in securing a centripetal style of democratic governance: unitary (rather than federal) sovereignty, a parliamentary (rather than presidential) executive, and a closed-list PR electoral system (rather than a single-member district or preferential-vote system).

A topographical history of Surrey, by E. W. Brayley assisted by J. Britton and E. W. Brayley, jun. The geological section by G. Mantell

Legal and political theorist, common lawyer and parliamentary leader, historian and polyglot, John Selden (1584-1654) was a formidable figure in Renaissance England, whose real importance and influence are now being recognized once again. John Selden and the Western Political Tradition: An important role in the development of such early modern political ideas as modern natural law and natural rights, national identity and tradition, the political integration of church and state, and the effect of Jewish ideas on Western political thought. Selden's political ideas are among the most important of the age, and his work influenced contemporaries Grotius, Hobbes and Filmer. The book demonstrates how these ideas informed and influenced more familiar works of later thinkers like Burke.
