Just The Tips

It's the third volume of the Eisner-nominated EAST OF WEST. "There Is No Us" sees the breaking apart of the future-scape of America as the world races forward towards the apocalypse.

In 1054 CE, the Great Schism between Eastern and Western Christianity occurred, and the official break of communion between the two ancient branches of the church continues to this day. There have been numerous church commissions and academic groups created to try and bridge the ecumenical divides between East and West, yet official communion is still just out of reach. The thought of St. Maximus the Confessor, a saint of both churches, provides a unique theological lens through which to map out a path of ecumenical understanding and, hopefully, reconciliation and union. Through an exposition of the intellectual history of Maximus' theological influence, his moral and spiritual theology, and his metaphysical vision of creation, a common Christianity emerges. This book brings together leading scholars and thinkers from both traditions around the theology of St. Maximus to cultivate greater union between Eastern and Western Christianity.

"A ... personal detective story, an uncovering of secret pasts, and a book that explores the creation and development of world-changing legal concepts that came about as a result of the unprecedented atrocities of Hitler's Third Reich. East West Street looks at the personal and intellectual evolution of the two men who simultaneously originated the ideas of "genocide" and crimes against humanity," both of whom not knowing the other, studied at the same university with the same professor, in a city little known today that was a major cultural center of Europe, "the little Paris of Ukraine," a city variously called Lemberg, Lwów, Lvov, or Lviv ... Sands ... realized that his own field of international law had been forged by two men--Rafael Lemkin and Hersch Lauterpacht--each

of whom had studied law at Lviv University in the city of his grandfather's birth, each of whom had come to be considered the finest international legal mind of the twentieth century, each considered to be the father of the modern human rights movement, and each, at parallel times, forging diametrically opposite, revolutionary concepts of humanitarian law that had changed the world."--

Why the West Rules - For Now

A Saint for East and West

The far right is back with a vengeance. After several decades at the political margins, far-right politics has again taken center stage. Three of the world's largest democracies – Brazil, India, and the United States – now have a radical right leader, while far-right parties continue to increase their profile and support within Europe. In this timely book, leading global expert on political extremism Cas Mudde provides a concise overview of the fourth wave of postwar far-right politics, exploring its history, ideology, organization, causes, and consequences, as well as the responses available to civil society, party, and state actors to challenge its ideas and influence. What defines this current far-right renaissance, Mudde argues, is its mainstreaming and normalization within the contemporary political landscape. Challenging orthodox thinking on the relationship between conventional and far-right politics, Mudde offers a complex and insightful picture of one of the key political challenges of our time.

ODY-C, modeled after Homer's Odyssey, is a psychedelic, gender-broke science-fiction epic that tells the story of three legendary warrior-queens, Odyssia, Ene and Gamem, returning home after a centuries-long battle. Ever since its first publication in 1992, The End of History and the Last Man has provoked controversy and debate. Now updated with a new afterword, The End of History and the Last Man is a modern classic.

Legend

East Of West Vol. 7

First published in single-magazine format as East of West #1-15 and The World One-Shot.

Why does the West rule? In this magnum opus, eminent Stanford polymath Ian Morris answers this provocative question, drawing on 50,000 years of history, archeology, and the methods of social science, to make sense of when, how, and why the paths of development differed in the East and West — and what this portends for the 21st century. There are two broad schools of thought on why the West rules. Proponents of "Long-Term Lock-In" theories such as Jared Diamond suggest that from time immemorial, some critical factor — geography, climate, or culture perhaps — made East and West unalterably different, and determined that the industrial revolution would happen in the West and push it further ahead of the East. But the East led the West between 500 and 1600, so this development can't have been inevitable; and so proponents of "Short-Term Accident" theories argue that Western rule was a temporary aberration that is now coming to an end, with Japan, China, and India resuming their rightful places on the world stage. However, as the West led for 9,000 of the previous 10,000 years, it wasn't just a temporary aberration. So, if we want to know why the West rules, we need a whole new theory. Ian Morris, boldly entering the turf of Jared Diamond and Niall Ferguson, provides the broader approach that is necessary, combining the textual historian's focus on context, the anthropological archaeologist's awareness of the deep past, and the social scientist's comparative methods to make sense of the past, present, and future — in a way no one has ever done before.

THE QUEST Death begins his great hunt, lines are drawn among the chosen, and the Ranger picks up the scent of his prey.

"THE LAST TWO BROTHERS IN THE WORLD" The final days of the Armageddon draw near.
