This unique and comprehensive collection investigates the challenges posed to intellectual property by recent paradigm shifts in biology. It explores the legal ramifications of emerging technologies, such as genomics, synthetic biology, stem cell research, nanotechnology, and biodiscovery. Extensive contributions examine recent controversial court decisions in patent law such as Bilski v. Kappos, and the litigation over Myriad's patents in respect of BRCA1 and BRCA2 while other papers explore sui generis fields, such as access to genetic resources, plant breeders' rights, and traditional knowledge. The collection considers the potential and the risks of the new biology for global challenges such as access to health-care, the protection of the environment and biodiversity, climate change, and food security. It also considers Big Science projects such as biobanks, the 1000 Genomes Project, and the Doomsday Vault. The inter-disciplinary research brings together the work of scholars from Australia, Canada, Europe, the UK and the US and involves not only legal analysis of case law and policy developments, but also historical, comparative, sociological, and ethical methodologies. Intellectual Property and Emerging Technologies will appeal to policy-makers, legal practitioners, business managers, inventors, scientists and researchers.

This chance meeting between Sara and Jack and the choices they both made in the wake of it would eventually have profound consequences, both for themselves and for those closest to them for decades afterwards. Set amidst the dynamic optimism of postwar New York and the subsequent nightmare of the McCarthy era, *The Pursuit of Happiness* is a great, tragic love story; a tale of divided loyalties, decisive moral choices and the random workings of destiny.

This Technical Note discusses findings of interconnectedness and spillover analysis on Italy. The market-based measures of tail risks and interconnectedness among key banks and insurance companies in Italy have declined from their peak but remain at elevated levels. Although the stress on Banca Monte dei Paschi di Siena has been manifesting on its own, the market perception about the condition of the banks appears to be increasingly contaminating the market views on other Italian financial institutions. It is also observed that exogenous factors, such as the Italian sovereign, are the key source of systemic risk for the market pricing of Italian financial institutions. Every year over a million people pack the streets of London's Notting Hill for Carnival, but as the carnival-

Born in Trinidad in 1915, Claudia Jones's family moved to Harlem, New York, where the young Claudia became a leading figure in Communist and black politics. Forced into exile in Britain in 1955, Jones arrived in London penniless and friendless. She became active in civil rights campaigns amongst the new West Indian communities established in the capital and launched an annual Carnival to showcase the talents and culture of the Afro-Caribbean community. The book's particular focus is on the time that Jones spent in Britain. *Claudia Jones: A Life in Exile* is a fitting and long overdue testament to a remarkable woman who was quite simply years ahead of her time. Marika Sherwood has published many articles on various aspects of the history of black people in Britain. A founder member of the Black and Asian Studies Association, she is still its secretary, conference organiser, and editor of its Newsletter. Her most recent books are *The 1945 Manchester Pan-African Congress Revisited*, with Akim Adi (1995), and *Kwame Nkrumah: the Years Abroad 1935-1947* (1996)
