Rule of Law presents a sustained critique of global rule of law promotion - an expansive industry at the heart of international development, post-conflict reconstruction and security policy today. While

successful in articulating and disseminating an effective global public policy, rule of law promotion has largely failed in its stated objectives of raising countries out of poverty and taming violent conflict.

Furthermore, in its execution, this work deviates sharply from 'the rule of law' as commonly conceived. To explain this, Stephen Humphreys draws on the history of the rule of law as a concept, examples
