The adoption and management of the common currency has led the Eurozone to a critical point. This book analyzes in an interdisciplinary way the fundamental causes of distress, making sure to relate economic issues to the social and political aspects of the problem. The book explores the reasons why the Eurozone has fallen into a policy trap, as well as what Europe did and should do to exit the crisis, and why this is proving to be so difficult. The book also considers what role the United States has played, and could play to help foster a solution for the Eurozone. The main topics explored are the complex nature of the crisis, the short circuit between policies and the given institutional architecture, the controversial role of Germany, and the importance of an active role of the US. The book brings together a transatlantic group of scholars in order to offer an interdisciplinary analysis of the deep causes of the Eurozone distress. The authors recognize that the Eurozone countries have contrasting situations and interests and face different problems with complex consequences for the vexed question of national sovereignty within the EU; and pay attention to the social and political consequences of the economic and financial distress and of the perceived strain of the common currency.

Across Africa, a burgeoning middle class has become the poster child for the ‘Africa rising’ narrative. Ambitious, aspirational and increasingly affluent, this group is set to embody the values and hopes of the new Africa, with international bodies ranging from the United Nations Development Programme to the World Bank regarding them as important agents of both economic development and democratic change. This narrative, however, obscures the complex and often ambiguous role that this group actually plays in African societies. Bringing together economists, political scientists, anthropologists and development experts, and spanning a variety of case studies from across the continent, this collection provides a much-needed corrective to the received wisdom within development circles, and provides a fresh perspective on social transformations in contemporary Africa.
