Spread out over many years and many different publications, the late author and activist Marta Russell wrote a number of groundbreaking and insightful essays on the nature of disability and oppression under capitalism. In this volume, Russell's various essays are brought together in one place in order to provide

challenge for the twenty-first century. With constraints on water, arable land, and other natural resources, agricultural innovation is a promising path to meeting the nutrient needs for future generations. At the same time,

## Online Library Economics Industry And Disability

potential increases in the variability of the world ' s climate may intensify the need for developing new crops that can tolerate extreme weather. Despite the key role for scientific breakthroughs, there is an active

discussion on the returns to public and private spending in agricultural R&D, and many of the world ' s wealthier countries have scaled back the share of GDP that they devote to agricultural R&D. Dwindling public support leaves

## Online Library Economics Industry And Disability

universities, which historically have been a major source of agricultural innovation, increasingly dependent on industry funding, with uncertain effects on the nature and direction of agricultural research. All of

## Online Library Economics Industry And Disability

these factors create an urgent need for systematic empirical evidence on the forces that drive research and innovation in agriculture. This book aims to provide such evidence through economic analyses of the sources

of agricultural innovation, the challenges of measuring agricultural productivity, the role of universities and their interactions with industry, and emerging mechanisms that can fund agricultural R&D.
