The major goals of this revision have been to streamline the text and to present more student oriented examples. We are also providing a new design with enhanced four colour graphics. Much fine tuning and trimming has gone into almost every chapter resulting in a more approachable textbook for your students. Several chapters that are rarely used will now appear on the book's website. The 9th edition will be much better integrated with the book's website where students can get additional information and/or current events associated with many major topics in the text. Also, the website will have "Want to see the Math Notes" for those instructors that choose a more sophisticated math treatment of the major topics in both Micro and Macro. Another commitment to Instructor Support will be the annual updating of time sensitive PowerPoint slides.

Economics

Self-interest, economic efficiency and private property rights are among the most basic assumptions of market economics. But can an economic theory built on these assumptions alone provide adequate insight into human nature, motivation and ultimate goals to guide our economic life? John Stapleford says no along with those economists who recognize the limits of their discipline. He insightfully shows us in detail how ethics are inextricably intertwined with economic life and analysis. Writing from a Christian ethical perspective, he interacts with seven standard introductory economics texts, exploring the moral challenges imbedded in various macro-, micro- and international economic theories and outlining a faithful response to them. Among the important ethical issues addressed are possibilities and perils of economic growth the role of government in the economy the growth of work and loss of leisure lending and borrowing poverty and distributive justice environmental stewardship business and social responsibility legalized gambling the pornography industry debt relief for less developed countries the economics of immigration population control Keyed to seven of the most widely used introductory economics texts--Gwartney, Stroup & Sobel; Mankiw; Mansfield & Behraves; McConnell & Brue; Miller; Samuelson & Nordhaus; and Stiglitz--this book will be especially useful for introductory courses in economics.

Fourth Edition of a study guide designed to help students of economics and act as a guide to reading and working through the text 'Economics'. The guide contains checklists, key terms and concepts, chapter reviews, problems, projects, self-tests and answers and discussion questions.
