

Ecotourism 3rd Third Edition By Fennell David A Published By Routledge 2007

*****This title was originally published in 2007. The version published in 2012 is a PB reprint of the original HB** The protection of natural resources and biodiversity through protected areas is increasingly based on ecological principles. Simultaneously the concept of ecosystem-based management has become broadly accepted and implemented over the last two decades. However, this period has also seen unprecedented rapid global social and ecological change, which has weakened many protection efforts. These changes have created an awareness of opportunities for innovative approaches to managing protected areas and of the need to integrate social and economic concerns with ecological elements in protected areas and parks management. A rare collection of articles that fuses academic theory, critique of practice and practical knowledge, Transforming Parks and Protected Areas analyzes and critiques these theories, practices, and philosophies, looking in-detail at the emerging issues in the design and operation of parks and protected areas. Addressing critical dynamics and current practices in parks and protected areas management, the excellent volume goes well beyond simple managerial solutions and descriptions of standard practice. With contributions from leading academics and practitioners, this book will be of value to all those working within ecology, natural resources, conservation and parks management as well as students and academics across the environmental sciences and land use management.***

Focusing on an array of economic, social and ecological inconsistencies that continue to plague ecotourism in theory and practice, this book examines ecotourism in reference to other related forms of tourism, impacts, conservation, sustainability, education and interpretation, policy and governance, and the ethical imperative of ecotourism as these apply to the world’s greenest form of tourism. This revised edition includes: new information on the magnitude of the tourism industry, nature-based tourism and the pros and cons of mass ecotourism revised chapters on development, economics, marketing, policy, ecotourism in practice and biodiversity conservation a section on governance models, ecotourism programmes, operators and guides, interpretation, certification, and ecologue design a discussion of ecotourism as an ethical or responsible form of tourism approximately 300 new references. It includes case studies and considers the perspectives of many adjacent fields, including geography, economics, business, philosophy, biology, and environmental studies. Since the first edition of the title, ecotourism has become a major phenomenon in tourism and society in many countries and regions throughout the world. The profusion of experiences has generated a variety of means of theorizing, analysing and marketing ecotourism, all that have yet to be encompassed in one book. Ecotourism fills the gap by synthesising the changes in thinking and society over the last decade. This third edition has been fully revised and updated to include: updated chapters addressing modern thought and discourse, including neoliberalism, consumer culture and quality management in the ecotourism industry; critical analysis drawn from a range of theoretical frameworks, which models and advances the thinking in ecotourism towards a socio-geographical analysis; new and international case studies from emerging markets such as China and Brazil. Providing a critical introduction to the analysis of tourism from a sociological and geographical perspective, the title is essential reading for higher-level and graduate students and researchers in tourism, sociology and geography. It will also be of interest to environmental groups and practitioners.

"The new edition focuses on economic, social and ecological inconsistencies that continue to plague ecotourism in theory and practice, and examines the sector in reference to other related forms of tourism, impacts, conservation, sustainability, education and interpretation, policy and governance, and the ethical imperative of ecotourism. An essential reference for those interested in ecotourism, the book is accessible to students, but retains the depth required for use by researchers and practitioners in the field. It book will be of interest to students across a range of disciplines including geography, economics, business, ethics, biology, and environmental studies"--

Cultural Tourism

21st Century Homestead: Sustainable Agriculture I

Capturing the Benefits of Ecotourism

Conservation and Development

Ecotourism and Environmental Sustainability

Tourism and Sustainability

In a world characterized by an encroaching homogeneity induced by the growth of multi-national corporations and globalization, the causes of difference accrue new levels of importance. This is as true of tourism as in many other spheres of life – and one cause of differentiation for tourism promotion is the culture of Indigenous Peoples. This offers opportunities for cultural renaissance, income generation and enhanced political empowerment, but equally there are possible costs of creating commodities out of aspects of life that previously possessed spiritual meaning. This book examines these issues from many different perspectives; from those of product design and enhancement; of the aspirations of various minority groupings; and the patterns of displacements that occur – displacements that are not simply spatial but also social and cultural. How can these changes be managed? Case studies and analysis is offered, derived from many parts of the globe including North America, Asia and Australasia. The contributors themselves have, in many instances, worked closely with groups and organizations of Indigenous Peoples and attempt to give voice to their concerns. The book is divided into various themes, each with a separate introduction and commentary. The themes are Visitor Experiences, Who manages Indigenous Cultural Tourism Product, Events and Artifacts, Conceptualisation and Aspiration. In a short final section the silences are noted – each silence representing a potential challenge for future research to build upon the notions and lessons reported in the book. The book is edited by Professor Chris Ryan from New Zealand, and Michelle Aicken of Horwath Asia Pacific.

This is an issue-based book that discusses the responsibility or otherwise of tourism activities in the geographic context of Latin America and the Caribbean.

Cultural Tourism remains the only book to bridge the gap between cultural tourism and cultural and heritage management. The first edition illustrated how heritage and tourism goals can be integrated in a management and marketing framework to produce sustainable cultural tourism. The current edition takes this further to base the discussion of cultural tourism in the theory and practice of cultural and heritage management (CM and CHM), under the understanding that for tourism to thrive, a balanced approach to the resource base it uses must be maintained. An ‘umbrella approach’ to cultural tourism represents a unique feature of the book, proposing solutions to achieve an optimal outcome for all sectors. Reflecting the many important developments in the field this new edition has been completely revised and updated in the following ways:
• New sections on tangible and intangible cultural heritage and world heritage sites.
• Expanded material on cultural tourism product development, the cultural tourism market and consumer behaviour, planning and delivery of exceptional experiences
• New case studies throughout drawn from cultural attractions in developing countries such as Southeast Asia, China, South Africa and the Pacific as well as from the developed world, particularly the United States, Britain, Japan, Singapore, Australia and Canada.
Written by experts in both tourism and cultural heritage management, this book will enable professionals and students to gain a better understanding of their own and each other’s roles in achieving sustainable cultural tourism. It provides a blueprint for producing top-quality, long-term cultural tourism products.

This is a critical introduction to the relations between tourism, tourists, and tourism spaces. It fuses economic and cultural perspectives to explain how tourism is dependent on place and space, while at the same time as defining those places and spaces. Examining different levels of scale - from local to global - Tourism and Tourism Spaces is informed by the discussion of three key processes:
- production and consumption of tourist spaces
- consumption and commodification of tourist experiences
- construction and reconstruction of tourist spaces
Each chapter engages with different theoretical perspectives; is illustrated with comparative examples and case studies; uses tables, boxes and figures throughout; and concludes with a summary. An integrated and systematic review of a range of theoretical positions - that integrates economic and cultural - Tourism and Tourism Spaces will be a key resource for students of geography, sociology, management studies, hospitality studies, and leisure studies.

Principles, Practices & Policies for Sustainability

An Introduction to the Geography of Tourism

Communication, Race, and Outdoor Spaces

Environment and Tourism

The Encyclopedia of Ecotourism

Tourism and Responsibility

This comprehensive textbook has, at its core, the importance of linking strategic thinking with action in the management of tourism. It provides an analytical evaluation of the most important global trends, as well as an analysis of the impact of crucial environmental issues and their implications. Now in its third edition, and reviewing the major factors affecting international tourism management, this well-established student resource provides an essential overview of strategic management for students and professionals in the tourism sector.

In a report published by Oxfam in January 2014 it was noted that the World’s richest 85 people have as much wealth as the poorest 50% of the World’s population. A year later that figure had been updated to just 80 people. It is a global unevenness through which the barriers to in-migration of Third World migrants to wealthy first world nations go ever higher, whilst the barriers to travel in the reverse direction are all but extinct. So how exactly does tourism contribute to narrowing this glaring inequality and gap between the rich and the poor? Are ever expanding tourism markets - and the new, responsible, forms of tourism in particular - a smoke free, socio-culturally sensitive form of human industrialisation? Is alternative tourism really a credible lever for lifting poverty stricken countries out of the mire of global inequality, setting them on the right track to ‘development’, and eliminating poverty? Tourism and Sustainability critically explores and challenges what have emerged as the most significant universal geopolitical norms of the last half century - development, globalisation and sustainability - and through the lens of new forms of tourism demonstrates how we can better understand and get to grips with the rapidly changing new global order. The fourth edition has been extensively revised and updated, and benefits from the addition of a new chapter on Climate Change and Tourism. Drawing on a range of examples from across the Third World, Mowforth and Munt expertly illustrate the social, economic and environmental conditions that continue to affect the tourism industry. With the first edition hailed by Geoffrey Wall as ‘one of the most significant books produced on tourism [since the turn of the millennium]’, Tourism and Sustainability remains the essential resource for students of Human Geography, Tourism, Environmental Sciences, Politics, Development Studies, Anthropology, and International Business Studies.
?

This clear and engaging text introduces undergraduate students to the vast and diverse subject of tourism through the lens of geography. Indeed, geography and tourism have always been interconnected, and Velvet Nelson draws on human and physical geography to interpret all facets of tourismeconomic, social, and environmental. She shows how geography provides the tools and concepts to consider both the positive and negative factors that affect tourists and destinations, as well as the effects tourism has on both peoples and places. Her thematic approach uses real-world case studies, based on research and on the experiences of tourists themselves, to vividly illustrate key issues. This comprehensive introduction will enhance students’ understanding of geographic concepts and how they can be used as a way of viewing and understanding the world.

This book offers conceptual and practical insights into the complex interactions between ecotourism and the natural environment, with consideration given to government policy, marketing by suppliers, consumer behaviour and visitor/environmental management. Illustrated by international case studies the roles of and interplay between tour operators, their clients, resource managers and local communities are examined. This creates a comprehensive and insightful overview of the factors that work for and against the achievement of environmental sustainability in and through ecotourism. The result is a critical examination of ecotourism and environmental sustainability that highlights ideas for best practice and proposes new directions for future research

Strategic Management in Tourism, 3rd Edition. CABI Tourism Texts

Progress in Responsible Tourism Vol 3 (1)

Routledge Handbook of Ecotourism

Transforming Parks and Protected Areas

Handbook of Niche Tourism

Ecotourism and Sustainable Development, Second Edition

The Encyclopedia of Ecotourism provides an expert, state-of-the-art and comprehensive knowledge base of the rapidly growing global ecotourism sector. It is divided into eight major sections, and contains 41 chapters, individually authored by international researchers and practitioners in ecotourism. Each chapter combines theory and practice in a complementary way. The scope of the encyclopedia includes definitions and other contextual material, regional perspectives, venues, impacts, planning and management considerations, and issues associated with ecotourism businesses, research and training.

Records and debates the progress which is being made in the UK and around the world in the implementation of the Cape Town Declaration and its aspiration to see the development of more responsible forms of tourism. Written by leading thinkers and academics in the field they provide flexible, current and topical information as an instant download.

The worldwide development of ecotourism—including adventures such as mountain climbing and whitewater rafting, as well as more pedestrian pursuits such as birdwatching—has been extensively studied, but until now little attention has been paid to why vacationers choose to take part in what are often physically and emotionally strenuous endeavors. Drawing on ethnographic research and his own experiences working as an ecotour guide throughout the United States and Latin America, Robert Fletcher argues that participation in rigorous outdoor activities resonates with the particular cultural values of the white, upper-middle-class Westerners who are the majority of ecotourists. Navigating 13,000-foot mountain peaks or treacherous river rapids demands deferral of gratification, perseverance through suffering, and a willingness to assume risks in pursuit of continuous progress. In this way, characteristics originally cultivated for professional success have been transferred to the leisure realm at a moment when traditional avenues for achievement in the public sphere seem largely exhausted. At the same time, ecotourism provides a temporary escape from the ostensible ills of modern society by offering a transcendent "wilderness" experience that contrasts with the indoor, sedentary, mental labor characteristically performed by white-collar workers.

Issues In Agroecology – Present Status and Future Prospectus not only reviews aspects of ecology, but the ecology of sustainable food production systems, and related societal and cultural values. To provide effective communication regarding status and advances in this field, this series connects with many disciplines such as sociology, anthropology, environmental sciences, ethics, agriculture, economics, ecology, rural development, sustainability, policy and education, and integrations of these general themes so as to provide integrated points of view that will help lead to a more sustainable construction of values than conventional economics alone. Such designs are inherently complex and dynamic, and go beyond the individual farm to include landscapes, communities, and biogeographic regions by emphasizing their unique agricultural and ecological values, and their biological, societal, and cultural components and processes.

An Introduction

Native Tours

Tourism and Tourism Spaces

Ecotourism Third Edition

A Reader, Third Edition

Tourism and Poverty

Previous editions of Native Tours provided a much-needed overview and analysis of anthropology’s contributions to tourism as an emerging field of study. Such a cultural perspective illuminated key ideas surrounding worldwide host-guest relations and informed discussions of political and economic influences and the impacts, both negative and positive, of tourism as one of the world’s largest industries. Applying a characteristically uncluttered, authoritative writing style alongside an exceptional command of the relevant literature, Chambers updates, refines, and extends his earlier work. He retains a focus on the social, cultural, economic, and environmental consequences of tourism, and provides a framework for understanding tourism initiatives in their particular circumstances. Three detailed case studies originating in the American Southwest, the Tirolean Alps, and Belize illustrate the varied costs and benefits of tourism.

Tourism growth is one of the primary drivers of economic development and is a core strategy at local and national levels to improve the lives of local communities. However, tourism can bring both advantages and disadvantages to communities and not all national strategies in tourism management are applicable or suitable in private, community-based and public sectors. Tourism is used as a main instrument of nation building in many postcolonial countries such as Namibia, South Africa, Botswana and Madagascar. Using case studies from these areas, this book examines the strategic objectives for tourism growth and how nationally-set objectives such as economic growth, increased employment, poverty reduction, black economic empowerment, environmental sustainability and reduction of regional inequalities work at the grassroots level. Challenging ongoing practices and providing new innovations for tourism development applicable to other developing countries, this study will be useful for both researchers and decision makers in tourism.

This Handbook provides a critical analysis of the evolution of the contemporary niche tourism phenomenon. By framing discussions around sustainable development thinking, concepts and practical applications, each chapter provides specific reflections on niche tourism trends, successes and/or failures, and the challenges and opportunities that destinations that pursue tourism as a vehicle for sustainable development face around the world.

Exam Board: Edexcel Level: GCSE Subject: Geography First Teaching: September 2016 First Exam: Summer 2018 Endorsed for Edexcel Target success in Edexcel GCSE (9-1) Geography B with this proven formula for effective, structured revision; key content coverage is combined with exam-style tasks and practical tips to create a revision guide that students can rely on to review, strengthen and test their knowledge. With My Revision Notes every student can: - Plan and manage a successful revision programme using the topic-by-topic planner - Enjoy an active approach to revision with clear topic coverage and related 'Now Test Yourself' tasks and practical revision activities - Improve exam technique through exam tips and formal exam-style questions - Monitor their knowledge and progress using the answers provided for each 'Now Test Yourself' activity and exam-style question - Develop geographical understanding and enhance exam responses with case study material and located place examples

New Tourism Ventures

The Economics of National Park Entrance Fees in Costa Rica

Ecotourism

Perspectives from Latin America and the Caribbean

Tourism Management

This publication, intended as a preparatory document for the World Ecotourism Summit in Quebec, 2002, reviews the current status and trends in ecotourism globally, the challenges ahead and the lessons learned in over 15 years of ecotourism development involving a broad range of stakeholders.The document incorporates comments and suggestions from recognized academics, NGO representatives and inter-governmental agencies such as WTO, IUCN and UNEP. It provides an overview of the history and current thinking on what constitutes ecotourism, what constitutes an ecotourism experience and considers the components of successful ecotourism. The author considers the roles of various stakeholders: industry, both in originating and destination countries, NGOs, communities, women, government, development agencies and researchers. The document ends with a useful list of resource documents and organizations.

This title offers a synthesis of the burgeoning literature on ecotourism, with a necessarily selective approach to the key debates, issues and prospects for ecotourism.

For many people, holidays are an increasingly central feature of contemporary western society. The tourism industry has expanded rapidly since 1950, but this book poses the significant question of consequent environmental impacts: are environments being benefited or damaged, by the tourist who visit them? A well-balanced introductory text, this topical book on the relationships between tourism, society and the environment, examines 'tourism' and 'environment' in detail, and gives a historical overview of the growth of the tourism industry. It discusses how the tourism industry markets physical and cultural environments to be consumed by the tourist, and the consequences of the tourism they then attract. It explores: * how the economics of tourism can be adopted in a positive way to aid conservation * whether the concept of sustainability can be applied to tourism * provides a critique of the 'new' forms of tourism, that have developed in recent years. An extensive range of international case studies from both the developed and developing world are used to illustrate the theoretical ideas presented, and to aid the student, it includes end of chapter summaries, further reading guides and boxed vignettes focusing on contemporary environmental issues and debates.

Cultivate an interest in the agricultural sector with a three-level secondary course designed specifically for the Caribbean. - Explore regional and global practices and developments in agriculture. - Review career options in an increasingly lucrative and essential sector. - Enhance understanding of the relevance of agriculture with a project-based approach to select topics. - Prepare for study at the CSEC level with a dedicated project-based chapter scalable to other topics and the SBA research at the CSEC level. - Consolidate learning with clear chapter objectives and end of chapter evaluation.

Global Issues 2020 Edition

Tourism, Power And Space

Tourism and Poverty addresses a critical question facing many academics, governments, aid agencies, tourism organizations, and conservation bodies around the world: can tourism work as a tool to overcome poverty? This book is the first to present a focused description and critique of the issues surrounding poverty and tourism. Relying on a wealth of primary data on tourism, Regina Scheyvens supports her findings with novel case studies such as innovative partnerships between resorts and fledgling indigenous businesses in Fiji, Oxfam's work to connect the agriculture and tourism sectors in the Caribbean, and difficulties in alleviating poverty in the Maldives despite the growth of luxury tourism. This book will challenge the way academics and tourism professionals understand the current and potential role of tourism in alleviating poverty.

Decisions about the conservation and use of natural resources are made every day by individuals, communities, and nations. The latest edition of Field's acclaimed text highlights the incentives and trade-offs embedded in such decisions, providing a lucid introduction to natural resource issues using the analytical framework of economics. Employing a logical structure and easy-to-understand descriptions, Field covers fundamental economic principles and their general application to natural resource use. These principles are further developed in chapters devoted to specific resources. Moreover, this up-to-date volume addresses the challenge of achieving socially beneficial utilization rates in the twenty-first century amid continuing population growth, urbanization, and global climate change. Topics new to the Third Edition include: • implications of climate change on resources • fracking • energy intensity and the energy efficiency gap • reducing fossil energy • forests and carbon • international water issues • globalization and trade in natural resources

*Ecotourism Third Edition*Routledge

This handbook presents a timely, broad-ranging, and provocative overview of the essential nature of ecotourism. The chapters will both advance the existing central themes of ecotourism and provide challenging and divergent observations that will thrust ecotourism into new areas of research, policy, and practice. The volume is arranged around four key themes: sustainability, ethics and identity, change, conflict, and consumption, and environment and learning, with a total of 28 chapters. The first section focuses on sustainability as a core ecotourism criterion, with a primary focus on some of the macro sustainability issues that have an impact on ecotourism. Foremost among these topics is the linkage to the UN's Sustainable Development Goals, which have relevance to ecotourism as one of the greenest or most responsible forms of tourism. The chapters in the second section provide a range of different topics that pull ecotourism research into new directions, including a chapter on enriching indigenous ecotourism through culturally sensitive universalism. The third section includes chapters on topics ranging from persons with disabilities as a neglected body of research in ecotourism, to ecotourism as a form of luxury consumption. The final section emphasises the link between ecotourism and learning about the natural world, including a deeply theoretical chapter on rewilding Europe. With contributions from authors around the world, this handbook gives a global platform to local voices, in both developed and emerging country contexts. The multidisciplinary and international Routledge Handbook of Ecotourism will be of great interest to researchers, students, and practitioners working in tourism and sustainability.

Agricultural Science Book 3: A course for secondary schools in the Caribbean Third Edition

Indigenous Tourism

Integrating Agriculture, Conservation and Ecotourism: Examples from the Field

Volume 3, Issue 1

Romancing the Wild

Ecotourism is defined as "responsible travel to natural areas which conserves the environment and improves the welfare of local people." Many see it as a panacea for developing nations -- a source of clean development that can bring wealth to rural communities while simultaneously helping to preserve pristine environments. But has the reality lived up to the promise? And is that even possible.In Ecotourism and Sustainable Development, Martha Honey presents an overview of the ecotourism industry and a first-hand account of ecotourism projects around the world. Based on interviews and visits to ecotourist hotspots in Latin America and Africa, she offers a vivid description and analysis of projects that meet the goals and standards of ecotourism as well as those that claim to be ecotourism but in reality fall short. She presents in-depth case studies of seven destinations (Galapagos, Costa Rica, Cuba, Zanzibar, Tanzania, Kenya, and South Africa) that serve to illustrate the real world of ecotourism. For each, she offers an ecotourism scorecard, grading it on its adherence to the enumerated principles of ecotourism and sustainable development.Honey addresses topics such as the evolution and principles of ecotourism, where profits go, and the mechanics and politics of the tourist industry as a whole. The case studies highlight the economic and cultural impacts of tourism development on indigenous populations as well as on ecosystems. Honey also surveys current thinking and policies of environmental groups, and looks at how political situations, human rights records, and natural resource management influence travel decisions.Ecotourism and Sustainable Development provides a unique and compelling look at the promise and pitfalls of ecotourism. It is the only such account of worldwide ecotourism available today, and is an important guide for students and researchers involved with international development, geography, or tourism, as well as for anyone interested in becoming a more environmentally sensitive traveller.

Like earlier editions, the Third Edition of Tourists and Tourism is organized for use in the classroom. While several classic and popular articles from the second edition have been retained, three-quarters are new and cover important areas in tourism studies such as dark tourism, medical tourism, nonvisual sensory experiences of tourism, and tourism as performance. Several address issues that directly relate to the student experience, including study abroad, service learning, social media, and the ethics of travel. Articles vary in length and style; some provide deeper context, while others are designed to spark debate in the classroom. Finally, an introduction to the use of film in teaching about tourism and a link to an important film resource are provided.

An entrepreneurial and managerial approach. Continual increases in wealth and leisure time have given a sharp rise to tourism, which resulted in the rapid development of tourism - related ventures such as hotels, bed and breakfast accommodation, travel agencies, restaurants, theme parks, event companies, resorts, tourist guides and tour operators, to mention a few. "New Tourism Ventures: An Entrepreneurial and Managerial Approach" provides a definitive grounding of how to create and manage such tourism ventures. It takes an entrepreneurial and managerial approach to the subject, underpinning the various concepts associated with entrepreneurship and demonstrating the linkages of the subject with the tourism economy within the context of international best practice and research.

Conservation and development share an intertwined history dating back to at least the 1700s. But what are the prospects for reconciling the two, and how far have we come with this project? This book explores these questions through a detailed consideration of the past, present and future of the relationship between conservation and development. Bringing to bear conceptual resources from political ecology, social-ecological systems thinking and science and technology studies, Conservation and Development sets this relationship against the background of the political and economic processes implicated in environmental degradation and poverty alike. Whilst recognising that the need for reconciling conservation and development processes remains as compelling as ever, it demonstrates why trade-offs are more frequently encountered in practice than synergies. It also flags alternative visions for conservation and development obscured or ignored by current framings and priorities. Bringing together policy and theory, Conservation and Development is an essential resource for undergraduate and postgraduate students and a useful reference for researchers in related fields. Each chapter contains a reading guide with discussion questions. The text is enlivened by a number of new case studies from around the world. A must-read for anyone interested in understanding the history, current state, and projections for future shifts in the relationship between conservation and development.

The Anthropology of Travel and Tourism, Third Edition

Measuring the Impacts

Natural Resource Economics

Selections from CQ Researcher

Cultural Dimensions of Ecotourism

CQ Researcher's Global Issues offers an in-depth and nuanced look at a wide range of today's most pressing issues. The 2020 edition of this annual reader looks at new topics that peak student interest that are relevant in today's current events, including changes in U.S. foreign policy, tensions within the European Union, cryptocurrency, the 5G revolution, global fishing controversies, and the rise in extreme weather events. And because it's CQ Researcher, the reports are expertly researched and written. Each chapter identifies the key players, explores what's at stake, and offers the background and analysis necessary to understand how past and current developments impact the future of each issue.

Using a wealth of international case studies and photos, Ecotourism: An Introduction provides an accessible and comprehensive introduction to the key foundations, concepts and issues related to Ecotourism, the fasted growing segment of the global tourism industry. Among the topics covered are: * the foundations of ecotourism * tourism and ecotourism policy * the economics, marketing and management of ecotourism * the social and ecological impacts of tourism * ecotourism and development * the role of ethics in ecotourism The book includes case studies from Scotland, Austria, the USA, Canada, Mexico and Australia.

Exploring the connections and complexities of the relationships between power, tourism and leisure, this volume combines theoretical and empirical writings to illustrate the extent to which power impacts on tourism and leisure.

Offering an overview of worldwide ecotourism, showing how both the concept and the reality have evolved, this book examines the growth of ecotourism within the Galapagos Islands, Costa Rica, Tanzania, Zanzibar, Kenya and South Africa, their political systems and their economic policies.
