Drawing Comics is Easy!

One Hundred Demons

Presents step-by-step instructions for drawing people, animals, and other objects using a minimum of line and circle combinations.

Read and find out about the phases of the moon in this colorfully illustrated nonfiction picture book. This clear and appealing science book for early elementary age kids, both at home and in the classroom, introduces basic information about the moon. Have you noticed that the moon sometimes seems to grow and shrink? Does it look like a big round ball? Or is it just a sliver of light in the sky? The moon seems to change. But it doesn't really. The moon revolves around the Earth. It takes about four weeks to make the journey, and as it travels around we can only see certain parts of it. Try the simple experiment described inside using an orange, a pencil, and a flashlight, and you'll understand why the moon seems to change. This is a Level 2 Let's-Read-and-Find-Out, which means the book explores more challenging concepts for children in the primary grades. The 100+ titles in this leading nonfiction series are: hands-on and visual acclaimed and trusted great for classrooms Top 10 reasons to love LRF0s: Entertain and educate at the same time Have appealing, child-centered topics Developmentally appropriate for emerging readers Focused; answering questions instead of using survey approach Employ engaging picture book quality illustrations Use simple charts and graphics to improve visual literacy skills Feature hands-on activities to engage young scientists Meet national science education standards Written/illustrated by award-winning authors/illustrators & vetted by an expert in the field Over 130 titles in print, meeting a wide range of kids' scientific interests Books in this series support the Common Core Learning Standards, Next Generation Science Standards, and the Science, Technology, Engineering, and Math (STEM) standards. Let's-Read-and-Find-Out is the winner of the American Association for the Advancement of Science/Subaru Science Books & Films Prize for Outstanding Science Series.

If there's one thing beasties love to do, it's dance! When one little beastie is joined by two little, three little, and more little beasties, we count UP until there's a party on the page.

But when one of the little beastie starts trouble, it's time to start counting DOWN.

A collection of twenty comic strips celebrates the Buddhist challenge to overcome one hundred demons in a lifetime with such offerings as "Dancing," "Dogs," and "Magic," which follow the author's misadventures with adolescence, family, and relationships.

Ed Emberley shies away from calling himself an artist and instead likes to say that "he draws pictures for a living." Now in his eighties,Ed Emberley is a Caldecott award-winning children's book illustrator and writer who has been creating original books since the1960s. He has written and illustrated more than 100 books and is perhaps best known for his beloved how-to-draw books for kids such as: Ed Emberley's Big Green Drawing Book, Ed Emberley's Drawing Book of Faces, and Ed Emberley's Great Thumbprint Drawing Book, and many others. These simple and straightforward books, first published in the 1970s, have encouraged a generation of kids to take the drawing process step by step. Contemporary working artists today often cite Ed Emberley as a beloved early inspiration in their development as artists. By encouraging kids to draw using just a few simple shapes, Emberley has made drawing and creating accessible to everyone. As Emberley likes to say, "Not everyone needs to be an artist, but everyone needs to feel good about themselves." This definitive monograph on the wide repertoire of Emberley's life's work has been beautifully put together by Todd Oldham and Caleb Neelon. Highlighting work spanning over five decades, this gorgeous and comprehensive book celebrates the talented and prolific life of Ed Emberley.

"Deliciously drawn (with fragments of collage worked into each page), insightful and bubbling with delight in the process of artistic creation. A+ " –Salon How do objects summon memories?

What do real images feel like? For decades, these types of questions have permeated the pages of Lynda Barry's compositions, with words attracting pictures and conjuring places through a pen that first and foremost keeps on moving. What It Is demonstrates a tried-and-true creative method that is playful, powerful, and accessible to anyone with an inquisitive wish to write or to remember. Composed of completely new material, each page of Barry's first Drawn & Quarterly book is a full-color collage that is not only a gentle guide to this process but an invigorating example of exactly what it is: "The ordinary is extraordinary."
