Not sure what to do after your GCSEs? Are you overwhelmed by the options? Choosing Your A Levels is the only impartial guide which will clearly provide you with all your options post-16. Whether you have decided to study A Levels, an advanced diploma or any other further education qualification, this comprehensive guide will help you take the next steps in your education. If you want more advice on which subjects to take or whether you want to learn more about how they are structured, Choosing Your A Levels provides you with all the information you need to make tough choices and continue into further education. Containing the latest information on AS Levels this book will successfully guide you into further education. Choosing Your A Levels is easy to navigate if you want information about a particular qualification or as a detailed overview of all the major post-16 further education options. Inside you'll find: * Guidance on choosing the right qualification for you and indications of what the different qualifications can lead to * A directory of subjects by qualification for quick reference * Exam tips and preparation to ease the pressure * Advice to help you succeed when you get there Students all have different strengths, so Choosing Your A Levels explains the involvement and details of each qualification showing how each qualification suits different learning styles. This means you have all the information you need at your fingertips to make a personal and informed choice matching yourself with a qualification that works with your strengths, whether they are practical skills or personal attributes, for a successful post-16 education. For more help and advice on choosing other post-16 qualifications please see other titles in the series; Choosing Your Apprenticeship and Choosing Your Diploma.

Developed for the EDEXCEL specification, this course provides preparation for GCSE success with a practical approach. Detailed support and guidance are contained in the Teacher Files on advanced planning, points of emphasis, key-words, notes for the non-specialist, useful supplementary ideas, and homework sheets.

This book supports students preparing for the Edexcel International GCSE exam. It comprises of 4 full practice papers. Each practice paper contains 25 questions and detailed solutions. The practice papers in the book are carefully modelled after past papers and specifications of exam board to ensure that the papers as a whole provide a rich and varied practice to meet all requirements of IGCSE mathematics with an appropriate difficulty. Solutions are easy and comprehensible by people of all skill levels. They offer students ways of dealing with common problems but also more complex questions that students may struggle with under examination pressure. The solutions have been reviewed by many students of varying skill, to ensure that they are easily understandable while being the fastest and most re-applicable.

Reinforce understanding throughout the course with clear topic summaries and sample questions and answers to help students target higher grades. Written by experienced teacher and subject expert Christine Brain, our Student Guides are divided into two key sections - content guidance, and sample questions and answers. Content guidance will: - - Develop understanding of key concepts and terminology; this guide covers foundations in psychology: social psychology, cognitive psychology, biological psychology and learning theories. - - Consolidate knowledge with 'knowledge check questions' at the end of each topic and answers in the back of the book. Sample questions and answers will: - - Build understanding of the different question types, so that students can approach each question with confidence. - - Enable students to target top grades in Paper 1 with sample answers and commentary explaining exactly why marks have been awarded.

Test questions are provided for each chapter of this textbook, together with detailed mark schemes to make assessment easy. Two versions of each question are provided. One allows pupils to write their answers in the spaces provided and the other requires pupils to have separate writing paper. Questions can be grouped according to needs. Master grids are provided to cut and paste tests together in a consistent format to use the resource in any order. Chapter tests can be grouped to form a module test after chapters. End-of-chapter examinations can also be produced in this way. A free non-calculator supplement organized by unit/chapter is also included in this resource.

Intending to help students revise the key topics they need to brush up on, this work includes "test yourself" diagnostic questions, worked examples, practice questions and summaries on important topics, and practice examination papers.

Ensure top marks and complete coverage with Collins' brand new IGCSE Maths course which is suitable for IGCSE Mathematics A and The Edexcel Level 1/Level 2 Certificate in Mathematics. Provide rigour with thousands of tried and tested questions using international content and levels clearly labelled to aid transition from Foundation to Higher. □ Endorsed by Edexcel □ Ensure students are fully prepared for their exams with extensive differentiated practice exercises, detailed worked examples and IGCSE past paper questions. □ Stretch and challenge students with supplementary content for Higher level examinations and extension level questions highlighted on the page. □ Emphasise the relevance of maths with features such as 'Why this chapter matters' which show its role in everyday life or historical development. □ Develop problem solving with questions that require students to apply their skills, often in real life, international contexts. □ Enable students to see what level they are working at and what they need to do to progress with Foundation and Higher levels signalled clearly throughout. □ Encourage students to check their work with answers to all exercise questions at the back (answers to examination sections are available in the accompanying Teacher's Pack).

Ensure your students get to grips with the core practicals and develop the skills needed to succeed with an in-depth assessment-driven approach that builds and reinforces understanding; clear summaries of practical work with sample questions and answers help to improve exam technique in order to achieve higher grades. Written by experienced teacher Martin Rowland, this Student Guide for practical Biology: - Help students easily identify what they need to know with a concise summary of required practical work examined in the A-level specifications. - Consolidate understanding of practical work, methodology, mathematical and other skills out of the laboratory with exam tips and knowledge check questions, with answers in the back of the book. - Provide plenty of opportunities for students to improve exam technique with sample answers, examiners tips and exam-style questions. - Offer support beyond the Student books with coverage of methodologies and generic practical skills not focused on in the textbooks.

Easing the transition from GCSE to AS level, this textbook meets the 2004 Edexcel specifications and provides numerous worked examples and solutions to aid understanding of key concepts.
