**Journal of African Earth Sciences**

*These Transactions publish archival papers in the broad area of Petri nets and other models of concurrency, ranging from theoretical work to tool support and industrial applications. ToPNoC issues are published as LNCS volumes, and hence are widely distributed and indexed. This Journal has its own Editorial Board which selects papers based on a rigorous two stage refereeing process. ToPNoC contains: Revised versions of a selection of the best papers from workshops and tutorials at the annual Petri net conferences; special sections/issues within particular subareas (similar to those published in the Advances in Petri Nets series); other papers invited for publication in ToPNoC; papers submitted directly to ToPNoC by their authors. This is the first volume of ToPNoC. It contains revised and extended versions of a selection of the best papers from the workshops held at the 28th International Conference on Applications and Theory of Petri Nets and Other Models of Concurrency, which took place in Siedlce, Poland, June 25-29, 2007. The material has been selected and evaluated by the two Workshop and Tutorial Chairs, Wil van der Aalst and Jonathan Billington, in close cooperation with the chairs of the individual workshops. The 13 papers in this volume cover a wide range of concurrency-related topics, including: teaching concurrency; process languages; process mining; software engineering; state space visualization techniques; timed Petri nets; unfolding techniques and hardware systems. Thus, this volume gives a good overview of the state of the art in concurrency research.*

The New International Encyclopaedia

"When the first University of Denver Publishing Institute came to a close in August 1976, all of us involved in its launching knew that we had a real success on our hands. And we knew it was due in great measure to an outstanding faculty of more than forty top publishing executives who had come to Denver during those four weeks to teach our students. How regrettable, it seemed, that their knowledge and expertise were available only to the eighty students handpicked for that first class. Fred Praeger, publisher of Westview Press, suggested a solution. "Do a book," he invited, "and let Westview publish the curriculum for others to share.""

Maintenance of a Lobby to Influence Legislation

*"The Papers of Thomas Jefferson is a projected 60-volume series containing not only the 18,000 letters written by Jefferson but also, in full or in summary, the more than 25,000 letters written to him. Including documents of historical significance as well as private notes not closely examined until their publication in the Papers, this series is an unmatched source of scholarship on the nation's third president"--Publisher's description.*
