Directory of Governmental Bodies and Institutions Dealing with Educational Planning and Administration

Seminar on Educational Planning and Administration

This work analyzes the relationship between educational planning and the law, and provides the planner or administrator with invaluable tools for the elaboration and implementation of policies and reforms. The author presents the legal aspects of the different elements that make up the school system, and studies them in the context of the types of problems encountered by educational planners today. Several topical themes, such as decentralization and its administrative consequences, are looked at in particular detail. The study deliberately concentrates on countries that belong to the civil law tradition, thus complementing a previous title (n 46) in this collection on the common law countries.
