Petersen/Sack/Gabler's PHYSICAL GEOGRAPHY, 12E introduces geography from three perspectives: as a physical science, a spatial science and an environmental science. An intriguing, reader-friendly presentation demonstrates the processes and interactions among Earth's systems and emphasizes environmental sustainability, highlighting how natural systems are affected by human activities and how natural processes impact human lives. Updated, compelling visuals illustrate concepts through vivid photos, helpful figures, information-rich maps and thought-provoking captions. This edition also explores dynamic areas of the Earth, such as the Pacific Ring of Fire, and examines

fresh approach to the study of physical geography, combining print and digital media to create a scientifically substantive work that is written for students. Living Physical Geography focuses on human-physical geography interactions, using pedagogical features in the textbook and online to create a modern synthesis of the science of physical geography. Each of the four major parts in Living Physical Geography is identified by energy flows within Earth ' s physical systems. Additionally, landscape analysis underpins the body of the text. Step-by-step examples are used to illustrate
