The Development Effectiveness Review 2019 reports on ADB's progress in achieving the priorities of its corporate strategy using the indicators in the corporate results framework, 2019-2024 as the yardstick. This publication outlines the performance of the Asian Development Bank (ADB) in achieving the goals of Strategy 2030, the institution's long-term strategic framework. It is the 13th in a series of annual reports that tracks development progress in Asia and the Pacific, assesses ADB's development effectiveness over the years, and identifies areas where the institution's performance needs to be further strengthened.

A comprehensive guide to corporate practices in internal control and tax compliance. Included are case studies of how firms in a variety of industries approach transfer pricing.

Il volume commenta articolo per articolo il D.P.R. 917/1986, i cui contenuti sono illustrati in modo approfondito con un'esposizione chiara che privilegia l'applicazione concreta delle norme. La venticinquesima edizione tiene conto delle novità che si sono susseguite nell'ultimo anno, comprese le misure sui crediti di imposta per gli investimenti e per le spese di ricerca e sviluppo, le novità procedurali per il patent box, il bonus per le operazioni di aggregazione aziendale. Il testo è stato aggiornato per tenere conto non solo delle modifiche normative, ma anche dei molteplici interventi della prassi e della giurisprudenza sulle modalità di determinazione del reddito ai fini Irpef e Ires. Il commento alle norme sulle operazioni straordinarie è aggiornato con le numerose risposte agli interpelli dei contribuenti che sono state pubblicate a partire dal settembre 2018.

Earthquakes and Tsunamis in the Past

The legal principle of ne bis in idem restricts the possibility of a defendant being prosecuted repeatedly on the basis of the same offence, act, or facts. This book describes obstacles that stand in the way of a single, autonomous, and uniformly applicable general ne bis in idem principle of EU law.

Government at a Glance 2017 provides the latest available data on public administrations in OECD countries. Where possible, it also reports data for Brazil, China, Colombia, Costa Rica, India, Indonesia, Lithuania, the Russian Federation, and South Africa.

Metrics matter for policy and policy matters for well-being. In this report, the co-chairs of the OECD-hosted High Level Expert Group on the Measurement of Economic Performance and Social Progress, Joseph E. Stiglitz, Jean-Paul Fitoussi and Martine Durand, show how over-reliance on GDP as the yardstick of economic performance misled policy makers who did not see the 2008 crisis coming. When the crisis did hit,

concentrating on the wrong indicators meant that governments made inadequate policy choices, with severe and long-lasting consequences for many people. While GDP is the most well-known, and most powerful economic indicator, it can't tell us everything we need to know about the health of countries and societies. In fact, it can't even tell us everything we need to know about economic performance. We need to develop dashboards of indicators that reveal who is benefitting from growth, whether that growth is environmentally sustainable, how people feel about their lives, what factors contribute to an individual's or a country's success. This book looks at progress made over the past 10 years in collecting well-being data, and in using them to inform policies. An accompanying volume, *For Good Measure: Advancing Research on Well-being Metrics Beyond GDP*, presents the latest findings from leading economists and statisticians on selected issues within the broader agenda on defining and measuring well-being. This comprehensive text provides clear explanations of the effects of drugs on human performance and the need for workplace drug testing. It provides essential information on the regulatory and legal frameworks around the world, how to set policies and coverage of all aspects of drug analysis and the associated interpretation of results. Contents include: * Epidemiology of drug use in the working population * The evidence base and guidelines for workplace drug testing * Legal, regulatory aspects and policies for drugs and alcohol * Urine and alternative sample collection process * Analytical techniques and specimen adulteration. * Case studies of successful programmes are also included to illustrate the principles discussed. Written by internationally acknowledged experts this informative book will be essential reading for anyone interested in workplace drug testing or setting up such a system including clinical and forensic toxicologists, occupational health physicians, nurses, human resources, drug counselling and treatment providers, analytical chemists and lawyers.

Environmental Policy in the European Union

Donald Trump promised the American people a transformative change in economic policy after eight years of stagnation under Obama. But he didn't adopt a conventional left or right economic agenda. His is a new economic populism that combines some conventional Republican ideas—tax cuts, deregulation, more power to the states—with more traditional Democratic issues such as trade protectionism and infrastructure spending. It also mixes in important populist issues such as immigration reform, pressuring the Europeans to pay for more of their own defense, and keeping America first. In *Trumponomics*, conservative economists Stephen Moore and Arthur B. Laffer offer a well-informed defense of the president's approach to trade, taxes, employment, infrastructure, and other economic policies. Moore and Laffer worked as senior economic advisors to Donald Trump in 2016. They traveled with him, frequently met with his political and economic teams, worked on his speeches, and represented him as surrogates. They are currently members of

the Trump Advisory Council and still meet with him regularly. In *Trumponomics*, they offer an insider's view on how Trump operates in public and behind closed doors, his priorities and passions, and his greatest attributes and liabilities. Trump is betting his presidency that he can create an economic revival in America's industrial heartland. Can he really bring jobs back to the rust belt? Can he cut taxes and bring the debt down? Above all, does he have the personal discipline, the vision, the right team, and the right strategy to pull off his ambitious economic goals? Moore and Laffer believe that he can pull it off and that *Trumponomics* will usher in a new era of prosperity for all Americans.

A *TIME* magazine Top 10 Children's Book of 2015 The whimsical "autobiography" of an imaginary friend who doesn't know he's imaginary--perfect for fans of *The Miraculous Journey of Edward Tulane* and *Toy Story* Jaques Papier has the sneaking suspicion that everyone except his sister Fleur hates him. Teachers ignore him when his hand is raised in class, he is never chosen for sports teams, and his parents often need to be reminded to set a place for him at the dinner table. But he is shocked when he finally learns the truth: He is Fleur's imaginary friend! When he convinces Fleur to set him free, he begins a surprising and touching, and always funny quest to find himself--to figure out who Jacques Papier truly is, and where he belongs. Readers will fall in love with Jacques's sweet, quirky voice as he gives them a look at life from an incredible new perspective

Artists' Film offers a lucid, accessible account of artists' unique contribution to the art of the moving image in the twentieth and early twenty-first centuries. International in scope and accessibly written by a renowned authority on the subject, *Artists' Film* is an introductory guide to the exciting and expanding field of artists' film and an alternative history of the moving image, chronicling artists' ever-evolving fascination with filmmaking from the early twentieth century to now. From early pioneers to key artists of today, writer and curator David Curtis offers a vivid account of the many creators who have been inspired by the cinematic medium and who have felt compelled to interpret and respond to it in their own way. In doing so, Curtis discusses these artists' widely differing achievements, aspirations, theories, and approaches. Featuring over four hundred international moving-image makers and drawing on examples from across the arts, including experimental film, video, installation, and multimedia, this generously illustrated account offers an incomparable introduction to this continually evolving art form. A perfect read for anyone with an interest in the intersection of contemporary art and film.

An important reference guide to the latest research methodologies for studying historical earthquakes and tsunamis.

Confessions of an Imaginary Friend

The slower geologic processes are represented by myths associated with natural landforms, rocks and minerals, rivers and mountains, and other outstanding features of the landscape. Examples are also given to show some minor ways in which folklore and geology impinge on one another: misconceptions about geologic phenomena, such as earthquakes, which are so prevalent as to constitute a form of modern folklore, and conversely, ideas long considered to be pure folklore which may prove to have some basis in scientific fact. The most dramatic example of geom mythology so far discovered is the theory the origin of the lost continent of Atlantis may be found in the Minoan civilization of Crete, which suddenly disappeared from view around 1450 B.C., about the time of a tremendous eruption know to have occurred in the nearby volcano, Santorin. This theory, variously developed by Marinatos and Galanopoulos, is examined in the light of new evidence gathered in Crete by Mrs.

As architectural designs continue to push boundaries, there is more exploration into the bound shape of architecture within the limits of spaces made for human usability and interaction. The Handbook of Research on Form and Morphogenesis in Modern Architectural Contexts provides emerging research on the process of architectural form-finding as an effort to balance perceptive efficiency with functionality. While highlighting topics such as architectural geometry, reverse modeling, and digital fabrication, this book details the geometric process that forms the shape of a building. This publication is a vital resource for scholars, IT professionals, engineers, architects, and business managers seeking current research on the development and creation of architectural design.

La Guida con tutte le novità, le nuove scadenze introdotte dalla Legge di Stabilità 2018 e gli adempimenti per compilare senza problemi la dichiarazione dei redditi 2018. Stately Bodies explores the curious prevalence of bodily metaphors in conceptions of noncorporeal institutions: the state, the law, and politics itself. The book builds on work from Adriana Cavarero's well-received study, In Spite of Plato: A Feminist Rewriting of Ancient Philosophy. In that work Cavarero--as political theorist, philosopher, classicist, and close reader--examines literary and philosophical texts from Greek antiquity to modern to reveal the paradox that characterizes notions of the "body politic" in Western political philosophy. She examines bodily metaphor in political discourse and in fictional depictions of politics, including Sophocles' Antigone, Plato's Timaeus, Livy, John of Salisbury,

Shakespeare's Hamlet, and Hobbes' Leviathan. An appendix explores two texts by women that disrupt these notions: Maria Zambrano's Tomb of Antigone and Ingeborg Bachmann's Undine Goes. Cavarero exposes the problematic nature of the mind/body dualism that has been essential in Western thought. Her insight that the expelled, depoliticized body is a female one becomes an instrument for decoding many paradoxical tropes of the political body. For instance, Cavarero revisits Antigone as the tragedy in which a body that is displaced, bleeding, and matrilinear allows the construction of a political order where misogynous rationality rules. Throughout the book, Cavarero argues that women have been cast by male thinkers into the realm of the corporeal as nonpolitical, and also suggests that this nonpolitical position is also a source of knowledge and power, that politics is a masculine pursuit that should not be admired or envied. Adriana Cavarero is Professor of Philosophy, University of Verona, and frequently is Visiting Professor. New York University. Her books *Relating Narratives: Storytelling and Selfhood* and *In Spite of Plato: A Feminist Rewriting of Ancient Philosophy* were published by Routledge.

2019 Development Effectiveness Review

Hailed as a masterpiece of American travel writing, *Blue Highways* is an unforgettable journey along our nation's backroads. William Least Heat-Moon set out with little more than the need to put home behind him and a sense of curiosity about "those little towns that get on the map-if they get on at all-only because some cartographer has a blank space to fill: Remote, Oregon; Simplicity, Virginia; New Freedom, Pennsylvania; New Hope, Tennessee; Why, Arizona; Whynot, Mississippi." His adventures, his discoveries, and his recollections of the extraordinary people he encountered along the way amount to a revelation of the true American experience.

Lifelong learning is key if individuals are to succeed in labour markets and societies shaped by megatrends such as increases in life expectancy, rapid technological changes, globalisation, migration, environmental changes and digitalisation, as well as sudden shocks like the COVID-19 pandemic.

The driving cultural force of that form of life we call 'modern' is the desire to make the world controllable. Yet it is only in encountering the uncontrollable that we really experience the world – only then do we feel touched, moved and alive. A world that is fully known, in which everything has been planned and mastered, would be a dead world. Our lives are played out on the border between what we can control and that which lies outside our control. But because we late-modern human beings seek to make the world controllable, we tend to encounter the world as a series of objects that we have to conquer, master or exploit. And precisely because of this, 'life,' the experience of feeling alive and truly encountering the world, always seems to elude us. This in turn leads to frustration, anger and even despair, which then manifest themselves in, among other things, acts of impotent political aggression. For Rosa, to encounter the world and achieve resonance with it requires us to be open to that which extends beyond our control. The outcome of this process cannot be predicted, and this is why moments of resonance are always concomitant with moments of uncontrollability. This short book – the sequel to Rosa's path-breaking work on social acceleration and resonance – will be of great interest students and scholars in sociology and the social sciences and to anyone concerned with the nature of modern social life.

It features 200 works by 120 artists, including paintings by Futurism's main protagonists and there are also pieces by an array of modern and contemporary artists influenced by the Futurists.

La scommessa della dichiarazione precompilata da parte dell'agenzia delle Entrate costituisce uno degli elementi del corretto rapporto tra fisco e contribuente. Eppure, nella macchina fiscale semplicità e trasparenza non possono essere confuse con regole semplicistiche. Riepilogare la disciplina dei redditi delle persone fisiche, con l'innumerabile casistica di sconti e benefici, è l'obiettivo di questa Guida: le tabelle riepilogative vogliono essere un utile e veloce passe-partout per contribuenti e intermediari. Così da evitare errori nel calcolo del dare-avere nei confronti del fisco.

David Boonin presents a new account of the non-identity problem: a puzzle about our obligations to people who do not yet exist. He provides a critical survey of solutions to the problem that have been proposed, and concludes by developing an unorthodox alternative solution, one that differs fundamentally from virtually every other approach.

Questo manuale parla di diritti e doveri, di pensioni, cittadinanza, disoccupazione, ecc. e di diritti e doveri per lavoratori immigrati e non. È un libro utile per gli operatori e le associazioni che si interessano di immigrazione e sociale. Ultimamente si parla tanto di immigrati, nel bene e nel male. I lavoratori extracomunitari sono una risorsa per il nostro paese, basti pensare che il PIL, per il 9%, è prodotto dagli extracomunitari.

People's well-being, industrial competitiveness and the overall functioning of society are dependent on safe, secure, sustainable and affordable energy. The energy infrastructure which will power citizens' homes, industry and services in 2050, as well as the buildings which people will use, are being designed and built now. The pattern of energy production and use in 2050 is already being set.

Their Geologic Origins

Inside the America First Plan to Revive Our Economy

*Recipient of the 1986 Nobel Prize in economics, James Buchanan has won international recognition for his pioneering role in the development of public-choice theory. Among his works that the prize committee specifically cited was *Public Finance in Democratic Process*, which first appeared in 1967. As James C. Miller, director of the U.S. Office of Management and Budget, notes in his foreword, "This book is perhaps the best compact exposition of Buchanan's theory of public choice."*

*Since its inception under President Ford in 1975, the Earned Income Tax Credit (EITC) has become the largest antipoverty program for the non-elderly in the United States. In 1998, more than nineteen million families received EITC payments, and the program lifted over four million Americans above the poverty line. Despite the rapid growth of the EITC throughout the 1990s, little has been written about how the program works or how it affects low-income families. *Making Work Pay* provides the first full-scale examination of the EITC, exploring its effects on income distribution, poverty, work, and marriage. *Making Work Pay* opens with a history of the EITC—its emergence in the 1970s as a pro-work, low-cost antipoverty program and its expansion through the 1980s and 1990s. The central*

chapters in the volume look at the substantial impact of the EITC on work incentives in recent years and show that the program, in combination with welfare reform and a strong economy, has led to an unprecedented increase in the employment of single mothers. In one study, researchers conclude that the EITC—with its stipulation that one family member be a wage earner—was the most important change in work incentives for single mothers between 1984 and 1996, a period when the employment rate of single mothers rose sharply. Several chapters outline proposals for reforming the program, addressing the concerns by policymakers about the work disincentives that rise as benefits fall with increasing income. Finally, Making Work Pay examines how EITC recipients view the credit and what they do with it once they get it. The contributors find that not only does EITC's lump-sum payment increase consumption but it also allows recipients to make changes in economic status. Many families use the end-of-the-year payment as a form of forced savings, enabling them to save for home improvement, a new car, or other purchases to improve their lives, and providing the extra economic cushion needed to move beyond mere day-to-day survival. Comprehensive in scope, Making Work Pay is an indispensable resource for policymakers, administrators, and researchers seeking to understand the ramifications of the country's largest programs for aiding the working poor.

This highly accessible book provides an extensive and comprehensive overview of current research and theory about why and how we should protect future generations. It exposes how and why the interests of people today and those of future generations are often in conflict and what can be done. It rebuts critical concepts such as Parfits' non-identity paradox and Beckerman's denial of any possibility of intergenerational justice. The core of the book is the lucid application of a veil of ignorance to derive principles of intergenerational justice which show that our duties to posterity are stronger than is often supposed. Tremmel's approach demands that each generation both consider and improve the well-being of future generations. To measure the well-being of future generations Tremmel employs the Human Development Index rather than the metrics of utilitarian subjective happiness. The book thus answers in detailed, concrete terms the two most important questions of every theory of intergenerational justice: what to sustain? and how much to sustain?

Drug Testing in Hair is the first book on this timely and controversial topic. The book's purpose is to validate hair testing as an accepted form of evidence for use in courts and elsewhere, such as the military and the workplace. This volume presents the most recent experiments and clinical applications to provide missing information and insight into the unanswered questions of hair testing. Active researchers working in hair testing have contributed chapters to this book. New data, never before published, are incorporated into the text, so the reader receives cutting-edge information from experts in the field. This is must-have information on everything you need to know about drug testing in hair.

A Guide to Techniques in Historical Seismology

Modern seismology has faced new challenges in the study of earthquakes and their physical characteristics. This volume is dedicated to the use of new approaches and presents a state-of-the-art in historical seismology. Selected historical and recent earthquakes are chosen to document and constrain related seismic parameters using updated methodologies in the macroseismic analysis, field observations of damage distribution and tectonic effects, and modelling of seismic waveforms.

"How to retire in your 20s and 30s (without winning the lottery). This book provides a robust strategy

that makes it possible to stop working for money in less than a decade."--P. [4] of cover.

In 1960, when he was almost 60 years old, John Steinbeck set out to rediscover the United States, feeling he might have lost touch with its sights sounds and the essence of its people. This book describes his travels in a pick-up truck across nearly 40 states with his dog Charlie, a French poodle.

Can innovations in business change society? Can innovations in society change business? These two questions have become critically urgent in recent years, but are rarely considered together. 'Business Models for Sustainability Transitions' therefore asks, can contemplating both concepts together result in a flourishing, sustainable future? Technology alone cannot save us. We cannot consciously consume our way out of trouble. This book represents a start at bridging the dynamic world of business model innovation with the constant and unprecedented transitions underway in the world around us. For researchers, practitioners, and policy makers, the coupling of the two questions has the potential to unlock answers to our grand global challenges with responses that are at the same time rapid and enduring. This work offers unique and considered glimpses into what it may take to harness wide-ranging innovations for the collective good.

This second and fully revised edition brings together some of the most influential work on the theory and practice of contemporary EU environmental policy. Comprising five comprehensive parts, it includes in-depth case studies of contemporary policy issues such as climate change, genetically modified organisms and trans-Atlantic relations, as well as an assessment of how well the EU is responding to new challenges such as enlargement, environmental policy integration and sustainability. The book's aim is to look forward and ask whether the EU is prepared or even able to respond to the 'new' governance challenges posed by the perceived need to use 'new' policy instruments and processes to 'mainstream' environmental thinking in all EU policy sectors.

The agreement reached at the 21st Conference of the Parties (COP21) in Paris could prove to be a historic turning point for reversing the currently unsustainable trends in the global energy system, provided that this heightened low-carbon ambition is translated into fast, radical and effective policy action. Even in the context of low fossil fuel prices, policy support for low-carbon technologies should mobilise all levers available to accelerate research, development, demonstration and deployment (RDD & D) to make decarbonisation the preferred development path. Chief among such levers is governments support for urban energy transitions, a conclusion that is supported by the analysis of Energy Technology Perspectives 2016 (ETP 2016), which shows the vast number and size of cost-effective, sustainable energy opportunities available in cities. Realising this potential, and the multiple non-climate benefits it presents, will require national and local governments to work together effectively

This publication examines the performance of the Asian Development Bank in achieving the goals of Strategy 2020, one of the institution's long-term planning documents. It tracks recent development progress in Asia and the Pacific, assesses ADB's development effectiveness, and identifies areas where ADB's performance needs to be strengthened. The 2018 Development Effectiveness Review is the 12th in a series of yearly reports.
