An innovative approach to applying Elliott Wave Principle By convention, most Elliott Wave Principle (EWP) practitioners focus on individual market price movement. Connie Brown has a global reputation of developing analysis that focuses on the integration of global markets. In a two book series you will be taken through the steps to master the global cash flows of today's financial markets. The approach found in this first book differs from the traditional view of EWP because it shows you how geometry and the use of simple boxes drawn within a trend will guide you away from the common complaint of subjectivity, thereby making smarter trades of

With *Mastering Elliott Wave Principle* you are guided step-by-step through the learning phases of Elliott Wave analysis and then your understanding is further challenged through self-examination. The preliminary coaching unravels common misunderstandings that sabotage the beginner. You will discover how price swings and waves are not the same. These basic skills establish a foundation that allow beginners to understand what to expect from their level of skill. There are three distinct levels of skill that all masters of the EWP have learned. RN Elliott's Masterworks

The classic work on Elliott Wave and market cycles returned to print During the 1930s, R. N. Elliott undertook the painstaking procedure of attempting to classify share price movements for the preceding 80 years on Wall Street. It was during the course of this seminal work that Elliott discovered a definable basic

rhythm in share price movements which he felt had forecasting value when correctly applied. In 1938 Elliott published his findings in a series of articles with the overall title "The Wave Principle". After publication, Elliott's work drifted into obscurity, until Robert Beckman's 'Supertiming' introduced it to a new audience. In this renowned work, Beckman sets out with three main objectives: 1. To clarify obscurities and grey areas of The Wave Principle that were present in Elliott's original writing. 2. To
