This collection presents an array of policy debates and implications emerging from virtual work. The authors cover a range of areas, including: conceptual debates, measuring virtual work; discourses and levels of policy intervention; the role of the sharing and collaborative economy; and resultant challenges for organized labour, law and regulation. The authors of the chapters analyse the ways in which processes of digitalization leading to virtual work impact so many aspects of our lives: the way we buy, sell, network, communicate, participate, create, consume, and, of course, the way we work. In turn they focus on the subsequent implications for the future of work as well as the viability of existing social protection systems. The developments examined here are salient for both policy stakeholders and for

A great deal of economics is about law - the functioning of markets, property rights and their enforcement, financial obligations, and so forth - yet these legal aspects are almost never addressed in the academic study of economics. Conversely, the study and practice of law entails a significant understanding of economics, yet the drafting and administration of laws often ignore economic principle. The New Palgrave Dictionary of Economics and the Law is uniquely placed by the quality, breadth and depth of its coverage to address this need for building bridges. Drawn from the ranks of academics, professional lawyers, and economists in eight countries, the 340 contributors include world experts in their fields. Among them are Nobel laureates in economics and eminent legal scholars. First published in

Bringing together essays on topics related to Islamic law, this book is composed of articles by prominent legal

This book compares the ways in which trade unions in five EU Member States have responded to increased migration. Since the year 2000, the material and personal scope of EU non-discrimination

law has been significantly broadened and has challenged national courts to introduce a comprehensive equality framework into their national law to correspond with the European standard. The book provides a multi-layered culturally informed comparison of juridical approaches to EU (in)direct sex and sexualities discrimination and its implementation in Germany and the Netherlands. It examines how and why national courts apply national non-

discrimination law with a European origin differently, although the legislation derives from the same set of EU law and the national courts have to respect the interpretive competence of the CJEU. The book provides valuable insights into the national and European context which shape the dialogue and influences of the courts inter se, the national application of EU law, and the harmonisation process within the area of gender equality law and beyond. A Dutch

and German comparison is of special interest here because both countries' approaches towards non-discrimination law are quite different despite the similarities in the respective legal systems; they are founding members of the EU, they are neighbours, they are civil law countries, and their legal systems are relatively similar at least compared to Scandinavian and common law jurisdictions. Therefore, the different reception EU non-discrimination law

cannot simply be explained by obvious differences between the legal systems. Their comparison thus provides an interesting case study to uncover legal and non legal, cultural and historic, factors which influence the application of EU non-discrimination law in both countries. The book is of interest for EU, comparative and equality lawyers. Adjudicating Employment Rights compares and analyses institutions for resolving employment rights disputes in

ten countries. In addition to detailed individual chapters, the study offers a theoretical perspective and an evaluation of national institutions against key yardsticks.

why there is not greater preparation for this aspect of a teacher's role. Principals and teachers across the world now work in increasingly uncertain and challenging environments involving complex legislative frameworks, with their roles and responsibilities constantly changing to meet these demands: thus, it is imperative that educators adapt and acquire new skills relating to child protection and criminal law. On a daily basis, teachers and practitioners are being challenged to critically examine and evaluate the legal rights and obligations of various stakeholders, including students, parents, educators and administrators.

However, if these skills are not developed, the implications will be significant: particularly so if principals are deterred from pursuing innovative education strategies due to potential litigation risks. Consequently, the chapters will empower principals and teachers in the management of these concerns. This wide-ranging handbook, including case studies from around the world, will be of interest and value to both scholars of education law and practitioners.

Labour market flexibility is one of the most closely debated public policy issues in India. This book provides a theoretical framework to understand the subject, and empirically examines to what extent India's 'jobless growth' may be attributed to labour laws. There is a pervasive view that the country's low manufacturing base and inability to generate jobs is primarily due to rigid labour laws. Therefore, job

creation is sought to be boosted by reforming labour laws. However, the book argues that if labour laws are made flexible, then there are adverse consequences for workers: dismantled job security weakens workers' bargaining power, incapacitates trade union movement, skews class distribution of output, dilutes workers' rights, and renders them vulnerable. The book: identifies and critically examines the theory underlying the labour market flexibility (LMF) argument employs innovative empirical methods to test the LMF argument offers an overview of the organised labour market in India comprehensively

Labour law is in crisis. Global economic factors and the changing contours of work and workplace relations have led to a reorientation of the social, economic, political and cultural environment within

which labour law has developed. This is not a jurisdictional problem but rather is deeply entrenched in transnational development. Solutions must recognise and mobilise the transformational shift that has taken place over recent decades. Law should be viewed as a force for and a facilitator of change, capable of expressing and determining social relations. The essays in this book explore the challenges posed by labour law's potential reinvention as a discipline fit for accommodating and investigating such change within a range of different but connected jurisdictional and regulatory concepts

Stories of Care: A Labour of Law is an interdisciplinary study of the interactions of law and labour that shape paid care work. Based on the experiences of homecare workers, this highly topical text unpicks doctrinal assumptions about class and gender to interrogate contemporary labour law. It demonstrates how the UK's crisis in social care is connected to the gendered inadequacy of labour law and argues for transformative change to law at work. 'Utterly compelling. Providing a radical new approach to labour migration, this book challenges the prevailing legal and political construction of the figure of the irregular migrant labourer, whilst at the same time reimagining this irregularity as the basis of an alternative, post-

capitalist, sociality. The text draws on the work of contemporary philosopher Jean-Luc Nancy, and more specifically his term 'ecotechnics', in order to examine how economic, political, and juridical norms deny the full legal status of certain people who are deemed to be irregular. This ostensible irregularity is revealed as a regular feature of labour market practice, and a necessary support for the conceptual foundations of capitalist legality. As this book shows, however, this legality – and with it, the technological subordination of life to the circulation of capital as if this were the only possibility for our being in the

world – is not insurmountable. The book's consideration of the figure of the irregular migrant labourer comes to provide an alternative basis for reimagining our relationship not only with migration and with labour itself, but ultimately with each other. This powerful analysis of contemporary labour migration is of considerable interest to legal and political theorists, philosophers, labour lawyers, migration experts, and others with theoretical, political, or policy interests in this area.

This book explores the conceptual framework of European employment law, focusing on understanding the law's construction of employment relationships. The book draws on extensive comparative research of the legal architecture of employment relations in national legal systems and EU law to analyse the traditional model of the contract of employment and the difficulties of using the traditional model to frame modern working relationships. The authors

then present a new model of the foundations of employment relationships, based on the concept of a personal work nexus, and explore the potential of their model to shape the future development of employment law. Throughout the book, the authors analyse the interaction of domestic and EU employment law, and discuss the possibility of future legal harmonisation in the area. They conclude by exploring the potential for a common framework for European employment law, in the context of broader debates surrounding the harmonisation of European private law.
