 [After payment, write to & get a FREE-of-charge, unprotected true-PDF from: Sales@ChineseStandard.net] This part applies to the design and manufacture of refrigeration systems including piping, components, materials and auxiliary equipment directly connected to the system; specifies the requirements for testing, operation, marking and documentation of the refrigeration system. For heat transfer fluids that are not gaseous under atmospheric pressure, the requirements for the heat transfer fluid circuit do not belong to the scope of this part, but this part still applies to any safety devices related to the refrigeration system. This part does not apply to refrigeration systems using air or water as refrigerants, nor does it include requirements for refrigeration equipment used in potentially explosive atmospheres.

Founded Mainly on the Materials Collected by the Philological Society
In the fields of work in industrial areas, engineers and project implementers work to find means to develop the work and complete it at time indicated in an implementation plan and to avoid delay in the progress of the project for many reasons that we cannot summarize here for its bifurcation and relationship of activities with each other, but we mention the most important reason at which the failure to follow the standard specifications of activities construction of the project by engineers or technicians. These standards and codes are usually mentioned their sources in the project documents. The deviation from following the standards and codes leads to technical errors and consequently to the re-work and an addition of unwanted time to the project activity, and when errors are repeated due to non-compliance with international standards, this will result in an accumulation of the unwanted time in the project, ultimately leads to deviating the project plan.
