

Energy Management Fondamenti Per La Valutazione La Pianificazione E Il Controllo Dellefficienza Energetica Con Esempi Ed Esercizi

100.718

This book is an insightful text looking at sustainable innovation and the emerging fourth sector, i.e. hybrid organizations, through an interdisciplinary approach. The book illuminates what hybrid organizations are and how they generate new ways of creating blended value to secure the well-being of future generations and preservation of ecological services. The book also discusses how sustainable innovation may offer creative solutions to societal issues, the sharing economy and the circular economy. This book will appeal to those taking MBA and EMBA programmes, and those with an interest in creating sustainable business and innovation solutions.

Strategia, organizzazione e marketing per operatori di imprese non profit

100.770.1

Annotation This is Volume 1 of five volumes that comprise the proceedings of the June 2002 conference, sponsored by the International Gas Turbine Institute (IGTI), a technical institute of the American Society of Mechanical Engineers. The purpose of the conference was to facilitate international exchange and development of educational and technical information related to the design, application, manufacture, operation, maintenance, and environmental impact of all types of gas engines. With an emphasis upon the need for more efficient, cleaner, and more reliable gas turbines, the approximately 130 articles cover various technical aspects of aircraft engines; coal, biomass, and alternative fuels; combustion and fuels; education; electric power; and vehicular and small turbomachines. There is no subject index. Annotation c. Book News, Inc., Portland, OR (booknews.com).

Proceedings of the ASME Turbo Expo 2002

Presented at the 2002 ASME Turbo Expo, June 3-6, 2002, Amsterdam, the Netherlands

Before the Enlightenment, and before the imperialism of the later eighteenth century, how did European readers find out about the varied cultures of Asia? Orientalism in Louis XIV's France presents a history of Oriental studies in seventeenth-century France, mapping the place within the intellectual culture of the period that was given to studies of Arabic, Persian, Turkish, and Chinese texts, as well as writings on Mughal India. The Orientalist writers studied here produced books that would become sources used throughout the eighteenth century. Nicholas Dew places these scholars in their own context as members of the "republic of letters" in the age of the scientific revolution and the early Enlightenment.

In A Tale of Seven Elements, Eric Scerri presents the fascinating history of those seven elements discovered to be mysteriously "missing" from the periodic table in 1913.
