

Energy Statistics Of Oecd Countries Documentation For

This volume contains data on energy supply and consumption in original units for coal, oil, gas, electricity, heat, renewables and waste. Complete data are available for 2007 and 2008 and supply estimates are available for the most recent year (i.e. 2009). Historical tables summarise data on production, trade and final consumption. The book also includes definitions of products and flows and explanatory notes on the individual country data. In the 2010 edition of Energy Balances of OECD Countries, the sister volume of this publication, the data are presented as comprehensive energy balances ex.

This volume contains data on energy supply and consumption in original units for coal, oil, gas, electricity, heat, combustible renewables and waste. Historical tables summarise data on production, trade and final consumption of hard coal, brown coal, oil, natural gas and electricity. The book includes definitions of products and flows and explanatory notes on the individual country data.

World Energy Statistics

Energy Balances of OECD Countries

Energy statistics of OECD countries

Bilans Énergétiques Des Pays de L'OCDE.

This volume contains data on energy supply and consumption in original units for coal, oil, natural gas, electricity, heat, renewables and waste. Complete data are available for 2008 and 2009 and supply estimates are available for the most recent year (i.e. 2010). Historical tables summarise data on production, trade and final consumption. The book also includes definitions of products and flows and explanatory notes on the individual country data.

This volume contains data on energy supply and consumption in original units for coal, oil, gas, electricity, heat, combustible renewables and waste. Historical tables summarise data on production, trade and final consumption of coal, oil, natural gas and electricity. The book includes definitions of products and flows and explanatory notes on the individual country data. (A companion volume on energy balances of OECD Countries is also available which presents data as comprehensive energy balances expressed in million tonnes of oil equivalent).

Energy Statistics of OECD Countries 1993-1994

Energy Statistics of OECD Countries 1989-1990

Energy Balances of Oecd Countries

"Energy Statistics of Non-OECD Countries, 2002-2003: 2005 Edition" contains data on energy supply and consumption in original units for coal, oil, gas, electricity, heat, renewables, and waste for over 100 non-OECD countries. Historical tables summarise data on production, trade,

and final consumption. The book includes definitions of products and flows and explanatory notes on the individual country data.

Energy Statistics of OECD Countries Organization for Economic

Based on 2008-2009 Data

Energy Statistics of OECD Countries, 2002-2003

Energy Statistics of OECD Countries. 1993

Energy Statistics of OECD Countries: 1997/1998 2000 Edition (1-10 Users Version)

This volume contains data on energy supply and consumption in original units for coal, oil, gas, electricity, heat, renewables and waste. Complete data are available for 2009 and 2010 and supply estimates are available for the most recent year (i.e. 2011). Historical tables summarise data on production, trade and final consumption. The book also includes definitions of products and flows and explanatory notes on the individual country data.

This volume contains data on energy supply and consumption in original units for coal, oil, gas, electricity, heat, renewables and waste. Complete data are available for 2011 and 2012 and supply estimates are available for the most recent year (i.e. 2013). Historical tables summarize data on production, trade and final consumption. The book also includes definitions of products and flows and explanatory notes on the individual country data. In the 2014 edition of Energy Balances of OECD Countries, the sister volume of this publication, the data are presented as comprehensive energy balances expressed in million tons of oil equivalent.

Energy Statistics of OECD Countries 2014

Energy Statistics of OECD Countries, 2004-2005

Energy Statistics of Non-OECD Countries 2011

Energy Statistics of OECD Countries 2010

This volume contains, for the OECD countries and regional aggregations, data on energy supply and consumption in original units for coal, oil, gas, electricity, heat, renewables and waste. Consumption is broken down by industrial, transport, and other sectors. Historical tables from 1960 onwards summarise data on production, trade and final consumption. The book also includes definitions of products and flows and explanatory notes on the individual country data. Energy Balances of OECD Countries 2003-2004, the sister volume of this publication, provides the data as comprehensive energy ba.

This volume contains data for 2008 and 2009 on energy supply and consumption in original units for coal, oil, natural gas, electricity, heat, renewables and waste for over 100 non-OECD countries. Historical tables summarise data on production, trade, final consumption and oil demand by product. These tables also include preliminary estimates of 2010 production (and trade when

available) for natural gas, primary coal and oil. The book also includes definitions of products and flows and explanatory notes on the individual country data and sources. In the 2011 edition of "Energy Balances of Non-OECD Countries," the sister volume of this publication, the data are presented as comprehensive energy balances expressed in tonnes of oil equivalent.

Energy statistics of OECD countries 1987-1988

2005 Edition

Statistiques de l'énergie des pays de l'OCDE 1999-2000 : Energy Statistics of

2006 Edition

This volume contains data on the supply and consumption of coal, oil, gas, electricity, heat, renewables and waste presented as comprehensive energy balances expressed in million tonnes of oil equivalent. Complete data are available for 2010 and 2011 and supply estimates are available for the most recent year (i.e. 2012). Historical tables summarise production, trade and final consumption data as well as key energy and economic indicators. The book also includes definitions of products and flows, explanatory notes on the individual country data and conversion factors from original units to energy units. More detailed data in original units are published in the 2013 edition of Energy Statistics of OECD Countries, the sister volume of this publication.

World Energy Statistics provides comprehensive world energy statistics on all energy sources - coal, gas, oil, electricity, renewables and waste. It covers energy supply and consumption for over 160 countries and regions, including all OECD countries, and more than 100 other key energy producing and consuming countries, as well as world totals and various regional aggregates. The book includes detailed tables by country in original units, and summary time series on production, trade, and final consumption by sector. In the companion publication World Energy Balances, data are presented as comprehensive energy balances expressed in energy units.

Energy Statistics of OECD Countries

Energy Statistics of OECD Countries, 1960-1979: 1960-1969

Energy statistics of non-OECD countries

Energy Statistics of Non-OECD Countries 2009

"The Energy statistics of Non-OECD Countries CD-ROM contains data on energy supply and consumption for over 100

non-OECD countries. Data are provided in original units for the different types of coal, oil, natural gas, renewables and waste, as well as for electricity and heat. In general, the data are available for 1971 to 2011, with preliminary estimates of 2012 production (and trade when available) for natural gas, primary coal and oil. In addition, the CD-ROM contains data on oil demand by product in barrels per day. Definitions of products and flows and explanatory notes on the individual country data have also been included in the file."--CD case inlay card.

This volume contains data for 2006 and 2007 on energy supply and consumption in original units for coal, oil, gas, electricity, heat, renewables and waste for over 100 non-OECD countries. Historical tables summarise data on production, trade, final consumption and oil demand by product. The book includes definitions of products and flows and explanatory notes on the individual country data. In the 2009 edition of Energy Balances of Non-OECD Countries, the sister volume of this publication, the data are presented as comprehensive energy balances expressed in tonnes of oil equivalent.

CECD Countries 1999-20

2003/2004

Energy Statistics of Non-OECD Countries

Energy Statistics of Non-oecd Countries 2014

This volume contains, for the OECD countries and regional aggregations, data on energy supply and consumption in original units for coal, oil, gas, electricity, heat, renewables and waste. Consumption is broken down by industrial, transport, and other sectors. Historical tables from 1960 onwards summarise data on production, trade and final consumption. The book also includes definitions of products and flows and explanatory notes on the individual country data. Energy Balances of OECD Countries 2003-2004 , the sister volume of this publication, provides the data as comprehensive energy ba.

This volume contains data on the supply and consumption of coal, oil, natural gas, electricity, heat, renewables and waste presented as comprehensive energy balances expressed in million tonnes of oil equivalent. Complete data are available for 2008 and 2009 and supply estimates are available for the most recent year (i.e.2010). Historical tables summarise production, trade and final consumption data as well as key energy and economic indicators. The book also includes definitions of products and flows, explanatory notes on the individual country data and conversion factors from original

units to energy units. More detailed data in original units are published in the 2011 edition of "Energy Statistics of OECD Countries," the sister volume of this publication.

Energy Statistics of OECD Countries 2011

Energy statistics of OECD countries, 2001–2002

1960–1979. 1970–1979. – 1991

Energy Statistics of OECD Countries. 1987 Onwards

This volume contains data for 2011 and 2012 on energy supply and consumption in original units for coal, oil, natural gas, electricity, heat, renewables and waste for over 100 non-OECD countries. Historical tables summarise data on production, trade, final consumption and oil demand by product. These tables also include preliminary estimates of 2013 production (and trade when available) for natural gas, primary coal and oil. The book also includes definitions of products and flows and explanatory notes on the individual country data and sources. In the 2014 edition of Energy Balances of Non-OECD Countries, the sister volume of this publication, the data are presented as comprehensive energy balances expressed in tonnes of oil equivalent. This volume contains data on the supply and consumption of coal, oil, gas, electricity, heat, renewables and waste presented as comprehensive energy balances expressed in million tonnes of oil equivalent.

Energy Statistics and Balances of Non-OECD Countries

Energy statistics of OECD countries. 1960 - 1991,1. [Diskette ; NBM/CD-ROM]

Energy Statistics of OECD Countries 2015

1960-1979. 1960-1969. - 1991

This volume contains data on energy supply and consumption in original units (i.e. units related to each type of energy) for coal, oil, gas, electricity, heat, renewables and waste. Historical tables summarise data on production, trade and final consumption. The book also includes definitions of products and flows and explanatory notes on the individual country data.
