

Engaging Nlp For Parents

Have you ever wished you could improve your reading, writing, spelling, maths, and your memory and learning skills? This title takes you through a series of simple logical steps which build on each other to enable you or your children to visualise your way to success, developing skills you already possess.

Every child, every family situation is different and parenting is a journey of constant change. There are no "right answers", only what works for you and your family. This book will give you a toolkit of practical NLP (Neuro Linguistic Programming) methods flexible enough to cover all situations. It focuses equally on the needs of you, the parent, as well as your child and will help you: get your family life running more smoothly; understand your children; support and encourage them and their development more effectively; recognise and meet your own needs so you can be more resourceful in family life; feel more confident and positive so you can have fun and enjoy being a parent more of the time! Rather than giving prescriptive advice, Happy Kids Happy You will help you to deal with your own and your children's situations. You will learn to speak and behave more positively with your children and experience outstanding results!

Most people with children would tell you that parenting is the most difficult job they've ever had. What if it didn't have to be either of those things, difficult or a job? Each of the 19 authors (Jennifer Chabot, Sadie Lake, Jennifer Cramer Windsor, Cassy Summers, Heather Nichols MSW, Brendon Watt, Cathleen Connor, Trina Rice ORTL, MBE, Mary Dravis-Parrish, Dr. Glenn Rice, DPT, Gary Douglas, Fay Thompson, Susan Lazar Hart, Julie Oreson Perkins, Goshia Lorenz, Tanya Graham, Danielle Varanda, Kathy Williams, and Petrina Favai) share their personal revelations and unique awareness that may hold the keys for you unlocking the secret garden of life as a parent that is easier, more fulfilling, and way more fun than you've ever imagined parenting could be! Have you ever noticed that a huge part of what makes parenting seem difficult is the avalanche of judgment we pile upon ourselves to determine if we're getting parenting right? If you no longer had to measure your parenting against what the studies say, what all the experts in the books say, or even what your own parents or in-laws say, what would you do different, starting today? What if, instead of using other people's points of view as the barometer for our success or failures as a parent, we gave ourselves permission to consult our own families to determine what, if anything, needed to change? While it is true that children don't come with a manual, there is no shortage of well-intended information to steer parents in the direction of what the "experts" have decided is best for children. Remember the days when "Mother's Intuition" was valued above all else? When you are creating your family life, your opinion matters. YOU matter. In our modern era, one thing parents are never encouraged to do is consult their own internal compass to determine the path they might like to follow. Possibilities in Parenting is about reawakening the awareness many of us have diminished by making everyone else's points of view more valuable to us than our own. This book is not about how to fix what someone has decided you're doing wrong. On the contrary, it's an invitation to step back into the equation of your life; for you to begin parenting from the choices you have available that would work for YOU.

Between 13 and 19 we become adults and pass from the relatively protected home and family base to the street with our friends. Along the way we take exams, make hugely important decisions about school, work and relationships and we make mistakes. These mistakes can help us develop as mature adults or they can set us back and leave us lacking in confidence and unable to achieve our potential. This book gives you some helpful tips and information about how to harness what you are good at so you can manage what you are not good at and make it better. Content includes; Confidence how to get it and keep it; Non verbal communication eg appearance; Verbal communication and getting what you want; Managing exam stress; Getting a job; Relationships and sex

Parenting: Contemporary Clinical Perspectives offers fresh insights into treating parents and their children that highlight the evolving role of parents throughout the lifespan and amidst contemporary social pressure and change. By drawing from their own personal experiences as well as those from clinical practice, distinguished clinicians and analysts examine each phase of parenting through a variety of lenses to tackle our biggest parenting questions. While we must be highly present for our children to help them develop a sense of self-worth, we must simultaneously step back if we want them to develop a sense of autonomy and individuality. As our role as parent changes, how can we maintain a sense of grace, humor, and perspective? How can our work in practice inform and enrich our parenting, and vice versa? Thoughtful and engaging, this volume is a valuable resource for family therapists and clinicians, especially those who are parents themselves.

This book fits neatly between NLP for Children and NLP for Teens, covering as it does that Tween 10-15yr age group which sees children develop into young adulthood. Children become independent, responsible and resourceful because they spend most of their time away from home and the family. They need to be equipped with confidence, motivation and good communication skills. This book will teach them NLP tools and techniques to manage: transition into secondary school; onset of puberty; growth of personal responsibility; relationships with boys/girls; schoolwork and exams; peer group pressure; weight issues; bullying. Be A Happier Parent with NLP will give you exactly the skills you need to raise a confident, secure child in a confident and secure manner. It uses the tried, trusted and proven techniques of neuro-linguistic programming to help tackle areas in which you feel you lack confidence as a parent, while at the same time giving you the skills to help your child be happy, fulfilled and confident themselves. You will find yourself feeling less guilty, more in control, and communicating better with your child - at the same time you will be able to support your child in difficult situations and help them grow into a well-rounded adult.

your Barkkowiak has combined working in a wide variety of jobs with bringing up four children and believes that the most important attributes mums need are; self belief; outcome thinking; flexibility; positivity; the ability to prioritise. These skills are covered in this book along with plenty of different ideas of paid work that you can combine with having a family and having the time to enjoy them.

Elaine Halligan's My Child's Different: The lessons learned from one family's struggle to unlock their son's potential explores the enabling role that parents can play in getting the best out of children who are seen as 'different' or 'difficult'. Foreword by Dr Laura Markham. Society favours children, and adults, who conform. The notion that our children may be shunned for being 'different' breaks our hearts, but there is plenty we can do to help such children develop into thriving, resilient adults. In My Child's Different Elaine shares the true story of her son Sam, who by the age of seven had been excluded from three schools and was later labelled with a whole host of conditions ranging from autistic spectrum disorder (ASD) to pathological demand avoidance (PDA), before finally being diagnosed with dyslexia. He had become 'the Alphabet Kid'. His family never gave up on him, however Drawing lessons from Sam's transformational journey from difficult child to budding entrepreneur, My Child's Different offers encouragement to parents who may be concerned about what the future might hold, and demonstrates how with the right support and positive parenting skills their children can grow up to surprise and delight them. The book chronicles Sam's journey from birth to adulthood, allowing readers to spot past and present patterns that may be comparable with their own children's experiences, and provides pragmatic parenting advice that will be of benefit to any parent whose children who may or may not have a diagnosed learning difficulty struggle with life educationally or socially. Elaine writes with warmth and compassion as she revisits the challenges faced, the obstacles overcome and the key interventions that helped instil in Sam a sense of self-belief, a drive to succeed and an emotional intelligence beyond his years. Interspersed throughout the narrative are the reflections and insights of parenting expert Melissa Hood, who illustrates the key concepts from Sam's story and shares practical positive parenting techniques to help parents better connect with their children. Also included are contributions from Sam himself providing an additional, uniquely rich perspective that will help deepen parents' understanding of their children's feelings and emotions. Suitable for parents, educators and anyone who works with children, My Child's Different is a celebration of all the unique qualities that those who are different bring to society.

As a parent, she has struggled. She has been a helicopter parent, an explosive parent and an embarrassing parent. (Google "dancing mom in traffic" and see for yourself.) Because she has struggled as a parent, she wants to help other parents struggle...a little bit less! Temperament psychology and qEEG brain maps, concluded that she and her daughter were complete opposites. Even with over twenty years of experience training both children and adults she was still desperately seeking a user manual that would explain how to get through to her daughter. It didn't exist. Over the last nine years, Gossett has combined extensive research with hundreds of family case studies to create the user manual she had been seeking. This book will help you accurately assess the temperament of each family member, "map" their brain functions and discover how to motivate them and connect with them throughout every stage of their development. It will also help you relax when you read about some of Gossett's own parenting pitfalls as well as the struggles and victories of other families similar to yours.

[] Examines each of the 9 Enneagram types as parents, including how to utilize your type's inherent skills to be a better parent [] Explores each of the 9 types as children and teens, including their positive and more challenging traits, their triggers and fears, and how you can help your child find emotional health and achieve their full potential [] Looks at each of the 81 parent-child type combinations and shows how each combination works at its best as well as what happens under pressure. In this practical guide to better parenting with the Enneagram, certified Enneagram practitioner and experienced parent Ann Gadd explores the 9 Enneagram parenting types and the 9 Enneagram child types, revealing each type's strengths and challenges, as well as exploring all 81 parent-child type combinations. She offers a quiz to determine your Enneagram type and explains how to discover your child's type. Examining each of the 9 Enneagram parenting types in detail, Gadd looks at what each parental type wants from their child, how to parent from the highest aspects of your type, and how to utilize your type's inherent skills to be an even better parent. She explores each of the 9 types as children, preteens, and teens, including their positive and more challenging traits--what drives them, what they fear, what inspires them--and offers suggestions for how you can best relate to and communicate with your child. Looking at each of the 81 parent-child combinations, Gadd suggests how each combination works at its best as well as what happens under pressure. She reveals how to improve your overall parent-child relationship by recognizing not only your child's triggers but also your own and how to navigate them, leading to more harmonious relationships and interactions within your family. Offering an opportunity to understand your child and yourself on a much deeper level, the author's systematic approach to parenting with the Enneagram reveals why we and our children behave in certain ways, how to release our habits, and how to be fully present as a parent. And being present with our children is the best gift we can give them to help them feel safe, heard, and understood.

Attune, help, and recover: a structured developmental approach to behavioral challenges in children with disabilities. This book offers a comprehensive view of behavioral challenges for a child with autism or other special needs from a developmental perspective based on the DIRFloortime® framework. Parents and professionals are guided to understand and improve a child's behavior while also supporting underlying developmental capacities for shared attention, warm engagement, trust, initiative, creative shared problem solving, symbolic and logical thinking, and the development of personal values. The approach is presented in three parts. Step-by-step, clinicians, caretakers, and educators will learn how to use the developmental approach to: 1. Understand the many variables involved in the behavior of a child with special needs, 2. Effectively respond to a challenging behavior in the moment with three key steps: attune, help, and recover 3. Create a long-term plan to support developmental and behavioral progress. When a child with a disability has a behavioral challenge, a clinician is confronted with the complexities of the child's developmental strengths and vulnerabilities, individual differences, and his or her unique pattern of interactions in personal relationships. Keeping all the variables in mind, the developmental approach provides a plan that supports a child's growth and deepens his or her capacity for positive and care for others. The framework is based on universal developmental principles, which are effective regardless of the child's particular age or disability. By recognizing a child's developmental level of functioning, an adult can select strategies to effectively guide the child toward higher levels of relating, thinking and communicating. Through the process of compassionate attunement, and building on a child's strengths, adults can optimistically chart a clear path to long-term success. A refreshing alternative to rewards-and consequences-based models of behavior management, the methods and practices in this book will empower any adult who interacts with a child with special needs, whether their work is directly focused on improving behavior, or because they must provide support so that the child can participate in other endeavors.

Engaging Families in Schools is a practical resource that provides strategies and ideas that will contribute to the effective engagement of families and the involvement of parents in their child's education. Parental engagement with school staff has a significant and very positive impact on children's learning, and strategies presented have been extensively trialed in a variety of different settings. Nicola S. Morgan shows school staff how to understand the importance of family engagement and evidence the outcomes. This book has been split into ten easily accessible units: Understanding the importance of parent engagement Using whole-school strategies to engage parents The role of the family-engagement officer Engaging all parents Engaging Dads Engaging multicultural parents Difficult to engage parents Working with parents to improve student attainment Working with parents to improve behaviour and attendance Working with parents of children with additional needs This is a must-read guide for teaching and non teaching staff who wishes to bridge the gap between their student's school and family life and understand the effects of positive family engagement.

In Reading for Pleasure, Kenny Pieper has gathered a range of tried-and-tested strategies to get kids reading, and enjoying it. We hear too often that kids don't read any more: Kenny thinks it should be every teacher's mission to prove this isn't true. In a squeezed curriculum it can be tempting to accept pupils' lack of reading and make excuses that there is not enough time to give to the 'luxury' of personal reading. Teachers do this at our peril. Reading is the essential building block of further literacy development as well as a skill, hobby and habit that we can take with us forever. Kenny Pieper takes the act of reading for granted, as does many – but sadly not all – adults. Do you're reading this right now. However, this isn't the case for everyone. Kenny teaches kids whose lives are terrifying obstacle courses of reading-related problems. They know they struggle with reading so they try to avoid reading at all costs. They leave school, not merely unaffected by this strange reading thing, but saddled with a great deal of emotional baggage about being an outsider, even more entrenched in a belief that reading is for others more intelligent than them. Then there are the children who can read perfectly well, but chose not to, unconvinced of the importance of reading in their lives. What difference does it make to them? We have to answer that question in school. We have a duty to put an end to illiteracy and alterity. Kids need reading role models and, as a teacher, that role model is you. You may be the only adult who that reluctant reader will ever see reading. Teachers are critical in giving all children the gift of being able to read well and to value reading. Topics covered include: the author's personal reading journey, how reading enabled him to become the first person in his family to go to university and convinced him that fostering a love of reading is his moral duty as an educator, illiteracy and alterity, reluctant readers, book reviews, prioritising personal reading by devoting ten minutes each lesson to it, habitual reading, the reading environment, interest inventories, technology, e-readers, Accelerated Reader programmes, recommended reading, building a class library, bookmarks, book tweets, book speed-dating, libraries, librarians, literacy and class inequality, parental involvement, podcasting, reading records, reading dialogue journals, the rights of the reader, reading aloud, silent reading and literacy and gender, amongst others. The benefits we can all reap when kids become confident readers who read for pleasure are obvious. Discover strategies which will: get kids talking about books, get them thinking about books, get them reading books, encourage independent reading, develop literacy skills and establish a classroom culture where

reading is expected and celebrated. Suitable for primary and secondary teachers, leaders and SENCOs, or just anyone with an interest in or responsibility for getting kids to read.

Artificial Intelligence (AI) is a field within computer science that is attempting to build enhanced intelligence into computer systems. This book traces the history of the subject, from the early dreams of eighteenth-century (and earlier) pioneers to the more successful work of today's AI engineers. AI is becoming more and more a part of everyone's life. The technology is already embedded in face-recognition cameras, speech-recognition software, internet search engines, and health-care robots, among other applications. The book's many diagrams and easy-to-understand descriptions of AI programs will help the casual reader gain an understanding of how these and other AI systems actually work. Its thorough (but unobtrusive) end-of-chapter notes containing citations to important source materials will be of great use to AI scholars and researchers. This book promises to be the definitive history of a field that has captivated the imaginations of scientists, philosophers, and writers for centuries.

At the end of every week many teachers leave school exhausted. In an era when responsibility for exam results lies with them and not their students it's time to redress the balance so that students take more of the responsibility for their learning. A class can be skilled and motivated to learn without a teacher always having to lead. Engaging learners in this way unpicks intrinsic motivation, the foundation that underpins a productive learning environment and helps to develop independent learning.Based on five years of intensive research through Osiris Education's award-winning Outstanding Teaching Intervention programme, during which the authors have trained more than 500 teachers to teach over 1,300 lessons in schools nationwide, this book is packed with proven advice and innovative tools developed in these successful outstanding lessons.Written in the same humorous, thought-provoking style with which they both teach and train, Andy and Mark aim to challenge all who teach, from NQTs to seasoned professionals, to reflect on their day-to-day practise and set an agenda for sustainable improvement.

We all want our children to grow up in a safe and happy world where they will learn and play, make friends and be free of stress, don't we? If only that could be the case for all our children. Sadly though they experience changes they find difficult to cope with, pressures too onerous to bear and sadness we can't magic away with a hug. I have written this book for you to work through with your child aged 5-11yrs. This book will teach them about; Self Esteem; Setting goals; Controlling their mood; Managing criticism; Coping with change; Coping with grief; Making friends (rapport) Learning styles (VAK).

The Origins of NLP brings together the recollections and insights of some of the main protagonists from the very early days of NLP. In 1971 Richard Bandler and Frank Puccelli were students at Kresage College at the University of California Santa Cruz. They had a strong mutual interest in Gestalt Therapy. Frank because of his traumatic time in Vietnam and because he had been working with some disaffected kids, and Richard because he had been working with Science and Behavior Books on transcribing and editing Fritz Perls' seminal work. The Gestalt Approach and Eyewitness to Therapy. They started a local Gestalt group and ran 2-3 sessions a week collaborating and experimenting with the language of therapy. They started achieving some brilliant results but were having problems transferring their skills to others and so Richard invited one of their college professors, John Grinder, to observe what they were doing in order that he would, hopefully, be able to deconstruct what they were doing that was so effective. John was a professor of Linguistics and was instantly impressed with the work that they were doing. He was able to add more structure and in due course the three of them formalised what is now known as the Meta Model. NLP or Meta as it was known then, was born.

Parenting is not an idea, concept or belief. It's a process and therefore is neither static nor fixed in time that results in something special being created. The Parents' Handbook provides you with tools, techniques, insights and approaches to improve the way you communicate, to be available emotionally and physically and to successfully fulfill the different roles expected of you as a parent.
