Women's entrepreneurship research and the understanding of factors influencing the growth of women-owned business advanced significantly over the last decade. Yet, challenges remain. Women Entrepreneurs and the Global Environment for Growth provides wide-ranging insights on the challenges women entrepreneurs face growing their businesses and how these may be addressed. This volume is rooted in research and considers growth challenges both contextually and firm specific, provoking current thought and enriching the current literature on gender and

entrepreneurship. Part one highlights how contextual factors, and especially social and familial settings of entrepreneurs, have a differential impact on men and women. Part two examines strategies, constraints and enablers of growth and performance. The authors aptly demonstrate that a well-focused gender lens is necessary to better explain the phenomenon of women's entrepreneurship. Extending previous studies about women's entrepreneurship, this volume is unique in its application of research from the Diana Project, a path breaking initiative dating from 1999 to study female entrepreneurial success. Contributions from an international cast of authors make this a comprehensive

Ten Cheap Lessons is not your ordinary teacher resource book. If you're tired of compilations of meaningless worksheets and boring busy work passing themselves off as "exciting hands-on activities," you're not alone. This book is designed for real-life classrooms, where teachers have no time, no budget, and eager students just waiting for something to engage them. This book contains ten complete ideas that can be easily adapted for any topic in any secondary subject area. It's meant to be easy as possible for any teacher to start using immediately.

Engineers as Leaders

The Journal of the American Society of Mechanical Engineers

Do engineers have what it takes to move up the economic food chain—to lead? If not, why not? If gaps exist, how can they be closed?

What is the difference between an engineer leading engineers versus leading non-engineers? How, if at all, does engineering education influence perceived leadership

style? How exactly does one characterize leadership style, and how is it measured? In a book designed and written specifically for engineers and predicated largely on his leadership-oriented doctoral dissertation in pursuit of the PhD in engineering management, Dr. Calloway addresses each of these questions and more!

Getting hired quickly isn't as easy as it once was.

While the traditional cause of unemployment is grouped under the heading of a "bad economy," there now exists a new impediment to getting hired: online recruitment. Why has Internet job hunting or online recruitment made it so much harder to getting hired? Before the widespread use of online recruitment, employers usually received a handful of job applicants per job posting. Today, it's quite common for employers to obtain 200 applicants per job posting!

With increased competition, the difficulty of getting hired increases. You can overcome the roadblocks that online recruitment places in your path to a new job. The goal of this book is to teach you a simple, divide-and-conquer method that will help you use online recruitment successfully. In addition, it will also teach you how to write a highly searchable online résumé and how to correct problems when they arise in your job search campaign.

This book gathers the proceedings of the 14th International Conference on Management Science and Engineering Management (ICMSEM 2020). Held at the Academy of Studies of Moldova from July 30 to August 2, 2020, the conference provided a platform for researchers and practitioners in the field to share their ideas and experiences. Covering a wide range of topics, including hot management issues in engineering

science, the book presents novel ideas and the latest research advances in the area of management science and engineering management. It includes both theoretical and practical studies of management science applied in computing methodology, highlighting advanced management concepts, and computing technologies for decision-making problems involving large, uncertain and unstructured data. The book also describes the changes and

challenges relating to decision-making procedures at the dawn of the big data era, and discusses new technologies for analysis, capture, search, sharing, storage, transfer and visualization, and in the context of privacy violations, as well as advances in the integration of optimization, statistics and data mining. Given its scope, it will appeal to a wide readership, particularly those looking for new ideas and research directions. This book, and its companion,

Technology, Competitiveness and the State, examine and evaluate Malaysian industrialization in terms of its experience of and prospects for industrial technology development. The focus is on the development of Malaysia's technological-industrial base from a sector and firm-specific perspective, including the role of foreign multinationals in this process. Industrial Technology Development in Malaysia, provides a valuable analysis of the

technological development of a Newly Industrializing Country and reflects on whether existing development strategies can be maintained in the wake of the financial crises sweeping the East Asian economies.

Have you been looking for a long time and don't feel you're any closer to a job offer than when you began months or years ago? And you don't recall it ever being this hard to land a new job? Well, nearly all job seekers today experience

difficult job searches and don't always understand why. Of course, there is a number of causes for this phenomenon. The most visible one is the outsourcing of job overseas and the adoption of technology (automation, robots, computers) in the workplace. The widespread use of online job searching also causes job search difficulties. This book overcomes these problems and more. The goal of this book is get you hired quickly, even if you've been out of

work for years. It will teach you a simple, divide-and-conquer method that will help you speed up your job search. This book was written for you, the unemployed persons of the world.
