First Published in 1997. Routledge is an imprint of Taylor & Francis, an informa company.

This charming book The Many Worlds of Sarala Deri and The Tagores and Sartorial Styles, as the titles suggest, contain two separate but related writings on the Tagores. The Tagores were a pre-eminent family which became synonymous with the cultural regeneration of India, specifically of Bengal, in the nineteenth century. The first writing is a sensitive translation of Sarala Devi's memoirs from the Bengali, Jeeraner Jbarapata, by Sukhendu Ray. It is the first autobiography written by a nationalist woman leader of India. Sarala Devi was Rabindranath Tagore's niece and had an unusual life. The translation unfolds, among other things, what it was like to grow up in a big affluent house Jorasanko, which had more than 116 inmates and a dozen cooks! The second writing by Malavika Karlekar is a photo essay, creatively conceived, visually reflecting the social and cultural trends of the times, through styles of dress, jewellery and accountrements. The modern style of wearing a sari was introduced by Jnanadanandini Devi, a member of the Tagore family. The introduction by the well-known historian, Bharati Ray, very perceptively captures the larger context of family, marriage, women's education and politics of the time which touched Sarala Devi's life. She points out if memoirs are a kind of social history then women's diaries record social influences not found in official accounts and are therefore, a rich source of documentation.

***This report presents the findings of an operations research study conducted to assess the implementation of the Government of Bangladesh's National Nutrition Services Program (NNS) and to identify the achievements, determine the bottlenecks that adversely impact these achievements, and highlight potential solutions to ensure smooth delivery of the program. A mixed methods research approach was used to evaluate five major domains of the program: management and support services; training and capacity development; service delivery; monitoring and evaluation, and; exposure to interventions. The study found that the overall NNS effort is an ambitious, but valuable approach to support nutrition actions through an existing health system with diverse platforms. The results indicate that although the maintenance of strong and stable leadership of NNS is an essential element to ensure integrated and well-coordinated comprehensive service delivery for the line directorate, the current arrangement is unable to ensure effective implementation and coordination of NNS. Focusing on some of the critical challenges related to leadership and coordination in the first instance, and on embedding a small core set of interventions into well-matched (for scale, target populations, and potential for impact) health system delivery platforms is most likely to help achieve scale and impact. Strategic investments in ensuring transparency, engaging available technical partners for monitoring and implementation support, and not shying away from other potential high coverage outreach platforms like some NGO platforms also could prove fruitful. Moreover, although the Government of Bangladesh, and the health system in particular, must lead the effort to deliver for nutrition, it is clear that development partners who have expressed a commitment to nutrition must coordinate their own activities and provide the support that can deliver on nutrition's potential for Bangladesh.***

***Gender has a fundamental influence on the human brain, not only by virtue of biological and hormonal differences between the sexes but also because of the impact of gender-specific cultural, social, anthropological and environmental factors. Nevertheless, the relation of gender and psychopathology remains a largely neglected field. Gender perspective has been treated as a paradigm in this book on psychopathology because it determines the way in which a psychiatric symptom is defined, perceived and understood. This conception of gender as being of key importance in the definition of psychiatric symptomatology is exceptional in the literature. The book opens by examining historical and cultural aspects of mental health in women worldwide and the relation of sex, brain and gender, with coverage of both neurobiological and psychosocial aspects. The significance of gender with regard to specific aspects of psychopathology is then addressed in detail. A wide range of psychological disorders are considered, as well as hormonal influences and issues concerning body image, self identity, sexuality and life instinct. It is hoped that this book will make a significant contribution in ensuring that gender perspective receives due attention within descriptive psychopathology.***

This eBook edition of "Ode to a Nightingale" has been formatted to the highest digital standards and adjusted for readability on all devices. "Ode to a Nightingale" is either the garden of the Spaniards Inn, Hampstead, London, or, according to Keats' friend Charles Armitage Brown, under a plum tree in the garden of Keats House, also in Hampstead. According to Brown, a nightingale had built its nest near his home in the spring of 1819. Inspired by the bird's song, Keats composed the poem in one day. It soon became one of his 1819 odes and was first published in Annals of the Fine Arts the following July. "Ode to a Nightingale" is a personal poem that describes Keats's journey into the state of Negative Capability. The tone of the poem rejects the optimistic pursuit of pleasure found within Keats's earlier poems and explores the themes of nature, transience and mortality, the latter being particularly personal to Keats. The nightingale described within the poem experiences a type of death but does not actually die. Instead, the songbird is capable of living through its song, which is a fate that humans cannot expect. John Keats (1795-1821) was an English Romantic poet. The poetry of Keats is characterized by sensual imagery, most notably in the series of odes.

Today his poems and letters are some of the most popular and most analyzed in English literature.

This market-leading introduction to probability features exceptionally clear explanations of the mathematics of probability theory and explores its many diverse applications through numerous interesting and motivational examples. The outstanding problem sets are a hallmark feature of this book. Provides clear, complete explanations to fully explain mathematical concepts. Features subsections on the probabilistic method and the maximum-minimums identity. Includes many new examples relating to DNA matching, utility, finance, and applications of the probabilistic method. Features an intuitive treatment of probability—intuitive explanations follow many examples. The Probability Models Disk included with each copy of the book, contains six probability models that are referenced in the book and allow readers to quickly and easily perform calculations and simulations.

This book is the first of its kind to offer an understanding, analysis, and prediction of the state of civil society in Bangladesh in relation to development and democracy. It is a research attempt to reveal the paradox found in developing countries like Bangladesh where there are numerous and active civil society organizations (CSOs) that have had almost no influence in consolidating democracy. This book, however, also qualifies the normative assumption on the positive relationship between civil society and democracy asserted by the mainstream neo-Tocquevillean School that has a profound influence on donor policies. Readers are introduced to civil society in Bangladesh from a broad perspective. Rather than confining the analysis to NGOs, chapters explore the origin, nature, and function of both modern and conventional CSOs, which helps to provide a more authentic understanding of the genuine state of civil society in relation to other actors in the political system. Combining survey data analyses and empirical observations with carefully chosen case studies, the book reveals that CSOs participate very actively in social services. This research also reveals that these highly active CSOs in the field of social development lack the necessary attributes for ensuring participation, proper interest articulation and monitoring of the state. Through systematic analysis, the book shows that political structures—and for Bangladesh, particularly political parties—along with vertical social relationships such as clientelism, patronage, nepotism, and corruption have contributed to a non-vigilant civil society in Bangladesh, although it often is spoken of in different terms. This book is highly recommended for researchers, students, and development practitioners interested in South Asia as well as in understanding the potentials and limitations of civil society in relation to development and democracy. Farhat Tasnim's book is a comprehensive treatment of civil society in Bangladesh. It will serve as a useful resource for future researchers in this field for a long time to come. Harry Blair, Yale University, USA Farhat Tasnim provides in this book a new perspective on one of the essential cases of civil society study, Bangladesh. Her penetrating analysis of the relationship of civil society organizations and democracy in Bangladesh should attract a wide readership. This is an important book not only for students of Bangladesh, but for scholars and practitioners interested in the relationship of civil society organizations and democracy. Robert J.
