On December 25, 1776, the American Revolution seemed all but defeated just six months after the Declaration of Independence had been adopted.

George Washington 's army had suffered a series of defeats in New York and had retreated under British pressure across New Jersey and then the Delaware River to temporary sanctuary in Pennsylvania. This left the British army in a string of winter cantonments across the middle of New Jersey, the New Jersey

state government in total disarray, and the Continental Congress fleeing Philadelphia now perceived as the next British target. Loyalists in New Jersey felt empowered and Patriots felt abandoned. Washington needed not only a battlefield victory, but also to reestablish Patriot control in New Jersey. Otherwise, it would be impossible to raise a larger, long-term army to continue the fight and convince the citizens that victory was possible. The story of these ten crucial days is one that displays Washington ' s military and interpersonal abilities along with his personal determination and bravery to keep the Revolution alive through maintaining the psychological confidence of the Patriots, while reducing the psychological confidence of his British political and military opponents. Throughout these ten days, Washington was faced with changing situations requiring modifications or outright different plans and his well-thought-out actions benefitted from elements of luck—such as the weather or British decisions—which he could not control. While most books look at these ten crucial days focusing on the military actions of the armies involved, this account also considers what was happening in other parts of the world. Leaders and ordinary people in other parts of America, in Britain, and in France were also dealing with the Revolution as they understood its condition. Without the instantaneous communication we have today, they were dealing

with dated information and were missing knowledge that could influence their thoughts about the Revolution. This lack of immediate communication was also true—although to lesser extent—for the individuals directly involved in the events in New Jersey and Pennsylvania.

Published in 1996, this book aims to address the problem faced by teachers needing basic information about the subject they have been asked to teach. It includes addresses of publishers, suppliers, agencies and organizations which should be useful for teachers.

The Gentleman's Magazine was the leading eighteenth-century periodical. By integrating the magazine's history, readers and contents this study shows how 'gentlemanliness' was reshaped to accommodate their social and political ambitions.

Public Archaeology

Scrutinizing, in detail, the relationship between archaeology, heritage and the public, this much-needed volume explores public interest and participation in archaeology as a subject worthy of academic attention in its own right. Examining case studies from throughout the world; from North America, Britain, Egypt and Brazil to East Africa, China and beyond, Nick Merriman focuses on two key areas: communication and interpretation, and stakeholders. Constant reports of new discoveries, protests over the destruction of sites and debates over the return of artefacts such as the Elgin marbles or indigenous remains testify to an increasing public interest in archaeology. For students and scholars of this archaeology, and of its relationship with the public, this will prove essential reading. The American Teacher is a comprehensive education foundations text with an emphasis on the historical continuity of educational issues and their practical application in the classroom. Aspiring teachers enter the classrooms with an innate optimism, and the challenge of The American Teacher is to engage them and to provide meaningful

direction to channel their idealism. By reconnecting individuals with their society, community, and workplace, this engaging text provides education students with a grounding in their profession and an understanding of how important social and political issues affect educational practice.

An Inquiry-Based Strategy for Using Film to Teach United States History

Directives concrètes pour l'exploitation des ressources pédagogiques des musées et des sites historiques pour l'enseignement de l'histoire grâce à la collaboration des services éducatifs des musées.

Teaching and learning through Hollywood, or commercial, film productions is anything but a new approach and has been something of a mainstay in the classroom for nearly a century. Purposeful and effective instruction through film, however, is not problem-free and there are many challenges that accompany classroom applications of Hollywood motion pictures. In response to the problems and possibilities associated with teaching through film, we have collaboratively developed a collection of practical, classroom-ready lesson ideas that might

bridge gaps between theory and practice and assist teachers endeavoring to make effective use of film in their classrooms. We believe that film can serve as a powerful tool in the social studies classroom and, where appropriately utilized, foster critical thinking and civic mindedness. The College, Career, and Civic Life (C3) framework, represents a renewed and formalized emphasis on the perennial social studies goals of deep thinking, reading and writing. We believe that as teachers endeavor to digest and implement the platform in schools and classrooms across the country, the desire for access to structured strategies that lead to more active and rigorous investigation in the social studies classroom will grow increasingly acute. Our hope is that this edited book might play a small role in the larger project of supporting practitioners, specifically K-12 teachers of United States history, by offering a collection of classroom-ready tools based on the Hollywood or History? strategy and designed to foster historical inquiry through the careful use of historically themed motion pictures. The book consists of K-5 and 6-12 lesson plans addressing the following historical eras (Adapted from: UCLA, National Center for History in Schools).
