*Karniol engagingly presents social development in children through the language of preference management. Conversational excerpts garnered from around the world trace how parents talk about preferences, how infants' and children's emergent language conveys their preferences, how children themselves are impacted by others' preferences, and how they in turn influence the preferences of adults and peers. The language of preferences is used to crack into altruism, aggression, and morality, which are ways of coming to terms with other people's preferences. Behind the scenes is a cognitive engine that uses transformational thought - conducting temporal, imaginal, and mental transformations - to figure out other people's preferences and to find more sophisticated means of outmanoeuvring others by persuading them and playing with one's own mind and other people's minds when preferences are blocked. This book is a unique and sometimes amusing must-read for anyone interested in child development, language acquisition, socialisation, and communication.*

Man, Interrupted

Young men are failing as never before - academically, socially and sexually. But why is this so? What are the implications? And what needs to be done about it before it's too late? Philip Zimbardo and co-writer Nikita Coulombe examine the modern meltdown of manhood and how this is manifest in the lives of young men today. They consider such factors as absent fathers, and legislation favouring women, which contribute to many men lacking social skills and direction in their lives. Most controversially, Zimbardo argues that readily available hardcore pornography and exciting gaming realities provide digital alternatives that are less demanding and far more appealing for many than sex, sports and social interaction in the real world. Immersion in these alternative realms is playing havoc with these boys' cognitive development, their ability to concentrate and their social development, allowing girls to excel in the real world where social skills are a source of success. By illuminating the symptoms and causes of these

gloomy trends, Zimbardo and Coulombe shed light on how we arrived at this state of affairs and, most significantly, what the solutions might be.

A perfect and irresistible idea: A cookbook filled with delicious, healthful recipes created for everyone on a tight budget. While studying food policy as a master's candidate at NYU, Leanne Brown asked a simple yet critical question: How well can a person eat on the \$4 a day given by SNAP, the U.S. government's Supplemental Nutrition Assistance Program informally known as food stamps? The answer is surprisingly well: Broiled Tilapia with Lime, Spicy Pulled Pork, Green Chile and Cheddar Quesadillas, Vegetable Jambalaya, Beet and Chickpea Salad—even desserts like Coconut Chocolate Cookies and Peach Coffee Cake. In addition to creating nutritious recipes that maximize every ingredient and use economical cooking methods, Ms. Brown gives tips on shopping; on creating pantry basics; on mastering certain staples—pizza dough, flour tortillas—and saucy extras that make everything taste better, like spice oil and tzatziki; and how to make fundamentally smart, healthful food choices. The idea for Good and Cheap is already proving itself. The author launched a Kickstarter campaign to self-publish and fund the buy one/give one model. Hundreds of thousands of viewers watched her video and donated \$145,000, and national media are paying attention. Even high-profile chefs and food writers have taken note—like Mark Bittman, who retweeted the link to the campaign; Francis Lam, who called it “Terrific!”; and Michael Pollan, who cited it as a “cool kickstarter.” In the same

The first goal is to explore the difference between fairness and justice in language assessment. The authors distinguish internal and external dimensions of the equitable and just treatment of individuals taking language tests which are used as gatekeeping devices to determine access to education and employment, immigrant status, citizenship, and other rights. The second goal is to show how the extent of test fairness can be demonstrated and improved using the tools of psychometrics, in particular the models collectively known as Rasch measurement. "This book will have an enormous impact on the field of language assessment. Using Rasch analysis models to explore and identify sources of unfairness, the authors make a compelling case for fairness in the design and implementation of language assessment instruments and for justice in the interpretation and use of test results. A real strength of the book is that it guides readers through analytical techniques in

What makes good people capable of committing bad - even evil - acts? Few psychologists are as well-qualified to answer that question as Philip Zimbardo, a psychology professor who was not only the author of the classic Stanford Prison Experiment - which asked two groups of students to assume the roles of prisoners and guards in a makeshift jail, to dramatic effect - but also an active participant in the trial of a US serviceman who took part in the violent abuse of Iraqi prisoners in the wake of the second Gulf War.

Zimbardo's book *The Lucifer Effect* is an extended analysis that aims to find solutions to the problem of how good people can commit evil acts. Zimbardo used his problem-solving skills to locate the solution to this question in an understanding of two conditions. Firstly, he writes, situational factors (circumstances and setting) must override dispositional ones, meaning that decent and well-meaning people can behave uncharacteristically when placed in unusual or stressful environments. Secondly, good and evil are not alternatives; they are interchangeable. Most people are capable of being both angels and devils, depending on the circumstances. In making this observation, Zimbardo also built on the work of Stanley Milgram, whose own psychological experiments had shown the impact that authority figures can have on determining the actions of their subordinates. Zimbardo's book is a fine example of the importance of asking productive questions that go beyond the theoretical to consider real-world events. Bringing the science of psychology to life! The 2nd Australasian edition of *Psychology and Life* emphasises the science of psychology, with a special focus on applying that science to students' everyday lives. As a result, the features of *Psychology and Life* support a central theme: psychology as a science, with a focus on applying that science to real life experiences. Australasian research, examples and statistics help make the theory even more relevant for today's students. *Psychology and Life 2e* provides a rigorous, research-centred survey of the discipline while offering students special features and learning aids that will make the science of psychology relevant, spark their interest and excite their

imagination.

In 2011, Philip Zimbardo gave a TED Talk called "The

Demise of Guys," which has been viewed by over 1.8

million people. A TED eBook called The Demise of Guys:

Why Guys Are Struggling and What We Can Do About It followed. The is an expansion of that brief polemic based on Zimbardo's observations, research, and the survey that was completed by over 20,000 viewers of the original TED Talk. The premise here is that we are facing a not-so-brave new world; a world in which young men are getting left behind. In record numbers men are flaming out academically and failing socially and sexually with women. Philip G. Zimbardo and Nikita Coulombe say that an addiction to video games and online porn have created a generation of shy, socially awkward, emotionally removed, and risk-adverse young men who are unable (and unwilling) to navigate the complexities and risks inherent to real-life relationships, school, and employment. Taking a critical look at a problem that is tearing at families and societies everywhere, *Man, Interrupted* suggests that our young men are suffering from a new form of "arousal addiction," and introduce a bold new plan for getting them back on track. The concluding chapters offer a set of solutions that can be affected by different segments of society: What the government can do What schools can do What parents can do What men can do What women can do What the media can do Filled with telling anecdotes, results of fascinating research, perceptive analysis, and concrete suggestions for change. *Man Interrupted* is a book for our time. It is a book that informs, challenged, and ultimately inspires.

*most important of the pre-Socratic philosophers, were at the same time among the greatest poets of the ancient world. But their work is rarely treated and still more rarely translated in its original form--as poetry. The complete extant fragments of Parmenides and Empedocles are collected here for the first time in a translation responsive to the original verse texts. Parmenides' philosophical fragments are here given as the poetic remains of the thinker from Elea in Southern Italy whom Socrates wondered at and Plato held in awe. What emerges from the poetry is at once an uncompromising vision of absolute Being and a compassionate understanding of the human cosmos: It is the body grows to Mind. All men desire the same thing, apprehend the same The plenum is thought, and thought preponderates. The poetry of Empedocles--reincarnationist, naturalist, cosmologist, religious leader, physiologist, and a metaphysician--is presented here in the personal idiom of the fifth-century Sicilian who has been called the last of the Greek shamans: I have already been A bush and a bird A boy and a girl A mute fish in the sea.*
